ABSTRACT

First of all, by asking forgiveness from Allah SWT here I am trying to reveal the signs of Allah SWT about what is the reason Allah, Allah's spirit is married in paradise, based on photons, quarks and the molecular structure of nucleic acids or deoxyribonucleic acid (DNA)

In the Qur'an found several verses that are the key to unlocking the secret of what is the reason Allah, Allah's spirit is married in paradise, namely the verses:

"Beside them there are angels who are not wild in sight and beautiful in their eyes, (Ash Shaaffaat: 37: 48)

"They reclined on couches in a row and We married them to beautiful nymphs with sharp eyes (Ath Thuur: 52:20)

"Indeed We created them directly (Al Waaqi'ah: 56: 35)

"Allah promises the believers, male and female, Paradise under which rivers flow, they will abide therein, there are good places in Paradise 'Adn. And Allah's pleasure is greater; that is great fortune. (At Taubah: 9:72)

"Indeed Allah will admit those who believe and do righteous deeds into Paradises beneath which rivers flow. In Paradise they will be adorned with gold and pearl bracelets, and their clothes will be silk. (Al Hajj) :22:23)

"Glory be to Him who, if He willed, He would have made for you something better than this, gardens beneath which rivers flow, and He made for you palaces. (Al-Furqaan: 25:10)

"And give good tidings to those who believe and do good, that for them are provided gardens with rivers flowing in them. Every time they are given sustenance of fruit in those paradises, they say: "This is what was given to them. us first." They are given similar fruits and for them are pure wives and they will abide therein (Al Baqarah: 2:25)

"So when I have perfected the event, and have breathed into it my spirit, then submit to it prostrating yourself (Al Hijr: 15: 29)

"So He made it seven skys in two periods. He revealed in each sky its affairs. And We adorn the near sky with bright stars and We take care of it as well as possible. Such is the provision of the Mighty, All-Knowing. (Fushshilat :41:12)

"Say: "O Allah, Creator of the heavens and the earth, Who knows the unseen and the real, You are the One who decides between Your servants what they always argue about." (Az Zumar : 39: 46)

In an effort to open the veil of Allah's secret about what is the reason Allah, Allah's spirit is married in paradise, I base on photons, quarks and deoxyribonucleic acid or the molecular structure of nucleic acids.

HYPOTHESES

Here I propose the hypothesis that Allah's reason, Allah's spirit is married in paradise, is to maintain the balance of oxygen atoms, hydrogen atoms, nitrogen atoms and carbon atoms in paradise, based on photons, quarks and deoxyribonucleic acid or the molecular structure of nucleic acids.

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that forms a double helix and which contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide is composed of folate, a 5 carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytocine (C) and Thymine (T).

Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

TO GUARANTEE THE SURVIVAL OF ALLAH'S SPIRIT IN PARADISE IT IS NEED TO KEEP THE STABILITY OF THE HYDROGEN ATOM, OXYGEN ATOM, NITROGEN ATOM AND CARBON ATOM THROUGH THE MARRIAGE OF ALLAH'S SPIRIT WITH AN NYMPH CREATED DIRECTLY BY ALLAH

Now, we are still focused on dismantling the secrets stored in the verse: "*... We married them to beautiful nymphs with sharp eyes (Ath Thuur: 52: 20)*"

Now the question arises,

Where did the nymph come from?

The answer is

Hidden in the secret behind the verse: "*... We created them directly (Al Waaqi'ah: 56: 35)*"

Well, here Allah created directly "*...the nymph...(Ath Thuur : 52:20)*" from "*... my spirit...(Al Hijr : 15: 29)*" where "*...my spirit. ..(Al Hijr: 15: 29)*" consists of hydrogen atoms, oxygen atoms, nitrogen atoms and carbon atoms.

So, nymphs are created directly from hydrogen atoms, oxygen atoms, nitrogen atoms and carbon atoms.

Why did Allah create nymphs directly from hydrogen atoms, oxygen atoms, nitrogen atoms and carbon atoms?

