ABSTRACT

Before the author writes about the spirit of our deceased ancestors, getting rewards through YDNA, MTDNA, which are in our body, the author first asks forgiveness from Allah SWT. Here the author tries to open the veil that covers the secret of the spirit of our deceased ancestors, getting rewards through YDNA, MTDNA, which are in our body, based on Deoxyribonucleic acid (DNA).

There are several verses that reveal Allah's secret about the spirit of our deceased ancestors, getting rewards through YDNA, MTDNA, which are in our body, namely the following verses:

"So when I have perfected the existence of Adam and have breathed into Adam My spirit, then you will bow to Adam by prostrating (Al Hijr: 15: 29).

"Then He perfected and breathed into Adam His spirit and He made for you hearing, sight and hearts, you are very little grateful. (As Sajdah: 32: 9).

"So Mary lifted a veil from them, then We sent Our spirit to Mary, so Our spirit incarnated before Mary a perfect human (Maryam: 19: 17).

"Do not think that those who fall in the way of Allah are dead, they live by their God's side by getting sustenance. (Ali 'Imran : 3: 169).

In an effort to uncover Allah's secret about the spirit of our deceased ancestors, getting rewards through YDNA, MTDNA, which are in our body, the author uses deoxyribonucleic acid.

HYPOTHESIS

Here the author proposes hypothesis the spirit of our deceased ancestors, getting rewards through YDNA, MTDNA, which are in our body, based on Deoxyribonucleic acid (DNA).

PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interactions.

QUARK

If we want to know quarks, then we consider one of the hydrogen atoms that is the building block of the human body, animals, plants and fruits and inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Then if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with gluons.

DEOXYRIBONUCLIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that forms a double helix and contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide consists of folate, a 5-carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytosine (C) and Thymine (T).

Guanine (G) consists of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytosine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. A 5-carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

Based on Deoxyribonucleic acid (DNA) humans are composed of 32.20% atoms carbon, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms. Where carbon, nitrogen, oxygen and hydrogen atoms are widely available around us and in atmosphere.

THE SPIRITS OF OUR DECEASED ANCESTORS, GETTING REWARDS THROUGH YDNA, MTDNA, WHICH ARE IN OUR BODY

Now, we continue to focus our minds to uncover the secrets contained behind the verses: "***Do not think that those who fall in the way of Allah are dead, they live by their God's side...(Ali 'Imran : 3: 169)***" ... ***I...breathed into Adam My spirit...(Al Hijr: 15: 29)***.

It turns out, Allah has declared "***Do not think that those who fall in the way of Allah are dead, they live by their God's side...(Ali 'Imran : 3: 169)***."

Well, it turns out, Allah has clearly made a declaration, that in fact humans "***...do not die...they are alive... (Ali 'Imran: 3: 169)***."

Now the question arises,

Why did Allah declare that humans "***...do not die...they are alive... (Ali 'Imran: 3: 169)***?"

Well, the answer is in the secret behind the verse: "***...I...breathed into Adam My spirit...(Al Hijr: 15: 29)***."

So, because "***...My spirit...(Al Hijr: 15: 29)***" or "***...Allah's spirit...(Al Hijr: 15: 29)***" which is in the human body, humans do not die.

Another question arises,

What exactly is meant by all humans in the world, humans will die?

The answer is because all human body functions, starting from the function of the heart to the function of the nerves are no longer working. Finally the entire human body dies.

Well, now, because the human body is built by 7 0000000000 000000000 000000000 atoms, then what is called the human body is a building of atoms, hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms and other atoms that form bones and flesh.

So, when the bones and flesh that make up the human body are no longer functioning, then

7 000000000 000000000 000000000 atoms including "...My spirit...(Al Hijr: 15: 29) or "...Allah's spirit...(Al Hijr: 15: 29) that is in the human body comes out of the body.

Now when Allah declares humans "...do not die...they are alive...(Ali 'Imran: 3: 169) refers to "...My spirit...(Al Hijr: 15: 29) or "...Allah's spirit...(Al Hijr: 15: 29) which is built with hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms that will live up to the age of 10 000000000 000000000 000000000 000000000 000000000 000000000 000000000 000000000 000000000 years.

Now, because "...My spirit...(Al Hijr: 15: 29) or "...Allah's spirit...(Al Hijr: 15: 29) which is built with hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms that will live up to the age of 10 000000000 000000000 000000000 000000000 000000000 000000000 000000000 000000000 000000000 years.

Now, because "...My spirit...(Al Hijr: 15: 29) or "...Allah's spirit...(Al Hijr: 15: 29) which is built with hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms will live for billions of billions of billions of billions of years, then Allah declares humans "...do not die...they are alive...(Ali 'Imran: 3: 169).

Well it turns out, because "...My spirit...(Al Hijr: 15: 29) or "...Allah's spirit...(Al Hijr: 15: 29) which is built with hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms has existed since the beginning of the creation of the universe, then in fact humans have existed together with the first time the universe was created.

Now the question arises,

Is it true that our ancestors live in our bodies?

Well, the answer lies in the secret behind the verse: "...He...breathed into Adam of His spirit and made for you hearing, sight and heart...(As Sajdah: 32: 9).

Well, it is now revealed that the actual source of the formation of "...hearing, sight and heart...(As Sajdah: 32: 9) is "...His spirit...(As Sajdah: 32: 9) or "...Allah's spirit...(As Sajdah: 32: 9).

Or it can also be said, the source of the formation of "...hearing, sight and heart...(As Sajdah: 32: 9) is hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms.

Or in other words, the source of the formation of "...hearing, sight and heart... (As Sajdah: 32: 9) is Deoxyribonucleic acid (DNA), based on human Deoxyribonucleic acid (DNA) consists of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms.

Where DNA is in blood, flesh, bones, sperm, saliva, egg, sweat, hair and throughout the human body.

So, because Deoxyribonucleic acid (DNA) has existed since the beginning of the universe was created, then Deoxyribonucleic acid (DNA) is in every human body, in every animal body, in plants, in fungi, in bacteria, in amoeba, in viruses.

Or it can be said that the DNA that is in our ancestors' bodies is in our bodies.

That is, YDNA is passed down from the father to the son and daughter, but only the son passes down YDNA, which continues until now and beyond.

Likewise, mitochondrial DNA is passed down from the mother to the daughter and to the son, but only the daughter passes down mitochondrial DNA, which continues until now.

So actually in our body there is *"...Allah's spirit...(As Sajdah: 32: 9)* in the form of YDNA and mitochondrial DNA that comes from our ancestors.

Well, it turns out that the spirits of our ancestors, who have died, get rewards through YDNA, MTDNA, which are in our bodies.

This means that hundreds of thousands of years ago, the spirits of our ancestors, who have died, were in YDNA, MTDNA, which are in our bodies. The spirits of our ancestors, who have died, get rewards through YDNA, MTDNA, which are in our bodies.

Or in other words, the spirits of our ancestors, who have died, live in paradise which is in our bodies.

Paradise is in our bodies on this earth. Paradise is not only under the soles of the mother's feet, but also in the body of the father and in the body of the mother.

Well, most Muslims in the world still don't understand this.

CONCLUSION

From what is explained above, it can be concluded that the secrets contained behind the verses: *"Do not think that those who fall in the way of Allah are dead, they live by their God's side...(Ali 'Imran : 3: 169)* *"... I...breathed into Adam My spirit...(Al Hijr: 15: 29).*
