ABSTRACT

Before the author writes about Muslims in the world study the bacteria that opens the pathway for Allah's spirit to come out of dead human body, the author first asks forgiveness from Allah SWT. Here the author tries to open the veil that covers the secrets about Muslims in the world study the bacteria that opens the pathway for Allah's spirit to come out of dead human body, based on deoxyribonucleic acid (DNA).

There are several verses that reveal Allah's secrets about Muslims in the world study the bacteria that opens the pathway for Allah's spirit to come out of dead human body, namely the following verses:

"We made the earth gather together (Al Mursalaat: 77: 25)

"the living and the dead (Al Mursalaat: 77: 26)

"And indeed We have created human from...the soil (Al Mu'minuun: 23: 12)

"So when I have perfected the life of Adam and breathed into Adam my spirit, then you will fall down and prostrate to him (Shaad: 38: 72)

"On the day they came out of their graves as quickly as if they had gone immediately to idols (Al Ma'aarij: 70: 43)

"Read your book, only yourself at this time is your reckoner (Al Israa': 17: 14)

"those who, when a disaster strikes them, say: "Inna lillaahi wa innaa ilaihi raaji'uun" (Indeed, we belong to Allah and to Him we return)(Al Baqarah: 2: 156)

"...so We brought out various kinds of fruits because of the rain. Like that We raised the dead..." (Al A'raaf: 7: 57)

In an effort to reveal the greatness of Allah SWT regarding Muslims in the world study the bacteria that opens the pathway for Allah's spirit to come out of dead human body, the author uses the basis of deoxyribonucleic acid (DNA).

HYPOTHESES

Here the author proposes hypothesis Muslims in the world study the bacteria that opens the pathway for Allah's spirit to come out of dead human body, based on deoxyribonucleic acid (DNA).

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a storage place for genetic information that has a double structure forms a double helix and contains structured polynucleotide macromolecules repeatedly from nucleotide polymers. This nucleotide consists of folate, a 5 carbon sugar and one of the nitrogen bases. Nitrogen bases are

Guanine (G), Adenine (A), Cytocine © and Thymine (T).

Guanine (G) consists of 5 carbon atoms, 5 nitrogen atoms, 1 nitrogen atom oxygen and 5 hydrogen atoms. Adenine (A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

Based on human deoxyribonucleic acid (DNA), it consists of 32.20% atoms carbon, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms. Where Carbon, nitrogen, oxygen and hydrogen atoms are widely available around us and in atmosphere. These atoms are the raw materials for making humans, animals, fungi, amoeba, plants, bacteria and archaea.

MUSLIMS IN THE WORLD STUDY THE BACTERIA THAT OPENS THE PATH FOR THE SPIRIT OF ALLAH OUT OF THE BODY OF DEAD HUMAN

So now, we still continue to focus our minds on uncovering the secrets contained behind the verses: *"...We have created human from...the soil (Al Mu'minuun: 23: 12)"* *"We made the earth gather together (Al Mursalaat: 77: 25)"* *"the living and the dead (Al Mursalaat: 77: 26)"* *"...they came out of their graves as quickly as if they had gone immediately to idols (Al Ma'aarij: 70: 43)"*

Well, here Allah declares: *"...We have created human from...the soil (Al Mu'minuun: 23: 12)"* *"...they came out of their graves as quickly...(Al Ma'aarij: 70 : 43)"* *"We made the earth gather together (Al Mursalaat: 77: 25)"* *"the living and the dead (Al Mursalaat: 77: 26)"*

Well, it turns out, based on Allah's declaration, *"...the earth...(Al Mursalaat: 77: 25)"* is the place where humans are born, where humans live, and the place where humans die.

So, in fact, paradise and hell exist on our *"...earth...(Al Mursalaat: 77: 25)"*. Because *"...the earth gathers (Al Mursalaat: 77: 25)"* *"the living and the dead (Al Mursalaat: 77: 26)"*

So now, what happens to the human body that dies and is buried in the ground?

The answer is in the secret behind the verse: *"...We brought out various kinds of fruits because of the rain. Like that We raised the dead...(Al A'raaf: 7: 57)"*

Well, in reality, a few minutes after a human dies, the body temperature drops according to the temperature of the surrounding environment. Where body temperature drops on average 1.5-2 degrees every hour. The blood in the body begins to become cold, clots, stops, and prevents the muscles from being able to contract. Every muscle in the body, from the eyelids to the large muscles, becomes inflexible and the joints remain in place, the entire body becomes stiff. A few minutes after the heart stops, oxygen levels in the body begin to run low, cells self-destruct, caused by the body's enzymes.

