ABSTRACT

Before I write down the problem, there are still many people who do not realize when praying to Allah in a high and loud voice, even though Allah is very close, in humans, first I ask forgiveness from Allah SWT. Here I try to open the veil that hides the secret that there are still many humans who do not realize when praying to Allah with a high and loud voice, even though Allah is very close, within humans, from the point of view of the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

There are several verses that are Allah's secret unlocking tools about there are still many people who do not realize when praying to Allah with a high and loud voice, even though Allah is very close, within humans, namely the following verses:

"Allah... the light of the skys and the earth... the light upon the light... (An Nuur: 24: 35)

"So when I have perfected the event and have breathed into it my spirit; then you should fall down prostrating to him." (Shaad: 38: 72)

"So when I have perfected the event, and have breathed into it my spirit, then submit to it prostrating yourself (Al Hijr: 15: 29)

"Then He perfected and breathed into it His spirit and He made for you hearing, sight and heart; you are very little grateful. (As Sajdah: 32: 9)

"And if We made the apostle an angel, We would certainly have made him a man and, of course We would have doubted about them what they doubted about themselves (Al An'aam: 6:9)

"Praise be to Allah, the Creator of the heavens and the earth, Who made the angels as messengers with wings, two, three and four respectively. Allah adds to His creation what He wills. Verily, Allah has power over all things. (Faathir: 35:1)

"Pray to your Lord with humility and a soft voice. Verily Allah does not like those who transgress (Al A'raaf: 7: 55)

Say: "Who can save you from calamities on land and at sea, whom you pray to Him humbly with a soft voice saying: "If He had saved us from this, surely we would be a grateful people." ." (Al An'am: 6: 63)

"Establish prayer from after the sun has slipped until it is dark at night and at dawn. Verily, the dawn prayer is witnessed. (Al Israa ': 17: 78)

"Indeed, for you there is a watcher." (Al-Infithaar: 82:10)

"But Allah acknowledges the Qur'an which He has revealed to you. Allah has sent it down with His knowledge; and the angels are witnesses. It is enough for Allah to acknowledge it. (An Nisaa ': 4: 166)

"And it is not possible for any human being that Allah can speak with him except by means of revelation or behind a veil or by sending a messenger and then it is revealed to him with His permission what He wills. Verily, He is Most High, Most Wise. (Ash Shuura: 42: 51)

"And verily We have created man and know what his heart whispers, and We are nearer to him than his jugular vein." (Qaf: 50:16)

"And when My servants ask you about Me, then, that I am near. I grant the supplication of those who pray when they ask Me, then let them fulfill (all My commands) and let them believe in - Me, that they may always be in the truth (Al Baqarah: 2: 186)

"He is the First and the Last, the Outward and the Inward; and He is All-Knowing of all things. (Al Hadid: 57:3)

"Moses said: "God is in control of the east and the west and what is between them: if you use reason." (Ash Syu'araa': 26: 28)

"And We made a wall before them and behind them a wall, and We covered them so that they could not see." (Yaasiin: 36:9)

In an effort to open the veil of Allah's secret about there are still many people who do not realize when praying to Allah in a high and loud voice, even though Allah is very close, in humans, I use the basis of deoxyribonucleic acid or deoxyribonucleic acid or the molecular structure of nucleic acids.

HYPOTHESIS

Here I propose a human hypothesis when praying to Allah does not need to be in a high and loud voice, because Allah is very close, within humans, from the point of view of Deoxyribonucleic acid (DNA).

PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interactions.

QUARK

If we want to know quarks, then we consider one of the hydrogen atoms that are the building blocks of the human body, animals, plants and fruits as well as inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Then if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with gluons.

DEOXYRIBONUCLIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that forms a double helix and contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide consists of folate, a 5-carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytosine (C) and Thymine (T).

Guanine (G) consists of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytosine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms. 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1

phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. A 5-carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

MANY PEOPLE STILL PRAY TO ALLAH WITH A HIGH AND LOUD VOICE, BUT ALLAH IS VERY NEAR, IS WITHIN HUMANS

Now, we are still concentrating on uncovering the secrets contained behind the verse: *"Pray to your Lord with humility and a soft voice. Indeed, Allah does not like those who transgress (Al A'raaf: 7: 55)*

It turns out that here Allah has described to humans that when praying to Allah, it is not necessary to have a high and loud voice.

Why did Allah declare when praying to Allah "...with humility and a soft voice...(Al A'raaf: 7: 55) ?

The answer is

Hidden in the secret behind the verse: *"...that I am near. I grant the supplication of the one who prays when he asks Me...(Al Baqarah: 2: 186) "... We are closer to him than his jugular vein." (Qaf: 50:16) "...I have...blowed into it my spirit...(Al Hijr: 15:29)*

Well, it turns out that Allah is very close, in humans, through "... my spirit... (Al Hijr: 15: 29) which has been blown "...into... (Al Hijr: 15: 29) human self.

So, actually humans do not need to be in a high and loud voice when praying to Allah, but pray *"...with humility and a soft voice... (Al A'raaf: 7: 55)* because Allah is very near, more closer *"...than the jugular vein..." (Qaf: 50:16)* humans.

WHY DO MANY PEOPLE STILL PRAY TO ALLAH HIGHLY AND LOUDLY PLUS WITH LOUDERS

Now, the question arises,

Why do many people still pray to Allah in a high and loud voice?

The answer is

Hidden in the secret behind the verse: *"Moses said: "God is in control of the east and the west and what is between them: if you use reason." (Asy Syu'araa ': 26: 28)*

Well, because there are still many people who do not *"...use mind." (Asy Syu'araa': 26: 28)* to be used to explore Allah who is *"...near...(Al Baqarah: 2: 186) "...closer...than the jugular vein..." (Qaf: 50:16)* humans, so most people when praying with a high and loud voice, it is as if Allah is above the sky.

CONCLUSION

Based on the description above, we can conclude that the secrets contained behind the verse: *"Pray to your Lord with humility and a soft voice. Indeed, Allah does not like those who transgress (Al A'raaf: 7: 55)*

It turns out that here Allah has described to humans that when praying to Allah, it is not necessary to have a high and loud voice.

Why did Allah declare when praying to Allah "...with humility and a soft voice...(Al A'raaf: 7: 55) ?

The answer is

Hidden in the secret behind the verse: **"...that I am near. I grant the supplication of the one who prays when he asks Me...(Al Baqarah: 2: 186) "... We are closer to him than his jugular vein." (Qaf: 50:16) "...I have...blowed into it my spirit...(Al Hijr: 15:29)**

Well, it turns out that Allah is very close, in humans, through **"... my spirit... (Al Hijr: 15: 29)** which has been blown **"...into... (Al Hijr: 15: 29)** human self.

So, actually humans do not need to be in a high and loud voice when praying to Allah, but pray **"...with humility and a soft voice... (Al A'raaf: 7: 55)** because Allah is very near, more closer **"...than the jugular vein..." (Qaf: 50:16)** humans.

Now, the question arises,

Why do many people still pray to Allah in a high and loud voice?

The answer is

Hidden in the secret behind the verse: **"Moses said: "God is in control of the east and the west and what is between them: if you use reason." (Asy Syu'araa ': 26: 28)**

Well, because there are still many people who do not **"...use mind." (Asy Syu'araa': 26: 28)** to be used to explore Allah who is **"...near...(Al Baqarah: 2: 186) "...closer...than the jugular vein..." (Qaf: 50:16)** humans, so most people when praying with a high and loud voice, it is as if Allah is above the sky.
