## ABSTRACT

Before the author writes about the residents of paradise are the atoms that form cell network, the author first asks forgiveness from Allah SWT. Here the author tries to open the veil that covers the secrets about the residents of paradise are the atoms that form cell network, based on Deoxyribonucleic acid (DNA).

There are several verses that reveal Allah's secrets about the residents of paradise are the atoms that form cell network, namely the following verses:

*"So when I have perfected the life of Adam and breathed into Adam my spirit, then you will fall down and prostrate to him." (Shaad: 38: 72).*

*"And there are nymphs with jelly eyes (Al Waaqi'ah: 56: 22).*

*"Indeed, We created them directly (Al Waaqi'ah: 56: 35).*

*"And the residents of paradise cried out to the residents of hell: "Indeed, we have truly obtained what our God promised us. So have you actually obtained what your God promised?" They answered: "Yes." Then a caller announced between the two groups: "Allah's curse is on the wrongdoers, (Al A'raaf: 7: 44).*

*"In paradise there is plenty of fruit for you, some of which you may eat. (Az Zukhruf: 43: 73).*

*"Indeed, those who believe and do righteous deeds, they are guided by their God because of their faith, beneath them rivers flow in paradise full of pleasure. (Yunus: 10: 9).*

In an effort to uncover Allah's secret about the residents of paradise are the atoms that form cell network, the author uses the basis of deoxyribonucleic acid.

## HYPOTHESIS

Here the author proposes hypothesis the residents of paradise are the atoms that form cell network, based on Deoxyribonucleic acid (DNA)

## PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interactions.

## QUARKS

If we want to know quarks then we pay attention to one of the hydrogen atoms which is a building element of the human body, animals, plants and fruit as well as inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Next, if this proton is split, we will find two up quarks and one down quark. Where these three quarks are combined with a gluon.

## DEOXYRIBONUCLIC ACID (DNA)

DNA is a storehouse of genetic information that has a double structure that forms a double helix and contains polynucleotide macromolecules which are composed repeatedly of nucleotide polymers. This nucleotide consists of folate, a 5-carbon sugar and one of the nitrogen bases. The nitrogen bases are Guanine (G), Adenine (A), Cytosine (C) and Thymine (T).

Guanine (G) consists of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytosine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

Based on human deoxyribonucleic acid (DNA), it consists of 32.20% atoms carbon, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms. Where Carbon, nitrogen, oxygen and hydrogen atoms are widely available around us and in atmosphere.

## THE RESIDENTS OF PARADISE ARE THE ATOMS THAT FORM CELL NETWORK

Now, we are still focusing our minds on uncovering the secrets contained behind the verses: *"...nymphs with jelly eyes (Al Waaqi'ah: 56: 22)"...We created them directly (Al Waaqi' ah: 56: 35)"...the residents of paradise cried out to the residents of hell...(Al A'raaf: 7:44)"In paradise there is plenty of fruit for you, some of which you may eat (Az Zukhruf: 43: 73) "...paradise full of pleasure (Yunus: 10: 9)*

Apparently, Allah has described to humans, that Allah *"...created nymphs directly (Al Waaqi' ah: 56: 35)* in paradise.

Now, the question arises, why did Allah *"...created nymphs directly (Al Waaqi' ah: 56: 35)* without a time process?

The answer is

Hidden in the secret behind the verse: *"...I breathed into Adam my spirit...(Shaad: 38: 72).*

Well, in paradise the living is *"...my spirit...(Shaad : 38: 72)* or *"...Allah's spirit...(Shaad : 38: 72).*

So, because in paradise *"...my spirit...(Shaad : 38: 72)* or *"...Allah's spirit...(Shaad : 38: 72)* consists of an arrangement of hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atom, then Allah easily *"... created the nymphs directly (Al Waaqi'ah: 56: 35).*

*"...my spirit...(Shaad : 38: 72)* or *"...Allah's spirit...(Shaad : 38: 72)* which has a network of atoms that make up the cell is used to communicate with *"...Allah's spirit...(Shaad : 38: 72),* either *"...Allah's spirit...(Shaad : 38: 72)* who is in paradise or who is in hell *"...the residents of paradise cried out to the residents of hell...(Al A'raaf: 7:44).*

So, actually, *"...Allah's spirit...(Shaad : 38: 72)* does not require a large network of atoms to form a cell network, as the cell network in the human brain, which reaches **65 00000000** cell.

*"...Allah's spirit...(Shaad : 38: 72)* in paradise does not require much use of the mind, everything is already available. Because it does not need to have a lot of cell network.