Loss of all color is caused when blood cells begin to break away from the blood vessels, then gravity pulls them into smaller blood vessels and capillaries. As a result, the color changes in certain areas of the body. The changing color of the body occurs gradually and in line with the destruction process in the body, green, blue, red, purple and finally black appear.

Putrefaction occurs when blood vessels and tissue are damaged. Gas and fluid build up and bubble, causing the body to become swollen in certain areas. For example, the eyeballs are pushed out slightly or the tongue slowly comes out of the mouth. Then the swelling is most visible in the

abdomen. Billions of billions of bacteria play a role in the process of decomposing a dead body.

The entire body essentially becomes liquid, about a month after death, the organs and large vessels within it become solid. When enough fluid has accumulated the body becomes cracked. This is a breeding ground for billions of billions of bacteria.

In this decay process, carbon atoms and oxygen atoms form carbon dioxide. Then carbon dioxide is absorbed by plants and converted into oxygen and glucose through the process of photosynthesis with the help of sunlight, water and chloroplasts. Chloroplasts are found in the green parts of plants. Where glucose is used as a food ingredient by plants, while oxygen atoms are inhaled by humans and animals.

In this process of decay, the dead human body turns into ammonia. Next, this ammonia is converted into nitrite by nitrosoma bacteria. Then nitrite is converted into nitrate by nitrobacter bacteria. Finally, nitrate goes through a denitrification process turns back into nitrogen and rises into the atmosphere.

Now the situation in the grave is the secret behind the verses: *"...the earth gathers (Al Mursalaat: 77: 25)"...the dead (Al Mursalaat: 77: 26).*

Now *"...my spirit...(Shaad : 38: 72)* or *"...Allah's spirit...(Shaad : 38: 72)* which is built with hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms, and also the building blocks of dead human bodies come back out and gather around us and some rise up into the atmosphere.

Well *"...my spirit...(Shaad : 38: 72)* or *"...Allah's spirit...(Shaad : 38: 72)"...come out of the grave quickly...(Al Ma' aarij : 70: 43)* to face Allah and receive Allah's decision *"Read your book, only yourself at this time is your reckoner (Al Israa': 17: 14)*

Well, the picture of *"...my spirit...(Shaad : 38: 72)* or *"...Allah's spirit...(Shaad : 38: 72)* which is built with hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms, and also what becomes the building material for the dead human body comes back out of the dead human body which was declared by Allah *"...We brought out various kinds of fruits because of the rain. Like that We raised the dead...(Al A'raaf: 7: 57)*

This is the secret of Allah, regarding life, death and human life *"...Inna lillaahi wa innaa ilaihi raaji'uun" (Indeed, we belong to Allah and to Him we return)(Al Baqarah: 2: 156)*

Well *"...to Him we return (Al Baqarah: 2: 156)* refers to human formed with *"...my spirit...(Shaad : 38: 72)* or *"...Allah's spirit...(Shaad : 38: 72)* which is built with hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms, where hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms are formed with quarks, quarks are formed with Allah's energy.

So actually, because everything that exists in the universe was built through Allah's energy and anything that was created in the universe after reaching the age of **10 000000000 000000000 000000000 000000000 000000000 000000000 000000000 000000000 000000000** years will return to Allah's energy, because of the nuclear energy that binds quarks in the atom disappear, returning to Allah's energy.

Well, this is the real secret of Allah about *"... Indeed, we belong to Allah and to Him we return(Al Baqarah: 2: 156)*

CONCLUSION

From what is explained above, it can be concluded that the secrets contained behind the verses: *"...We have created human from...the soil (Al Mu'minuun: 23: 12)"* *"We made the earth gather together (Al Mursalaat: 77: 25)"* *"the living and the dead (Al Mursalaat: 77: 26)"* *"...they came out of their graves as quickly as if they had gone immediately to idols (Al Ma'aarij: 70: 43)"*

Well, here Allah declares: *"...We have created human from...the soil (Al Mu'minuun: 23: 12)"* *"...they came out of their graves as quickly...(Al Ma'aarij: 70 : 43)"* *"We made the earth gather together (Al Mursalaat: 77: 25)"* *"the living and the dead (Al Mursalaat: 77: 26)"*

Well, it turns out, based on Allah's declaration, *"...the earth...(Al Mursalaat: 77: 25)"* is the place where humans are born, where humans live, and the place where humans die.

