ABSTRACT

First of all, by asking forgiveness from Allah SWT here I am trying to reveal the signs of Allah SWT's greatness regarding Allah's secret about, what is actually meant by Allah, the vastness of paradise between sky and earth, which sky, based on photons, quarks and molecular structures nucleic acid or deoxyribonucleic acid (DNA)

In the Qur'an, several verses are found that are the key to unlocking the secret of what Allah really means, the vastness of paradise between sky and earth, which sky, namely the verses:

"And hasten to forgiveness from your Lord and to Paradise, whose breadth is as wide as the heavens and the earth, which is prepared for those who are pious." (Ali 'Imran: 3:133)

"And between the two there is a boundary; and above A'raaf there are people who know each of the two groups by their signs. And they call out to the people of Paradise: "Salaamun 'alaikum." They have not yet entered it, while they want it immediately (Al A'raaf: 7: 46)

"Allah promises the believers, male and female, Paradise under which rivers flow, they will abide therein, there are good places in Paradise 'Adn. And Allah's pleasure is greater; that is great fortune. (At Taubah: 9:72)

"Indeed Allah will admit those who believe and do righteous deeds into Paradises beneath which rivers flow. In Paradise they will be adorned with gold and pearl bracelets, and their clothes will be silk. (Al Hajj) :22:23)

"Glory be to Him who, if He willed, He would have made for you something better than this, gardens beneath which rivers flow, and He made for you palaces. (Al-Furqaan: 25:10)

"And give good tidings to those who believe and do good, that for them are provided gardens with rivers flowing in them. Every time they are given sustenance of fruit in those paradises, they say: "This is what was given to them. us first." They are given similar fruits and for them are pure wives and they will abide therein (Al Baqarah: 2:25)

"So when I have perfected the event, and have breathed into it my spirit, then submit to it prostrating yourself (Al Hizr: 15: 29)

"Who has created the seven heavens in layers. You never see in the creation of the Most Gracious God anything that is not balanced. So look over and over again, do you see anything that is not balanced? (Al Mulk: 67: 3)

"Allah holds the soul when it dies and the soul that has not died in its sleep; so He holds the soul which He has appointed death and He releases another soul until the appointed time. Verily in that are signs of Allah's power for a people who think (Az Zumar : 39: 42)

"And when the spirits are met (At Takwiir: 81: 7)

"Say: "O Allah, Creator of the skys and the earth, Who knows the unseen and the real, You are the One who decides between Your servants what they always argue about." (Az Zumar : 39: 46)

In an effort to open the veil about Allah's secret about what Allah really means, the vastness of paradise between skys and earth, which sky, I based on photons, quarks and deoxyribonucleic acid or the molecular structure of nucleic acids.

HYPOTHESIS

Here the author proposes hypothesis the broad of paradise between skys and earth is heaven is on our earth today, based on photons, quarks and deoxyribonucleic acid or deoxyribonucleic acid or the molecular structure of nucleic acids.

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that forms a double helix and which contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide is composed of folate, a 5 carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytocine (C) and Thymine (T).

Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

WHAT DOES ALLAH REALLY MEAN, PARADISE IS AS WIDE AS BETWEEN SKYS AND EARTH

Now we continue to focus our minds on revealing the secrets that are hidden behind the verse: ***"...paradise whose breadth is as wide as the heavens and the earth... (Ali 'Imran: 3: 133)***

Well, it turns out that paradise is actually above a stretch of room (or what is called the sky) where the earth and other planets are above it. Or in other words, the area of the room or sky above which there is the earth and other planets.

So, actually what is meant by Allah is that ***"...paradise...as wide as the sky and the earth...(Ali 'Imran: 3: 133)*** is that heaven is above the room as the earth is above it.

Now, because Allah has declared that ***"...paradise whose breadth is as wide as the skys and the earth... (Ali 'Imran: 3: 133)*** means that heaven is in our sky today which is visible to the human eye.

