ABSTRACT

Before the author writes about the Mahsyar field, a place where Allah's spirit gathers on another earth, another star and another sky, the author first asks forgiveness from Allah SWT. Here the author tries to open the veil covering the secrets of the Mahsyar field, a place where Allah's spirit gathers on another earth, another star and another sky, based on deoxyribonucleic acid (DNA).

There are several verses that reveal Allah's secret about the Mahsyar field, a place where Allah's spirit gathers on another earth, another star and another sky, namely the following verses:

"So when I have perfected the events of Adam and breathed into Adam my spirit, then you will fall down with prostrate to him." (Shaad: 38: 72).

"When the sun is rolled up (At Takwiir: 81: 1).

"So He made them seven skys in two ages. He revealed in each sky his affairs. And We decorated the nearby sky with brilliant stars and We looked after them as well as possible. That is the decree of the Almighty, the All-Knowing. (Fushshilat : 41:12).

"On the day the earth was replaced by another earth and the sky, and they all gathered to face the presence of Allah, the Almighty. (Ibrahim : 14: 48).

In an effort to reveal God's secret about the Mahsyar field, a place where Allah's spirit gathers on another earth, another star and another sky, the author relies on deoxyribonucleic acid.

HYPOTHESIS

Here the author proposes hypothesis the Mahsyar field, a place where Allah's spirit gathers on another earth, another star and another sky, based on Deoxyribonucleic acid (DNA).

PHOTON

Photon is an elementary particle of the boson type and a carrier of electromagnetic interactions.

QUARK

If we want to know about quarks, we look at one of the hydrogen atoms that are the building blocks of the human body, animals, plants and fruits, and inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Next, if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with gluons.

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a place to store genetic information that has a double structure that forms a double helix and

which contains polynucleotide macromolecules which is composed of repeating nucleotide polymers. These nucleotides are composed of folate, a 5-carbon sugar and one of the nitrogen bases. The nitrogen bases are Guanine (G), Adenine (A), Cytocin (C) and Thymine (T).

Guanine (G) consists of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine (A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytosine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. As for 5-carbon sugar, it has 5 carbon atoms, 2 nitrogen atoms and 6 hydrogen atoms. oxygen and 8 hydrogen atoms.

Based on human deoxyribonucleic acid (DNA), it consists of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms, and 35.59% hydrogen atoms. Where the Carbon atom, Nitrogen, oxygen and hydrogen are abundant around us and in the atmosphere.

THE MAHSYAR FIELD, A PLACE WHERE ALLAH'S SPIRIT GATHERS ON ANOTHER EARTH, ANOTHER STAR AND ANOTHER SKY

So now, we are still concentrating our minds on uncovering the secret contained behind the verse: *"When the sun is rolled up (At Takwiir: 81: 1) "On the day the earth was replaced by another earth and the sky, and they all gathered to face the presence of Allah, the Almighty. (Ibrahim : 14: 48).*

It turns out that here Allah declares: *"...the earth is replaced by another earth...(Ibrahim: 14: 48)* as well as *"...the sky... (Ibrahim: 14: 48)* is replaced with another sky, *"...the sun is rolled up (At Takwiir: 81: 1).*

Now, the question arises,

What does Allah mean by *"...the sun is rolled up (At Takwiir: 81: 1)?*

The answer is,

When the sun runs out of hydrogen and helium atom fuel, the sun will die.

When will the hydrogen and helium atom fuel run out?

Around **4600000000** years to come.

When the sun dies, the earth and other planets that orbit the sun will also die.

Well, when the earth and other planets that orbit the sun die, then Allah will replace *"...the earth...by another earth...(Ibrahim: 14: 48)* also *"...the sky...(Ibrahim: 14: 48)* replaced by another sky

"...the sky...(Ibrahim: 14: 48) is a stretch of space above which there is the sun, earth and other planets.