So, in fact, paradise and hell exist on our *"...earth...(Al Mursalaat: 77: 25)"*. Because *"...the earth gathers (Al Mursalaat: 77: 25)"* *"the living and the dead (Al Mursalaat: 77: 26)"*

So now, what happens to the human body that dies and is buried in the ground?

The answer is in the secret behind the verse: *"...We brought out various kinds of fruits because of the rain. Like that We raised the dead...(Al A'raaf: 7: 57)"*

Well, in reality, a few minutes after a human dies, the body temperature drops according to the temperature of the surrounding environment. Where body temperature drops on average 1.5-2 degrees every hour. The blood in the body begins to become cold, clots, stops, and prevents the muscles from being able to contract. Every muscle in the body, from the eyelids to the large muscles, becomes inflexible and the joints remain in place, the entire body becomes stiff. A few minutes after the heart stops, oxygen levels in the body begin to run low, cells self-destruct, caused by the body's enzymes.

Loss of all color is caused when blood cells begin to break away from the blood vessels, then gravity pulls them into smaller blood vessels and capillaries. As a result, the color changes in certain areas of the body. The changing color of the body occurs gradually and in line with the destruction process in the body, green, blue, red, purple and finally black appear.

Putrefaction occurs when blood vessels and tissue are damaged. Gas and fluid build up and bubble, causing the body to become swollen in certain areas. For example, the eyeballs are pushed out slightly or the tongue slowly comes out of the mouth. Then the swelling is most visible in the abdomen. Billions of billions of bacteria play a role in the process of decomposing a dead body.

The entire body essentially becomes liquid, about a month after death, the organs and large vessels within it become solid. When enough fluid has accumulated the body becomes cracked. This is a breeding ground for billions of billions of bacteria.

In this decay process, carbon atoms and oxygen atoms form carbon dioxide. Then carbon dioxide is absorbed by plants and converted into oxygen and glucose through the process of photosynthesis with the help of sunlight, water and chloroplasts. Chloroplasts are found in the green parts of plants. Where glucose is used as a food ingredient by plants, while oxygen atoms are inhaled by humans and animals.

In this process of decay, the dead human body turns into ammonia. Next, this ammonia is converted into nitrite by nitrosoma bacteria. Then nitrite is converted into nitrate by nitrobacter bacteria. Finally, nitrate goes through a denitrification process turns back into nitrogen and rises into the

atmosphere.

Now the situation in the grave is the secret behind the verses: *"...the earth gathers (Al Mursalaat: 77: 25)"...the dead (Al Mursalaat: 77: 26).*

Now *"...my spirit...(Shaad : 38: 72)* or *"...Allah's spirit...(Shaad : 38: 72)* which is built with hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms, and also the building blocks of dead human bodies come back out and gather around us and some rise up into the atmosphere.

Well *"...my spirit...(Shaad : 38: 72)* or *"...Allah's spirit...(Shaad : 38: 72)"...come out of the grave quickly...(Al Ma' aarij : 70: 43)* to face Allah and receive Allah's decision *"Read your book, only yourself at this time is your reckoner (Al Israa': 17: 14)*

Well, the picture of *"...my spirit...(Shaad : 38: 72)* or *"...Allah's spirit...(Shaad : 38: 72)* which is built with hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms , and also what becomes the building material for the dead human body comes back out of the dead human body which was declared by Allah *"...We brought out various kinds of fruits because of the rain. Like that We raised the dead...(Al A'raaf: 7: 57)*

This is the secret of Allah, regarding life, death and human life *"...Inna lillaahi wa innaa ilaihi raaji'uun" (Indeed, we belong to Allah and to Him we return)(Al Baqarah: 2: 156)*

Well *"...to Him we return (Al Baqarah: 2: 156)* refers to human formed with *"...my spirit...(Shaad : 38: 72)* or *"...Allah's spirit...(Shaad : 38: 72)* which is built with hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms, where hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms are formed with quarks, quarks are formed with Allah's energy.

So actually, because everything that exists in the universe was built through Allah's energy and anything that was created in the universe after reaching the age of **10 00000000 000000000 000000000 000000000 000000000 000000000 000000000 000000000 000000000** years will return to Allah's energy, because of the nuclear energy that binds quarks in the atom disappear, returning to Allah's energy.

Well, this is the real secret of Allah about *"... Indeed, we belong to Allah and to Him we return(Al Baqarah: 2: 156)*
