ABSTRACT

First of all, by asking forgiveness from Allah SWT, here I try to reveal the signs of the greatness of Allah SWT regarding what is evidence, angels fly using wings, viewed from the point of view of photons, quarks and the molecular structure of nucleic acids or deoxyribonucleic acid (DNA).

The signs of Allah's greatness regarding Allah's secret about what is evidence, angels fly using wings, namely in the verses:

"Praise be to Allah, the Creator of the heavens and the earth, Who made the angels as messengers with wings, two, three and four respectively. Allah adds to His creation what He wills. Verily Allah has power over all things. (Faathir: 35:1)

"The angels and Gabriel ascended to God in a day the measure of which was fifty thousand years (Al Ma'aarij: 70: 4)

"...We made the apostle an angel, ...he was a man...(Al An'aam: 6: 9)

"Who has created the seven heavens in layers. You never see in the creation of the Most Gracious God anything that is not balanced. So look over and over again, do you see anything that is not balanced? (Al Mulk: 67: 3)

"And if We wish, We have indeed made in your place on earth angels from generation to generation. (Az Zukhruf: 43:60)

"So when I have perfected the event, and have breathed into it my spirit, then submit to it prostrating yourself (Al Hijr: 15: 29)

In an effort to unveil the greatness of Allah SWT regarding what is evidence, angels fly with wings, I use the basis of photons, quarks and the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

HYPOTHESIS

Here I propose the hypothesis that angels cannot fly, but use sound frequency waves over long distances and near distances, seen from photons, quarks and the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that form a double helix and which contains polynucleotide macromolecules arranged in repeatedly from nucleotide polymers. This nucleotide is composed of folate, a 5-carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine(A), Cytocine(C) and Thymine (T).

Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 atom oxygen and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C)

contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interactions.

QUARK

If we want to know quarks, then we consider one of the hydrogen atoms that is the building block of the human body, animals, plants and fruits and inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Then if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with gluons.

WING IS A SYMBOL OF REMOTE SOUND WAVE VIBRATION

Now, we are still trying to focus our minds to reveal the secret hidden behind the verse: *"...Those who make angels as messengers who have wings, two, three and four each... (Faathir: 35:1)*

Well, it is clearly described, Allah *"...made angels as messengers who have wings, two, three and four each...(Faathir: 35: 1)*

Apparently, Allah sent *"...angels as messengers...(Faathir: 35: 1)*

Now the question arises,

If Allah sends *"...angels as messengers...(Faathir: 35:1)* then actually *"...We made the apostle an angel,...he was a man...(Al An'aam : 6:9)*

So, actually *"...angels as messengers who have wings, two, three and four respectively...(Faathir: 35:1)* are *"...a man...(Al An' aam : 6: 9)* who has the ability to communicate with other angels and with humans, using sound waves vibrations from far and near.

Now, now the secret behind the verse has been revealed: *"...which has wings, two, three and four respectively... (Faathir: 35: 1)* meaning, wings are the angel's ability to communicate with other angels and with Allah and with God. humans, through the vibrations of sound waves over long and short distances.

So, *"...wings...two, three and four...(Faathir: 35: 1)* describe the vibrations of sound waves at various distances.

ALLAH'S LAW OR NATURAL LAW APPLY TO EVERYTHING IN THIS UNIVERSE

Well, let's unpack the secret behind the verse: *"...You never see in the creation of the Most Gracious God anything that is not balanced. So look over and over again, do you see something that is not balanced? (Al Mulk: 67: 3)*

It turns out, whatever, that is in this universe is *"... balanced... (Al Mulk: 67: 3)*

That is, each has a partner. Without a partner, what exists in this universe will be destroyed.

Likewise, with angels. Because *"...angel, ...he is a man...(Al An'aam: 6:9)* then the angel has a partner, if there is no partner, the angel will not exist on this earth, because it is against the law Allah or the laws of nature. *"And if We wish, We have indeed made in your place on earth angels from generation to generation. (Az Zukhruf: 43:60)*

It turns out, angels are able to be *"...hereditary. (Az Zukhruf: 43: 60)* means, angels have partners, as with humans who have partners, so that humans *"... from generation to generation. (Az Zukhruf: 43:60)*

If we count the total number of humans on earth, there are about 7 billion people, while angels are not as numerous as humans.

Angels live far apart, so they need wings, which means, angels to communicate with other angels must use sound wave vibrations over long distances.

Now, the secret behind the verse has been revealed: *"...angels as messengers who have wings, two, three and four respectively... (Faathir: 35: 1)* which means, angels to communicate with other angels and with Allah as well as with humans, through the vibrations of sound waves at long and near distances.

CONCLUSION

From what has been described above we can now conclude that the secret hidden behind the verse: *"...Those who make angels as messengers who have wings, two, three and four each... (Faathir: 35:1)*

Well, it is clearly described, Allah *"...made angels as messengers who have wings, two, three and four each...(Faathir: 35: 1)*