Now, the question arises,

Where will Allah gather humans in the form of *"...my spirit...(Shaad: 38: 72)* or *"...Allah's spirit...(Shaad: 38: 72)* which is built with hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms, since Adam, approximately **236000** years ago, which is already in paradise and which is already in hell?

The answer is, stored in the secret behind the verse: *"When the sun is rolled up (At Takwiir: 81: 1) On the day the earth was replaced by another earth and the sky, and they all gathered to face the presence of Allah, the Almighty. (Ibrahim : 14: 48).*

Well, it turns out *"...my spirit...(Shaad: 38: 72)* or *"...Allah's spirit...(Shaad: 38: 72)* comes out of the body of a dead human *"When the sun is rolled up (At Takwiir: 81: 1)* and when *"...the earth is replaced by another earth...(Ibrahim: 14: 48)* and *"...my spirit...(Shaad: 38: 72)* or *"...Allah's spirit...(Shaad: 38: 72)* which is already in paradise *"You will enter paradise, you and your wives will be happy (Zukhruf: 43: 70)* and those who are already in hell *"Allah says: "You all enter hell together with the jinn and humans who were before you...(Al A'raaf: 7: 38),* you will be gathered in one place called the Mahsyar field.

Well, the Mahsyar field is located on *"...another earth and (another) sky...(Ibrahim: 14: 48).*

So now, the question arises again,

Where is *"...another earth and (another) sky...(Ibrahim: 14: 48)?*

Well, *"...another earth and (another) sky...(Ibrahim : 14: 48)* are in the Milky Way galaxy.

In *"...the near sky...(Fushshilat : 41: 12)* there are **100 000 000 000** galaxies, each galaxy consists of **150 100 000** stars.

Well, in the Milky Way galaxy there are **150 100 000** stars including the sun, earth, moon.

Well, because the sun runs out of hydrogen atom fuel and helium atoms, the sun will die, about **4600 000 000** years to come. When the sun dies, the earth and other planets that orbit the sun will also die.

Now, because *"...my spirit...(Shaad: 38: 72)* or *"...Allah's spirit...(Shaad: 38: 72)* which is built with hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms will live up to **10 0000000000 000000000 000000000 000000000 000000000 000000000 000000000 000000000 000000000 000000000** years, then it is necessary to find *"...another earth and (another) sky...(Ibrahim: 14: 48)* which are still alive in the Milky Way galaxy.

Well, of course, because in the Milky Way galaxy there are still many stars surrounded by planets that are still alive, then all *"...my spirit...(Shaad: 38: 72)* or *"...Allah's spirit...(Shaad: 38: 72)* which is built with hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms that are on the dead earth will be transferred to another planet or *"...another earth...(Ibrahim: 14: 48)* that is still alive which revolves around another star or another sun. Well, on *"...another earth...(Ibrahim: 14: 48)* this, all *"...my spirit...(Shaad: 38: 72)* or *"...Allah's spirit...(Shaad: 38: 72)* which is built with hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms will be gathered *"...to face the presence of Allah, the Almighty. (Ibrahim : 14: 48).*

So now, if there are Islamic scholars throughout the world who think that human bodies that come out of their graves are collected in the Mahsyar field on this earth, then the assumption of Islamic scholars throughout the world is very wrong. Why ?

Because, what will live in the mahsyar field is *"...my spirit...(Shaad: 38: 72)* or *"...Allah's spirit...(Shaad: 38: 72)* which is built with hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms will live up to **10 0000000000 000000000 000000000 000000000 000000000 000000000 000000000 000000000 000000000 000000000** years, not humans who have bodies like bodies when they were still alive on earth consisting of bones, flesh and blood.

Well, this is the secret of Allah that is still not understood by almost all Muslims in the world.

CONCLUSION

Based on the description above, we can conclude that the secret contained behind the verse: *"When the sun is rolled up (At Takwiir: 81: 1) "On the day the earth was replaced by another earth and the sky, and they all gathered to face the presence of Allah, the Almighty. (Ibrahim : 14: 48).*
