ABSTRACT

Before I write down the problem of what Allah really means, paradise which is as wide as the skys and the earth, I first ask forgiveness from Allah SWT. Here I try to open the veil that covers the secret of what Allah really means, a paradise as wide as skys and earth, from the point of view of the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

There are several verses that serve as tools for revealing Allah's secrets about what Allah really means, paradise which is as wide as the skys and the earth, namely the following verses:

"Allah... the light of the skys and the earth... the light upon the light... (An Nuur: 24: 35)

And hasten to forgiveness from your Lord and to Paradise, whose breadth is as wide as the skys and the earth, which is prepared for the pious (Ali 'Imran: 3: 133)

"It is He Who created the heavens and the earth in six days: Then He resides on the Throne. He knows what enters the earth and what comes out of it and what descends from the heavens and what ascends to Him. And He is with you in wherever you are. And Allah is All-Seeing of what you do. (Al Hadid: 57:4)

"And verily We have created the heavens and the earth and what is between them in six days, and We are not in the least afflicted with fatigue. (Qaf: 50: 38)

"And it is not possible for any human being that Allah can speak to him except by means of revelation or behind a veil or by sending a messenger and then it is revealed to him with His permission what He wills. Indeed, He is Most High, Most Wise. (Ash Syuura: 42:51)

"When I have perfected the event, and have breathed into it my spirit, then submit to it prostrating yourselves (Al Hijr: 15:29)

"And We made a wall before them and behind them a wall, and We covered them so that they could not see." (Yaasiin: 36:9)

"And verily We have created man and know what his heart whispers, and We are nearer to him than his jugular vein." (Qaf: 50:16)

"And to Allah belongs the east and the west, so wherever you turn there is the face of Allah. Verily Allah is All-Encompassing, All-Knowing. (Al Baqarah: 2:115)

"... We made the apostle an angel... We made him a man... (Al An'aam: 6: 9)

"The angels and Gabriel ascended to God in a day the measure of which was fifty thousand years (Al Ma'aarij: 70:4)

"What if the angels take their lives while beating their faces and their backs? (Muhammad: 47:27)

"Allah holds the soul when it dies and the soul that has not died in its sleep; so He holds the soul

which He has appointed death and He releases another soul until the appointed time. Verily in that are signs of Allah's power for a people who think (Az Zumar: 39:42)

"The day Allah gathers you on the day of gathering, that is the day your faults will be revealed. And whoever believes in Allah and does righteous deeds, Allah will cover his faults and admit them to Jannah under which rivers flow, they will abide therein forever. . That is the great fortune.(At Taghaabun : 64: 9)

"Then He perfected and breathed into him His spirit and He made for you hearing, sight, and heart; you are very little grateful." (As Sajdah: 32: 9)

In an effort to open the veil of Allah's secret about what Allah really means, a paradise as wide as the skys and the earth, I use the basis of deoxyribonucleic acid or deoxyribonucleic acid or the molecular structure of nucleic acids.

HYPOTHESIS

Here I propose the hypothesis that paradise, which is as wide as the skys and the earth, is located on our earth, from the point of view of Deoxyribonucleic acid (DNA).

DEOXYRIBONUCLIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that forms a double helix and contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide consists of folate, a 5-carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytosine (C) and Thymine (T).

Guanine (G) consists of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytosine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. A 5-carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

REALLY THE EARTH IS IN THE SKY

Now, we are still focusing our minds on uncovering the secrets contained behind the verse: *"It is He who created the skys and the earth in six times... (Al Hadid: 57: 4)*

It turns out that Allah has declared that Allah *"... created the skys and the earth... (Al Hadid: 57: 4)*

Now, the question arises,

Where exactly is the earth, and where is the sky?

The answer is

"...the sky...(Al Hadiid: 57:4) is a room *"...which...the earth...(Al Hadiid: 57:4)* is above it.

That is, the earth is above the expanse of space, which is called the sky. If humans say on earth the same as humans say in the sky.

So, actually, what is meant by Allah by *"...paradise which is as wide as the skys and the earth...(Ali*

'Imran: 3: 133) is that heaven is on our earth.

Or in other words, wherever there is a place on earth, there is paradise. Where humans are buried, there is paradise in that place.

Why, humans can not see paradise where humans are buried?

The answer is hidden in the secret behind the verse: *"...We made a wall before them and behind them a wall, and We covered them so that they could not see."* (*Yaasiin: 36:9*)

That is, Allah has put *"...a veil...(Asy Syuura: 42:51)* between Allah and humans. Because the human eye's view is limited, where humans can only see light in the electromagnetic spectrum region between 430 and 740 nanometers. Beyond that, the human eye cannot see light.

That is, because the human eye cannot see light outside the electromagnetic spectrum region between 430 and 740 nanometers, the human eye sees this area as an unseen area.

PARADISE CAN NOT BE SEEN BY HUMAN EYES

Well, as well as paradise where humans are buried, the human eye cannot see paradise, because paradise is located outside the electromagnetic spectrum region between 430 and 740 nanometers.

So, now it has been revealed that what is meant by Allah *"...paradise which is as wide as the skys and the earth...(Ali 'Imran: 3: 133)* is to prove that paradise is on our earth. Where there are people buried, there is a place of paradise.

MY SPIRIT COMING OUT FROM THE BURIED HUMAN BODY

Now, Allah has described *"Allah holds the soul when it dies...He endures the soul He has decreed for death...(Az Zumar: 39:42)*

Well *"...the soul...(Az Zumar: 39: 42)* which is held by Allah is *"... my spirit...(Al Hijr: 15: 29)* which Allah *"... has blown into. ..(Al Hijr: 15: 29)* human body.

MY SPIRIT IS IN PARADISE

Well, Allah has declared *"... whoever believes in Allah and does good deeds, Allah will surely... enter him into Jannah under which rivers flow, they will abide therein... (At Taghaabun: 64:9)*

Apparently, the inhabitants of heaven are *"...eternal...(At Taghaabun: 64: 9)*

That is, the inhabitants of paradise live eternally in paradise, because *"... my spirit... (Al Hijr: 15: 29)* that comes out of buried humans who live in paradise.

Well, because *"... my spirit... (Al Hijr: 15: 29)* that lives in paradise, then the human eye cannot see *"... my spirit... (Al Hijr: 15: 29)*

Where *"...my spirit...(Al Hijr: 15: 29)* is built by oxygen atoms, hydrogen atoms, carbon atoms and nitrogen atoms. Where these atoms can not be seen by the human eye, because the atoms are outside the electromagnetic spectrum region between 430 and 740 nanometers.

Now, it has been revealed that in fact *"...paradise whose breadth is as wide as the skys and the earth...(Ali 'Imran: 3: 133)* is its place on our earth today. Only the human eye cannot see it, because there is

already a "...veil...(Asy Syuura: 42:51) between paradise and humans who are still living on our earth today.
