ABSTRACT

Before the author writes about soil contains hydrogen atom, carbon atom, nitrogen atom, oxygen atom making humans alive, most Muslims do not understand, first the author asks forgiveness from Allah SWT. Here the author tries to open the veil that covers the secret about soil contains hydrogen atom, carbon atom, nitrogen atom, oxygen atom making humans alive, most Muslims do not understand, based on deoxyribonucleic acid (DNA).

There are several verses that reveal Allah's secret about soil contains hydrogen atom, carbon atom, nitrogen atom, oxygen atom making humans alive, most Muslims do not understand, namely the following verses:

"And indeed We created human from an essence of soil. (Al Mu'minuun: 23: 12).

"Then He perfected and breathed into Adam His spirit and made for you hearing, sight, heart, you are very little, be grateful. (As Sajdah: 32: 9).

In an effort to uncover the secret of Allah about soil contains hydrogen atom, carbon atom, nitrogen atom, oxygen atom making humans alive, most Muslims do not understand, the author uses the basis of deoxyribonucleic acid.

HYPOTHESES

Here the author proposes hypothesis soil contains hydrogen atom, carbon atom, nitrogen atom, oxygen atom making humans alive, most Muslims do not understand, based on Deoxyribonucleic acid (DNA)

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a storage place for genetic information that has a double structure forms a double helix and contains structured polynucleotide macromolecules repeatedly from nucleotide polymers. This nucleotide consists of folate, a 5 carbon sugar and one of the nitrogen bases. Nitrogen bases are Guanine (G), Adenine(A), Cytocine(C) and Thymine (T).

Guanine (G) consists of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine (A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

Based on human deoxyribonucleic acid (DNA), it consists of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms, and 35.59% hydrogen atoms. Where carbon, nitrogen,

oxygen and hydrogen atoms are abundant around us and in the atmosphere.

SOIL CONTAINS HYDROGEN ATOM, CARBON ATOM, NITROGEN ATOM, OXYGEN ATOM MAKING HUMANS ALIVE, MOST MUSLIMS DON'T UNDERSTAND

Now, we are still concentrating on uncovering the secrets contained behind the verses: *"...We created human from an essence of soil (Al Mu'minuun: 23: 12).*

Well, it turns out that *"...soil (Al Mu'minuun: 23: 12)* is the source for the creation of *"...human...(Al Mu'minuun: 23: 12).*

Now, the question arises, what is in *"...soil (Al Mu'minuun: 23: 12)* that it becomes the source for the creation of *"...human...(Al Mu'minuun: 23: 12)?*

The answer is in the secret behind the verse: *"...He...breathed...His spirit and He made for you hearing, sight and heart...(As Sajdah: 32: 9).* Well, apparently, *"...hearing, sight and heart...(As Sajdah: 32: 9)* originate from *"...His spirit...(As Sajdah: 32: 9)* or *"...Allah's spirit...(As Sajdah: 32: 9).*

Or in other words *"...hearing, sight and heart...(As Sajdah: 32: 9)* is formed by Deoxyribonucleic acid (DNA), which contains hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms. Where Deoxyribonucleic acid (DNA) forms chromosomes that are in cells.

Now it is revealed that actually in *"...soil (Al Mu'minuun: 23: 12)* contains hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms.

Therefore, in the human body contains **70000000000 000000000 000000000** atoms, including hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms.

So, human live because Allah *"...breathed...His spirit...(As Sajdah: 32: 9).*

"...His spirit...(As Sajdah: 32: 9) or *"...Allah's spirit...(As Sajdah: 32: 9)* forms Deoxyribonucleic acid (DNA) where Deoxyribonucleic acid (DNA) forms chromosomes that are in cells.

So actually, human live through *"...His spirit...(As Sajdah: 32: 9)* or *"...Allah's spirit...(As Sajdah: 32: 9)* which forms Deoxyribonucleic acid (DNA).

Or it can also be said that humans live because they are built with hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms and other atoms.

Where hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms and other atoms will live until the age of **10 000000000 000000000 000000000 000000000 000000000 000000000 000000000 000000000** years.

Now this is what is still not understood by Muslims in the world.

CONCLUSION

Based on the explanation above, we can conclude that the secrets contained behind the verses: *"...We created human from an essence of soil (Al Mu'minuun: 23: 12).*

Well, it turns out that *"...soil (Al Mu'minuun: 23: 12)* is the source for the creation of *"...human...(Al Mu'minuun: 23: 12).*

Now, the question arises, what is in "...soil (Al Mu'minuun: 23: 12) that it becomes the source for the creation of "...human...(Al Mu'minuun: 23: 12)?

The answer is in the secret behind the verse: "...He...breathed...His spirit and He made for you hearing, sight and heart...(As Sajdah: 32: 9). Well, apparently, "...hearing, sight and heart...(As Sajdah: 32: 9) originate from "...His spirit...(As Sajdah: 32: 9) or "...Allah's spirit...(As Sajdah: 32: 9).

Or in other words "...hearing, sight and heart...(As Sajdah: 32: 9) is formed by Deoxyribonucleic acid (DNA), which contains hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms. Where Deoxyribonucleic acid (DNA) forms chromosomes that are in cells.

Now it is revealed that actually in "...soil (Al Mu'minuun: 23: 12) contains hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms.

Therefore, in the human body contains **70000000000 000000000 000000000** atoms, including hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms.

So, human live because Allah "...breathed...His spirit...(As Sajdah: 32: 9).

"...His spirit...(As Sajdah: 32: 9) or "...Allah's spirit...(As Sajdah: 32: 9) forms Deoxyribonucleic acid (DNA) where Deoxyribonucleic acid (DNA) forms chromosomes that are in cells.

So actually, human live through "...His spirit...(As Sajdah: 32: 9) or "...Allah's spirit...(As Sajdah: 32: 9) which forms Deoxyribonucleic acid (DNA).

Or it can also be said that humans live because they are built with hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms and other atoms.

Where hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms and other atoms will live until the age of **10 000000000 000000000 000000000 000000000 000000000 000000000 000000000 000000000 000000000** years.

Now this is what is still not understood by Muslims in the world.