Now *"... in paradise full of pleasures (Yunus: 10: 9)* is a pleasure that never ends.

So, because *"...enjoyment (Yunus: 10: 9)* that never ends, there is no need to look for *"...enjoyment (Yunus: 10: 9)* that, everything is already available

Why are all *"...enjoyments (Yunus: 10:9)* already available?

Because life in paradise is only for *"...Allah's spirit...(Shaad: 38:72)* which has no body, not like the human body that lives on earth.

In the world, human consisting of **7 000000000 000000000 000000000** atoms make up the cells of the body, while in paradise, the atoms in *"...Allah's spirit...(Shaad: 38:72)* only form cells which is not the body.

So, because *"...Allah's spirit...(Shaad: 38:72)* does not have a body, then there is no impulse or desire for lust like human who live in the world.

Therefore, in paradise *"...a pleasure (yusnus: 10:9)* that has no end. Whereas in the world, human must seek pleasure.

Now, it has been revealed, *"...Allah's spirit...(Shaad: 38:72)* does not require many atoms to form a cell network, therefore, the atoms that come out of the human body that dies, are mostly reused by Allah to create a new creature.

Or in other words, the atoms that come out of the bodies of deceased humans are reincarnated as new creatures.

## CONCLUSION

From what is explained above, it can be concluded that the secrets contained behind the verses: *"...nymphs with jelly eyes (Al Waaqi'ah: 56: 22)"...We created them directly (Al Waaqi' ah: 56: 35)"...the residents of paradise cried out to the residents of hell...(Al A'raaf: 7:44)"In paradise there is plenty of fruit for you, some of which you may eat (Az Zukhruf: 43: 73) "...paradise full of pleasure (Yunus: 10: 9)*

Apparently, Allah has described to humans, that Allah *"...created nymphs directly (Al Waaqi' ah: 56: 35)* in paradise.

Now, the question arises, why did Allah *"...created nymphs directly (Al Waaqi' ah: 56: 35)* without a time process?

The answer is

Hidden in the secret behind the verse: *"...I breathed into Adam my spirit...(Shaad: 38: 72).*

Well, in paradise the living is *"...my spirit...(Shaad : 38: 72)* or *"...Allah's spirit...(Shaad : 38: 72).*

So, because in paradise *"...my spirit...(Shaad : 38: 72)* or *"...Allah's spirit...(Shaad : 38: 72)* consists of an arrangement of hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atom, then Allah easily *"... created the nymphs directly (Al Waaqi'ah: 56: 35).*

*"...my spirit...(Shaad : 38: 72)* or *"...Allah's spirit...(Shaad : 38: 72)* which has a network of atoms that make up the cell is used to communicate with *"...Allah's spirit...(Shaad : 38: 72),* either *"...Allah's spirit...(Shaad : 38: 72)* who is in paradise or who is in hell *"...the residents of paradise cried out to the*

*residents of hell...(Al A'raaf: 7:44).*

So, actually, "...Allah's spirit...(Shaad : 38: 72) does not require a large network of atoms to form a cell network, as the cell network in the human brain, which reaches **65 000000000** cell.

"...Allah's spirit...(Shaad : 38: 72) in paradise does not require much use of the mind, everything is already available. Because it does not need to have a lot of cell network.

Now "... in paradise full of pleasures (Yunus: 10: 9) is a pleasure that never ends.

So, because "...enjoyment (Yunus: 10: 9) that never ends, there is no need to look for "...enjoyment (Yunus: 10: 9) that, everything is already available

Why are all "...enjoyments (Yunus: 10:9) already available?

Because life in paradise is only for "...Allah's spirit...(Shaad: 38:72) which has no body, not like the human body that lives on earth.

In the world, human consisting of **7 000000000 000000000 000000000** atoms make up the cells of the body, while in paradise, the atoms in "...Allah's spirit...(Shaad: 38:72) only form cells which is not the body.

So, because "...Allah's spirit...(Shaad: 38:72) does not have a body, then there is no impulse or desire for lust like human who live in the world.

Therefore, in paradise "...a pleasure (yusnus: 10:9) that has no end. Whereas in the world, human must seek pleasure.

Now, it has been revealed, "...Allah's spirit...(Shaad: 38:72) does not require many atoms to form a cell network, therefore, the atoms that come out of the human body that dies, are mostly reused by Allah to create a new creature.

Or in other words, the atoms that come out of the bodies of deceased humans are reincarnated as new creatures.
