ABSTRACT

Before the author writes about there is no unseen, that exists, the limited human eye vision, the author first asks forgiveness from Allah SWT. Here the author tries to open the veil that covers the secret of there is no unseen, that exists, the limited human eye vision, based on deoxyribonucleic acid (DNA).

There are several verses to reveal Allah's secret about there is no unseen, that exists, the limited human eye vision, namely the following verses:

"Allah is the light of the sky and the earth...light above light, Allah guides to His light whom He wills...(An Nuur: 24: 35)

"Then He perfected and breathed into Adam His spirit and He made for you hearing, sight and heart, you are very few, grateful. (As Sajdah: 32: 9)

"So when I have perfected the life of Adam and breathed into Adam my spirit, then you will fall down and prostrate to him." (Shaad: 38: 72)

"And We put a wall before them and behind them a wall, and We closed them so that they could not see. (Yaasiin : 36: 9)

"Indeed, you only give warnings to those who want to follow the warnings and who fear God, the Most Gracious, even though they do not see God. So give them good news with forgiveness and a noble reward. (Yaasiin : 36: 11)

In an effort to open the veil covering Allah's secret about there is no unseen, that exists, the limited human eye vision, the author uses the basis of deoxyribonucleic acid.

HYPOTHESES

Here the author proposes hypothesis there is no unseen, that exists, the limited human eye vision, based on Deoxyribonucleic acid (DNA)

PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interactions.

QUARKS

If we want to know quarks then we pay attention to one of the hydrogen atoms which is a building element of the human body, animals, plants and fruit as well as inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Next, if this proton is split, we will find two up quarks and one down quark. Where these three quarks are combined with a gluon.

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a storage place for genetic information that has a double structure forms a double helix and contains structured polynucleotide macromolecules repeatedly from nucleotide polymers. This nucleotide consists of folate, a 5 carbon sugar and one of the nitrogen bases. Nitrogen bases are Guanine (G), Adenine(A), Cytocine(C) and Thymine (T).

Guanine (G) consists of 5 carbon atoms, 5 nitrogen atoms, 1 nitrogen atom oxygen and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

Based on human deoxyribonucleic acid (DNA), it consists of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms. Where carbon, nitrogen, oxygen and hydrogen atoms are found in abundance around us and in the atmosphere.

THERE IS NO UNSEEN, THAT EXISTS, THE LIMITED HUMAN EYE VISION

So now, we still continue to focus our minds on uncovering the secrets contained behind the verses: *"...We put a wall before them and behind them a wall, and We closed them so that they could not see. (Yaasiin : 36: 9)*

Now here, the unseen secret is revealed, where Allah declares that, human eyes are limited, as described *"...We put a wall before them and behind them a wall, and We closed them so that they could not see. (Yaasiin : 36: 9)*

Well, from what Allah has declared, it turns out that human vision is limited, because *"...before them and behind them a wall, and We closed them...(Yaasiin: 36: 9)*

So now, what does Allah really mean *"...We put a wall before them and behind them a wall, and We closed them so that they could not see. (Yaasiin : 36: 9)* ?

Well, *"...they couldn't see. (Yaasiin : 36: 9)*, why?

Because the human eye can only see light in the electromagnetic spectrum area between 430 and 740 nanometers.

This means that light in the electromagnetic spectrum area below 430 nanometers and light in the electromagnetic spectrum area above 740 nanometers is called unseen.

For example, the sunlight that we enjoy every day is in the electromagnetic spectrum area between 430 and 740 nanometers. So the human eye can see sunlight. Therefore sunlight is not unseen.

If there is light in the electromagnetic spectrum area below 430 nanometers or light in the electromagnetic spectrum area above 740 nanometers, then the human eye cannot see it.

Now, human *"...cannot see God...(Yaasiin: 36: 11)*, because the human eye can only see light in the electromagnetic spectrum area between 430 and 740 nanometers.

Well, the question arises,

Is it because the human eye can only see light in the electromagnetic spectrum area between 430 and 740 nanometers, that Allah is said to be unseen?

Well, actually, Allah is not unseen, anything in the universe is not unseen.

So what is called unseen, refers to the human eye being able to only see light in the electromagnetic spectrum area between 430 and 740 nanometers.

Well, also in Allah's declaration "*Allah is the light of the sky and the earth...light above light...* (An Nuur: 24: 35)

Well, "*...light above light...* (An Nuur: 24: 35)

This means that light in the electromagnetic spectrum above 740 nanometers cannot be seen by the human eye.

For example, radio waves (radiowaves) are located in the electromagnetic spectrum area of 1 centimeter to 1 kilometer.

Also microwaves are located in the electromagnetic spectrum area between 100 micrometers and 1 centimeter.

Likewise, infrared rays are located in the electromagnetic spectrum area between 740 nanometers to 100 micrometers.

Likewise, light in the electromagnetic spectrum below 430 nanometers cannot be seen by the human eye.

For example, ultra violet rays are located in the 10 to 100 nanometer region of the electromagnetic spectrum.

X rays are located in the 0.05 to 10 nanometer region of the electromagnetic spectrum.

Gamma rays are located in the area of the electromagnetic spectrum which is formed at a wavelength between 0.00001 to 0.05 nanometers.

So, because there are different areas of the electromagnetic spectrum of light rays, the human eye cannot see those rays.

Well, this is what is called humans "*...cannot see God...(Yaasiin: 36: 11)*.

In fact, Allah is not unseen, if humans understand "*...my spirit...(Shaad: 38: 72)* or "*...Allah's spirit...(Shaad: 38: 72)*

As declared by Allah "*...I breathed into Adam my spirit...(Shaad : 38: 72)*

Well, "*...my spirit...(Shaad: 38: 72)* or "*...Allah's spirit...(Shaad: 38: 72)* is a building of deoxyribonucleic acid (DNA). Human DNA consists of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms.

So, if humans understand "*...my spirit...(Shaad: 38: 72)* or "*...Allah's spirit...(Shaad: 38: 72)*, then the unseen Allah will be transformed into invisible and we can study, understand and explore it through

deoxyribonucleic acid (DNA) which contains "...my spirit...(Shaad: 38: 72) or "...Allah's spirit...(Shaad: 38: 72) which consists of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms.

CONCLUSION

Based on the description above we can conclude that the secrets contained behind the verses: "...We put a wall before them and behind them a wall, and We closed them so that they could not see. (Yaasiin : 36: 9)

Now here, the unseen secret is revealed, where Allah declares that, human eyes are limited, as described "...We put a wall before them and behind them a wall, and We closed them so that they could not see. (Yaasiin : 36: 9)