But, now, Allah ***"...has created seven skys in layers...(Al Mulq: 67:3)***, where 1 sky, namely the sky where humans are now is the sky that can be seen by the human eye. Then The other 6 skys are translucent skies, meaning that the human eye cannot see them.

Well, because between one sky and another sky interact or touch each other, the transparent sky can come into contact with our sky which can be seen by the human eye.

So, the paradise hat exist in the sky and earth, can come into contact with the sky that is translucent

to the human eye.

IF PARADISE IS ABOVE THE EXPANSION OF THE SPACE, THERE IS EARTH NOW, THEN PARADISE CAN BE SEEN AND FEEL BY HUMANS

Now, let's unveil the secret that is hidden in the secret behind the verse: *"...paradise beneath which rivers flow, and He made palaces for you. (Al Furqaan: 25:10)*

Well, it turns out that here Allah has declared that in paradise there are *"...rivers...palaces. (Al Furqaan: 25:10)*

That is, in this paradise there is water which consists of hydrogen and oxygen atoms, there are also palaces which contain hydrogen atoms, oxygen atoms and carbon atoms.

Or in other words, paradise is in the expanse of space where the earth is above.

Thus, the paradise described by Allah *"...paradise beneath which rivers flow, and he made palaces for you. (Al Furqaan: 25:10)* is there is an expanse of space on our earth today.

This means that paradise can be seen and heard, if humans know the vibrations of the frequency of light reflected by paradise.

Well, now it's been revealed, *"...a paradise as wide as the skys and the earth...(Ali 'Imran: 3: 133)*

Namely paradise is above the expanse of space (or what is called the sky) which the earth and the other planets are on it. Or in other words, the area of the room or sky above which there is the earth and other planets.

CONCLUSION

Based on the description above, we can conclude that the secrets that are hidden behind the verse: *"...paradise whose breadth is as wide as the heavens and the earth... (Ali 'Imran: 3: 133)*

Well, it turns out that paradise is actually above a stretch of room (or what is called the sky) where the earth and other planets are above it. Or in other words, the area of the room or sky above which there is the earth and other planets.

So, actually what is meant by Allah is that *"...paradise...as wide as the sky and the earth...(Ali 'Imran: 3: 133)* is that heaven is above the room as the earth is above it.

Now, because Allah has declared that *"...paradise whose breadth is as wide as the skys and the earth... (Ali 'Imran: 3: 133)* means that heaven is in our sky today which is visible to the human eye.

But, now, Allah *"...has created seven skys in layers...(Al Mulk: 67:3)*, where 1 sky, namely the sky where humans are now is the sky that can be seen by the human eye. Then The other 6 skys are translucent skies, meaning that the human eye cannot see them.

Well, because between one sky and another sky interact or touch each other, the transparent sky can come into contact with our sky which can be seen by the human eye.

So, the paradise hat exist in the sky and earth, can come into contact with the sky that is translucent to the human eye.

Now, let's unveil the secret that is hidden in the secret behind the verse: *"...paradise beneath which rivers flow, and He made palaces for you. (Al Furqaan: 25:10)*

Well, it turns out that here Allah has declared that in paradise there are *"...rivers...palaces. (Al Furqaan: 25:10)*

That is, in this paradise there is water which consists of hydrogen and oxygen atoms, there are also palaces which contain hydrogen atoms, oxygen atoms and carbon atoms.

Or in other words, paradise is in the expanse of space where the earth is above.

Thus, the paradise described by Allah *"...paradise beneath which rivers flow, and he made palaces for you. (Al Furqaan: 25:10)* is there is an expanse of space on our earth today.

This means that paradise can be seen and heard, if humans know the vibrations of the frequency of light reflected by paradise.

Well, now it's been revealed, *"...a paradise as wide as the skys and the earth...(Ali 'Imran: 3: 133)*

Namely paradise is above the expanse of space (or what is called the sky) which the earth and the other planets are on it. Or in other words, the area of the room or sky above which there is the earth and other planets.
