ABSTRACT

Before the author writes about the seven skies are balanced reflected by human, the author first asks forgiveness from Allah SWT. Here the author tries to open the veil that covers the secret of the seven skies are balanced reflected by human, from the perspective of deoxyribonucleic acid (DNA).

There are several verses that reveal Allah's secret about the seven skies are balanced reflected by human, namely the following verses:

"Who has created the seven skies in layers. You never see in the creation of the Most Gracious God anything that is not balanced. So look over and over again, do you see anything that is not balanced? (Al Mulk: 67: 3).

Allah said: "O Adam, tell them the names of these things." So after he told them the names of these objects, Allah said: "Have I not told you that I know the secrets of the heavens and the earth and know what they are. what you give birth to and what do you hide?" (Al Baqarah: 2:33).

"And there is no power of the devil over them, but only that We may distinguish those who believe in the existence of the Hereafter from those who doubt about it. And your God is the Preserver of all things. (Saba': 34:21).

In an effort to open the veil of Allah's secret about the seven skies are balanced reflected by human, I use the basis of deoxyribonucleic acid.

HYPOTHESIS

Here I propose the hypothesis the seven skies are balanced reflected by human, base on Deoxyribonucleic acid (DNA).

PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interactions.

QUARK

If we want to know quarks, then we consider one of the hydrogen atoms that are the building blocks of the human body, animals, plants and fruits as well as inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Then if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with gluons.

DEOXYRIBONUCLIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that forms a double helix and contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide consists of folate, a 5-carbon sugar and one of the nitrogenous bases. The

nitrogenous bases are Guanine (G), Adenine (A), Cytosine (C) and Thymine (T).

Guanine (G) consists of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytosine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. A 5-carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

Based on Deoxyribonucleic acid (DNA) humans are composed of 32.20% atoms carbon, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms. Where carbon, nitrogen, oxygen and hydrogen atoms are widely available around us and in atmosphere.

THE SEVEN SKIES ARE BALANCED REFLECTED BY HUMAN

Now, we are still concentrating on uncovering the secrets contained behind the verses: *"Who has created the seven skies in layers. You never see in the creation of the Most Gracious God anything that is not balanced....(Al Mulk : 67: 3).*

Apparently, here Allah has declared, humans are a reflection of Allah's form which describes the balance of the seven skies, why?

Because, human were created after Allah created *"... the seven skies in layers... (Al Mulk: 67: 3)* angel, jinn, devil, satan.

Man was created last by Allah so that Allah's form is reflected by human which represents the balance of the seven skies.

Why is the balance of the seven skies reflected by human?

The answer is,

Hidden in the secret behind the verse: *"Allah said: "O Adam, tell them the names of these things."... he told them the names of these objects... (Al Baqarah: 2: 33).*

Here it is clearly illustrated, that human have the freedom of thought, to study what Allah has created, so that when Allah ordered Adam to tell about the seven skies and all their contents, Adam easily told the angel, jinn, devil, satan.

By making human as a picture of the seven skies that are *"... balanced... (Al Mulk: 67: 3)*, then human must be shaped by two forces, one leading to good and the other leading to evil.

Well, this is where angel appear on the one hand and satan, devil on the other. Because according to Allah's declaration about satan, devil *"...there is no power of devil over them, but only that We may distinguish those who believe in the existence of the Hereafter from those who doubt about it...(Saba': 34:21).*

That is, so that Allah can see whether human is *"...balanced...(Al Mulk: 67:3)* or have fallen far into the abyss of ugliness.

So, what really happens in the seven skies, then look at human himself. Because human is a reflection of Allah's form that describes the balance of the seven skies.

That is, if human in his lives is not *"... balanced... (Al Mulk: 67: 3)* then of course there will be no balance of the seven skies. The seven skies will be destroyed, just as human life is destroyed.

CONCLUSION

Based on the description above, we can conclude that the secrets contained behind the verses: *"Who has created the seven skies in layers. You never see in the creation of the Most Gracious God anything that is not balanced....(Al Mulk : 67: 3).*

Apparently, here Allah has declared, humans are a reflection of Allah's form which describes the balance of the seven skies, why?