Because "*...the seven skys...(Fushshilat : 41:12)*" and all that is in them, including humans, are created from hydrogen atoms, oxygen atoms, nitrogen atoms and carbon atoms.

MARRIAGE BETWEEN THE SPIRIT OF ALLAH AND AN NYMPH, IS NOT TO GET OFFSPRING AND GETTING ENJOYMENT, BUT TO KEEP THE STABILITY OF A VERY LONG LIFE IN PARADISE

Now, the question arises, how stable is life in paradise?

The answer is

It is hidden in the secret behind the verse: *"...they are provided with paradises flowing rivers in them...they are eternal in them. (Al Baqarah: 2:25)*

Well, it means *"...they are eternal...(Al Baqarah: 2:25)* according to the calculation of human time, until *"...the seven skys...(Fushshilat: 41:12)* and all of its contents are lost, returning to energy of Allah.

Where *"...the seven skys...(Fushshilat : 41:12)* will disappear after reaching **10 00000000 00000000 00000000 00000000 00000000 00000000 00000000 00000000 00000000 00000000** years.

"...the seven skys...(Fushshilat : 41:12) will be lost because the nuclear power that holds the quarks in the atom is gone.

So, in order to maintain a stable life in paradise, it is necessary to maintain a continuous supply of hydrogen atoms, oxygen atoms, nitrogen atoms and carbon atoms.

Well, with *"...provided (in) paradise that flow rivers in it...(Al Baqarah: 2:25)* makes the need for hydrogen atoms and oxygen atoms from water can be guaranteed.

Likewise, *"...fruits in the paradise...(Al Baqarah: 2:25)* will provide sufficient availability of hydrogen atoms, carbon atoms and nitrogen atoms.

LIFE IN PARADISE IS THE LIFE OF THE SPIRIT OF ALLAH INCLUDING THE NYMPHS BUILT BY HYDROGEN ATOM, OXYGEN ATOM, NITROGEN ATOM AND CARBON ATOM

Well, because in heaven is the life of Allah's spirit or *"... my spirit... (Al Hijr: 15: 29)* without a body, then the age of Allah's spirit will reach age, equal to the age of the seven skys and all that is in them.

So, the marriage between Allah's spirit and an angel is not to seek pleasure and offspring, but to maintain the stability of hydrogen atoms, carbon atoms, oxygen atoms and nitrogen atoms in heaven.

CONCLUSION

Based on the description above, we can conclude that the secrets stored in the verse: *"... We married them to beautiful nymphs with sharp eyes (Ath Thuur: 52: 20)*

Now the question arises,

Where did the nymph come from?

The answer is

Hidden in the secret behind the verse: *"... We created them directly (Al Waaqi'ah: 56: 35)*

Well, here Allah created directly *"...the nymph...(Ath Thuur : 52:20)* from *"... my spirit...(Al Hijr : 15: 29)* where *"...my spirit. ..(Al Hijr: 15: 29)* consists of hydrogen atoms, oxygen atoms, nitrogen atoms and carbon atoms.

So, nymphs are created directly from hydrogen atoms, oxygen atoms, nitrogen atoms and carbon atoms.

Why did Allah create nymphs directly from hydrogen atoms, oxygen atoms, nitrogen atoms and carbon atoms?

Because *"...the seven skys...(Fushshilat : 41:12)* and all that is in them, including humans, are created from hydrogen atoms, oxygen atoms, nitrogen atoms and carbon atoms.

Now, the question arises, how stable is life in paradise?

The answer is

It is hidden in the secret behind the verse: *"...they are provided with paradises flowing rivers in them...they are eternal in them. (Al Baqarah: 2:25)*

"...the seven skys...(Fushshilat : 41:12) will be lost because the nuclear power that holds the quarks in the atom is gone.

So, in order to maintain a stable life in paradise, it is necessary to maintain a continuous supply of hydrogen atoms, oxygen atoms, nitrogen atoms and carbon atoms.
