ABSTRACT

Before I write down what is the problem with Allah, the first time I convey revelation, humans must think about their creation and must understand through learning, first I ask forgiveness from Allah SWT. Here I try to open the veil that covers the secret about what is the problem with Allah, the first time to convey the revelation, humans must think about their creation and must understand through learning, from the point of view of the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

There are several verses that become Allah's secret unlocking tools about what is wrong with Allah, the first time to convey a revelation, humans must think about their creation and must understand through study, namely the following verses:

"Allah... the light of the skys and the earth... the light upon the light... (An Nuur: 24: 35)

"Read in the name of your Lord Who created (Al 'Alaq: 96: 1) "He has created man from a clot of blood. (Al 'Alaq: 96: 2) "The one who teaches by means of kalam (Al 'Alaq: 96: 4)

"Those who remember Allah while standing or sitting or lying down and they think about the creation of the heavens and the earth: "Our Lord, You did not create this in vain, Glory be to You, so protect us from the torment of Hell. (Ali 'Imran: 3:191)

"And verily We have created man from an essence from clay. (Al Mu'minuun: 23:12)

"So when I have perfected the event and have breathed into it my spirit; then you should fall down prostrating to him." (Shaad: 38: 72)

"So when I have perfected the event, and have breathed into it my spirit, then submit to it prostrating yourself (Al Hijr: 15: 29)

"Then He perfected and breathed into it His spirit and He made for you hearing, sight and heart; you are very little grateful. (As Sajdah: 32: 9)

"And if We made the apostle an angel, We would certainly have made him a man and, of course We would have doubted about them what they doubted about themselves (Al An'aam: 6:9)

"But Allah acknowledges the Qur'an which He has revealed to you. Allah has sent it down with His knowledge; and the angels are witnesses. It is enough for Allah to acknowledge it. (An Nisaa': 4: 166)

"And it is not possible for any human being that Allah can speak with him except by means of revelation or behind a veil or by sending a messenger and then it is revealed to him with His permission what He wills. Verily, He is Most High, Most Wise. (Ash Shuura: 42: 51)

"And verily We have created man and know what his heart whispers, and We are nearer to him than his jugular vein." (Qaf: 50:16)

"And when My servants ask you about Me, then, that I am near. I grant the supplication of those who pray when they ask Me, then let them fulfill (all My commands) and let them believe in - Me, that they may always be in the truth.(Al Baqarah: 2:186)

"He is the First and the Last, the Outward and the Inward; and He is All-Knowing of all things. (Al Hadid: 57:3)

"And when We said to the angels: "Prostrate to Adam," then they bow down except Satan; he is reluctant and arrogant and is one of the disbelievers. (Al Baqarah: 2:34)

"He arranges affairs from the skys to the earth, then they ascend to Him in one day whose measure is a thousand years according to your reckoning (As Sajdah: 32: 5)

"Angels and spirits ascend to God in a day whose measure is fifty thousand years." (Al Ma'aarij: 70:4)

"Who has created the seven skys in layers. You never see in the creation of the Most Gracious God anything that is not balanced. So look over and over again, do you see anything that is not balanced? (Al Mulk: 67: 3)

"It is He who has made the earth a bed for you and the sky a roof, and He sends down water from the sky, then He produces with it all the fruit as a sustenance for you; therefore do not establish partners with Allah, while you know. Al Baqarah : 2:22)

"And to Allah belongs the east and the west, so wherever you turn there is the face of Allah. Verily Allah is All-Encompassing, All-Knowing. (Al Baqarah: 2:115)

"Those who remember Allah while standing or sitting or lying down and they think about the creation of the heavens and the earth: "Our Lord, You did not create this in vain, Glory be to You, so protect us from the torment of Hell. (Ali 'Imran: 3:191)

"And We made a wall before them and behind them a wall, and We covered them so that they could not see." (Yaasiin: 36:9)

In an effort to open the veil of Allah's secret about what is wrong with Allah, first conveying revelation, humans must think about their creation and must understand through study, I use the basis of deoxyribonucleic acid or deoxyribonucleic acid or the molecular structure of nucleic acids.

HYPOTHESIS

Here I propose a hypothesis that the first time Allah conveyed revelation, humans must think about their own creation and must understand through learning, because by thinking about the creation of Allah's creatures through learning, humans will understand and arrive at the real Allah, seen from the point of view of Deoxyribonucleic acid (Deoxyribonucleic acid). DNA)

PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interactions.

QUARK

If we want to know quarks, then we consider one of the hydrogen atoms that are the building blocks of the human body, animals, plants and fruits as well as inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Then if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with

gluons.

DEOXYRIBONUCLIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that forms a double helix and contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide consists of folate, a 5-carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytosine (C) and Thymine (T).

