ABSTRACT

Before I write down the problem of understanding Allah's form, starting from the smallest, almost nothing, to being wider than the seven skys, I first ask forgiveness from Allah SWT. Here I try to open the veil that covers the secret of understanding Allah's form from the smallest to almost nothing, to the vastness of the seven skys, from the point of view of the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

There are several verses that become Allah's secret unlocking tool about understanding Allah's form, starting from the smallest, almost nothing, to being wider than the seven skys, namely the following verses:

"Allah... the light of the skys and the earth... the light upon the light... (An Nuur: 24: 35)

"So when I have perfected the event and have breathed into it my spirit; then you should fall down prostrating to him." (Shaad: 38: 72)

"So when I have perfected the event, and have breathed into it my spirit, then submit to it prostrating yourself (Al Hijr: 15: 29)

"Then He perfected and breathed into it His spirit and He made for you hearing, sight and heart; you are very little grateful. (As Sajdah: 32: 9)

"And if We made the apostle an angel, We would certainly have made him a man and, of course We would have doubted about them what they doubted about themselves (Al An'aam: 6:9)

"Praise be to Allah, the Creator of the heavens and the earth, Who made the angels as messengers with wings, two, three and four respectively. Allah adds to His creation what He wills. Verily, Allah has power over all things. (Faathir: 35:1)

"But Allah acknowledges the Qur'an which He has revealed to you. Allah has sent it down with His knowledge; and the angels are witnesses. It is enough for Allah to acknowledge it. (An Nisaa': 4: 166)

"And it is not possible for any human being that Allah can speak with him except by means of revelation or behind a veil or by sending a messenger and then it is revealed to him with His permission what He wills. Verily, He is Most High, Most Wise. (Ash Shuura: 42: 51)

"And verily We have created man and know what his heart whispers, and We are nearer to him than his jugular vein." (Qaf: 50:16)

"And when My servants ask you about Me, then, that I am near. I grant the supplication of those who pray when they ask Me, then let them fulfill (all My commands) and let them believe in - Me, that they may always be in the truth.(Al Baqarah: 2:186)

"He is the First and the Last, the Outward and the Inward; and He is All-Knowing of all things. (Al Hadid: 57:3)

"And when We said to the angels: "Prostrate to Adam," then they bow down except Satan; he is reluctant and arrogant and is one of the disbelievers. (Al Baqarah: 2:34)

"He arranges affairs from the skys to the earth, then they ascend to Him in one day whose measure is a thousand years according to your reckoning (As Sajdah: 32: 5)

"Angels and spirits ascend to God in a day whose measure is fifty thousand years." (Al Ma'aarij: 70:4)

"Who has created the seven skys in layers. You never see in the creation of the Most Gracious God anything that is not balanced. So look over and over again, do you see anything that is not balanced? (Al Mulk: 67: 3)

"It is He who made the earth a bed for you and the sky a roof, and He sends down water from the sky, then He produces with it all the fruit as a sustenance for you; therefore do not establish partners with Allah, while you know. Al Baqarah : 2:22)

"And to Allah belongs the east and the west, so wherever you turn there is the face of Allah. Verily Allah is All-Encompassing, All-Knowing. (Al Baqarah: 2:115)

"And We made a wall before them and behind them a wall, and We covered them so that they could not see." (Yaasiin: 36:9)

In an effort to open the veil of Allah's secret about understanding Allah's existence from the smallest to almost nothing, to the vastness of the seven skys, I use the basis of deoxyribonucleic acid or deoxyribonucleic acid or the molecular structure of nucleic acids.

HYPOTHESIS

Here I propose a hypothesis of the overall form of Allah, starting from the smallest, almost non-existent, to being wider than the seven skys, from the point of view of Deoxyribonucleic acid (DNA).

PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interactions.

QUARK

If we want to know quarks, then we consider one of the hydrogen atoms that are the building blocks of the human body, animals, plants and fruits as well as inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Then if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with gluons.

DEOXYRIBONUCLIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that forms a double helix and contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide consists of folate, a 5-carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytosine (C) and Thymine (T).

Guanine (G) consists of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms.

Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytosine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. A 5-carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

ALLAH'S FORM IS BALANCED WITH ALLAH'S ENERGY USED TO CREATE SEVEN SKYS AND ALL THERE IN THERE

Now, we are still focusing our minds on uncovering the secrets contained behind the verse: *"... You never see in Allah's creation...something that is not balanced. So look over and over again, do you see anything out of balance? (Al Mulk: 67: 3)*

It turns out, anything created by Allah is *"... balanced (Al Mulk: 67: 3)*

This means that the energy of Allah used by Allah's form is balanced, adapted to the multiplied movement or the doubled speed.

Humans think, walk, talk requires energy that is balanced with the human form adjusted to the movement of the movement or the way of thinking.

Now, Allah's energy, starting from the smallest energy that is almost non-existent to a very large and vast energy, is bigger and wider than the seven heavens.

WHEN HUMANS SAY ALLAHU AKBAR, THEN THE IMAGE IN HUMAN'S MIND IS ALLAH'S ENERGY FROM THE SMALLEST TO THE BIGGEST, BIGGER THAN SEVEN SKYS

Now, let's uncover the secret hidden behind the verse: *"Angels and spirits ascend to God in a day whose levels are fifty thousand years (Al Ma'aarij: 70:4)*

Apparently, here Allah has declared that the speed used by Allah when having intercourse with his creatures, such as angels, is calculated with the speed of light, is 5 475 103 664 604.84 km per second.

Where the speed is the result of calculating the speed of light according to human calculations 299792.458 km multiplied by the speed according to Allah's calculations 18262980 times the speed of light according to human calculations. (18262980 x 299792.458 = 5475103664604.84 km per second)

ALLAH'S ENERGY AND ALLAH'S MINIMUM EVENT, THAT NEARLY EXISTS

Well, when humans say Allahu Akbar, then what is imagined in the human mind is the smallest, almost non-existent energy of Allah, namely

0.0000000000 0000000000 0000000000 01 gram per cubic cm

The almost non-existent form of Allah, namely

0.0000000000 0000000000 0000000000 0000000000 0000000000 0000000000 0000000000 000 333 591 754 209 188 9 grams

Then, the speed of Allah's form which reaches 5475103664604.84 km per second

ALLAH'S ENERGY AND ALLAH'S FORM IS BIGGER AND WIDEER THAN SEVEN SKYS

Well, it turns out, when humans say Allahu Akbar, what is imagined in the human mind, how is the very small form of Allah that almost does not exist with Allah's energy which is almost non-existent, but Allah's form has a speed of 5475103664604.84 km per second

Until how much the energy of Allah and the form of Allah, the Great and Expansive, is greater and wider than the size and breadth of the seven skys

ALLAH'S ENERGY AND ALLAH'S FORM IS EVERYWHERE INCLUDING THE HUMAN BODY

Now, with the speed of Allah's form of 5475103664604.84 km per second, "*...wherever you face there is Allah's face... (Al Baqarah: 2: 115)*

That is, where the human eye is directed, then there is already a form of Allah.

So, when humans say Allahu Akbar, it is not just a sound coming out of the mouth, but it is already embedded in the human mind, how great and great and fast is the energy of Allah and the form of Allah.

ALLAH'S ENERGY AND ALLAH'S FORM CAN BE SEEN AND FEEL IN THE HUMAN BODY

Well, "*... my spirit... (Shaad: 38: 72)* which is built with hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms, is in the human body.

Or in other words, the existence of Allah is found through hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms. Where these atoms are in the human body, and everywhere in the seven heavens and their contents.

The human body is made up of about 70 000000000 000000000 000000000 atoms.

Because the energy of Allah and the form of Allah cannot be separated, the energy of Allah in the human body will also be found in the form of Allah. When humans stand, sit, walk, run, think, talk, it is all because of the energy of Allah and the form of Allah.

So, when humans stand, sit, walk, run, think, talk, those are all images of the energy of Allah and the form of Allah emitted through the human body.

Then the energy of Allah that makes humans move and think comes from the food eaten by humans.

Where food itself is the result of rain falling, where rainwater is a combination of hydrogen atoms and oxygen atoms "*...He sends down water from the sky, then He produces with that rain all the fruits as sustenance for you.. (Al Baqarah: 2:22)*

So, actually, in the human body is found the energy of Allah and the form of Allah.

CONCLUSION

Based on the description above, we can conclude that the secrets contained behind the verse: *"... You never see in Allah's creation...something that is not balanced. So look over and over again, do you see anything out of balance? (Al Mulk: 67: 3)*

It turns out, anything created by Allah is *"... balanced (Al Mulk: 67: 3)*