Guanine (G) consists of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytosine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. A 5-carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

Based on Deoxyribonucleic acid (DNA) humans are composed of 32.20% atoms carbon, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms. Where carbon, nitrogen, oxygen and hydrogen atoms are widely available around us and in atmosphere.

WHY ALLAH FIRST SUBMITTED REVELATION TOWARDS MAN TO THINK ABOUT CREATION OF HIMSELF

Now, we are still focusing our minds on uncovering the secrets contained behind the verse: *"Read in the name of your Lord Who created (Al 'Alaq: 96: 1) "He has created man from a clot of blood (Al 'Alaq: 96: 2)*

Apparently, here Allah has ordered humans to study and understand the creation of humans, so that humans understand about where humans come from, and to understand and realize the real Allah.

So, humans are commanded to learn about their creation, so that humans understand the real Allah.

Now the question arises,

What is the relationship between the creation of man and the real Allah?

The answer is

Hidden in the secret behind the verse: *"Who has created the seven skys in layers ... (Al Mulk: 67: 3)*

So, actually, the creation of man is part of the creation of *"...seven skys...(Al Mulk: 67:3)* Humans are a small part of the contents of *"...seven skys...(Al Mulk: 67:3)*

Because humans *"...who remember Allah while standing or sitting or lying down and...thinking about the creation of the heavens and the earth: "Our Lord, you did not create this in vain...(Ali 'Imran: 3: 191)* then people will understand the real Allah.

THE SEVEN SKYS AND HUMANS WERE CREATED FROM HYDROGEN ATOMS, CARBON ATOMS, NITROGEN ATOMS AND OXYGEN ATOMS

Now, because man was created “...*from a clot of blood. (Al 'Alaq: 96: 2)* where in the blood contains oxygen atoms, hydrogen atoms, nitrogen atoms and carbon atoms, then in fact, these atoms are used as building materials for the creation of the seven skys.

So when Allah created “...*the seven skys...(Al Mulk: 67:3)* the building materials are oxygen atoms, hydrogen atoms, nitrogen atoms and carbon atoms are the same as oxygen atoms, hydrogen atoms, nitrogen atoms and carbon atoms which are used as building materials for human creation.

Or in other words, the creation of “...*the seven skys...(Al Mulk: 67:3)* is the same as the creation of man who “...*from a clot of blood (Al 'Alaq: 96:2)* by using oxygen atoms, hydrogen atoms, nitrogen atoms and carbon atoms

HUMANS BY LEARNING TO KNOW WHAT HUMANS WAS CREATED FROM, THEN HUMANS WILL UNDERSTAND ABOUT THE REAL ALLAH

Now, because humans learn “...*by means of kalam (Al 'Alaq: 96:4)* about the creation of man and the seven skys, then humans will understand the real Allah.

Because humans understand the real Allah, then humans will understand what Islam really is. Without understanding about the real Allah, the building of Islam will collapse because it is fragile.

The word Allah only comes out of the mouth, so Islam only reaches the surface. Muslims only live under the current of secularism, where Islamic laws are unknown and not recognized, so that Muslims only live and breathe the air of secularism.

Thoughts of Muslims are only under the laws of secularism, as in Indonesia it is the secular law of Pancasila, which does not recognize and does not recognize Islamic law. Likewise in other secular countries in the world.

So, with the revelation of the first surah regarding the creation of man who was “...*from a clot of blood (Al 'Alaq: 96:2)* by using oxygen atoms, hydrogen atoms, nitrogen atoms and carbon atoms, the same as these atoms are used as building materials for building materials. creation of the seven skys, then humans are required to learn about how the creation of humans and these seven skys so that humans understand the real Allah.

Now, the secret has been revealed, which is hidden behind the verse: “*Read in the name of your Lord Who created (Al 'Alaq: 96: 1) "He created man from a clot of blood (Al 'Alaq: 96: 2)" Who created the seven heavens.: 67:3)*

That is, humans must understand that the creation of the seven skys and the creation of humans are the building blocks of oxygen atoms, hydrogen atoms, nitrogen atoms and carbon atoms.

With the similarity of building materials for the creation of the seven skys and the creation of humans, humans will know that in the human body there are oxygen atoms, hydrogen atoms, nitrogen atoms and carbon atoms. Where oxygen atoms, hydrogen atoms, nitrogen atoms and carbon atoms are the building materials of “...*my spirit...(Shaad: 38:72)* which is breathed by Allah into the human body.

CONCLUSION

Based on the description above, we can conclude that the secrets contained behind the verse: ***"Read in the name of your Lord Who created (Al 'Alaq: 96: 1) "He has created man from a clot of blood (Al 'Alaq: 96: 2)***
