**ABSTRACT**

Before I write down the problem what is actually meant by, Allah hears and sees, first I ask forgiveness from Allah SWT. Here I am trying to unmask the hidden secret of what it really means, Allah hears and sees, from the point of view of the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

There are several verses that become Allah's secret unlocking tool about what it really means, Allah hears and sees, namely the following verses:

*"Allah... the light of the skys and the earth... the light upon the light... (An Nuur: 24: 35)*

*"The Creator of the heavens and the earth. He made for you from your own kind pairs and pairs of livestock, He made you breed in that way. There is nothing like Him, and He is the All-Hearing and Seeing (Ash Shuura : 42:11)*

*"That is because Allah has made the night into the day and the day into the night, and that Allah is All-Hearing, All-Seeing. (Al Hajj: 22:61)*

*"Remember when he said to his father: "O my father, why do you worship something that does not hear, do not see and cannot help you in the slightest? (Mary: 19:42)*

*"Indeed We see your face looking up to the sky, then We will indeed turn you to the Qibla that you like. Turn your face towards the Grand Mosque. And wherever you are, turn your face towards it. And indeed those who were given the Book do know , that turning to the Grand Mosque is true from their Lord, and Allah is never unaware of what they are doing (Al Baqarah: 2:144)*

*"And when Moses came for an appointed time and the Lord had spoken to him, Moses said: "My Lord, show me so that I can see You." The Lord said: "You will never be able to see Me, but look at the hill, then if it stays where it is you will surely see me." When his Lord appeared to the mountain, he made the mountain crumble and Moses fell unconscious. So when Moses regained consciousness, he said: "Glory be to him. You, I repent to You and I am the first to believe." (Al A'raaf: 7:143)*

*"And it is not possible for a man of Allah to speak to him except by revelation or behind a veil or by sending an apostle, then it is revealed to him with His permission what He wills. Verily He is Most High. , Most Wise. (Ash Shuura: 42:51)*

*"When I have perfected the event, and have breathed into it my spirit, then submit to it prostrating yourself (Al Hijr: 15: 29)*

*"And We made a wall before them and behind them a wall, and We covered them so that they could not see." (Yaasiin: 36:9)*

*"And verily We have created man and know what his heart whispers, and We are nearer to him than his jugular vein." (Qaf: 50:16)*

*"Then He perfected and breathed into it His spirit and He made for you hearing, sight, and heart; you are very little grateful." (As Sajdah: 32: 9)*

*"Indeed, We have adorned the heavens near the stars, and We have made them instruments for throwing the devils, and We have prepared for them the torment of a blazing hell. (Al Mulk: 67: 5)*

*"And We put before them a wall and behind them a wall, and We covered them so that they could not see. (Yaasiin: 36: 9)*

In an effort to unmask Allah's secret about what it really means, Allah hears and sees, I use the base of deoxyribonucleic acid or deoxyribonucleic acid or the molecular structure of nucleic acids.

## **HYPOTHESIS**

Here I put forward the hypothesis that Allah hears through the vibration of the light layer, and Allah sees through the light layer, seen from the point of view of Deoxyribonucleic acid (DNA).

## **DEOXYRIBONUCLIC ACID (DNA)**

DNA is a repository of genetic information that has a double structure that forms a double helix and contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide consists of folate, a 5-carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytosine (C) and Thymine (T).

Guanine (G) consists of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytosine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. A 5-carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

## **ALLAH HEARS AND ALLAH SEE IS A SYMBOL**

Now, we are still concentrating on uncovering the secrets contained behind the verse: *"Allah... the light of the skys and the earth... the light upon the light... (An Nuur: 24: 35)*

It turns out that Allah is *"... the light of the skys and the earth... (An Nuur: 24: 35)*

That is, with the presence of *"...light...(An Nuur: 24: 35)* of Allah, then you can see what is in this universe.

Now, the question arises,

Where does Allah's light come from?

The answer is,

Kept in a secret hidden behind the verse: *"... I... have blown into it my spirit... (Al Hijr: 15: 29)*

Well, apparently, Allah's light comes from *"... my spirit... (Al Hijr: 15: 29)*

What does it look like in *"... my spirit... (Al Hijr: 15: 29)* ?

The answer is

*"... my spirit... (Al Hijr: 15: 29)* contains the source of life for all that exists in this universe.

Namely "*... the spirit of Ku... (Al Hijr: 15: 29)* contains hydrogen atoms, nitrogen atoms, carbon atoms and oxygen atoms.

Well, with hydrogen atoms, nitrogen atoms, carbon atoms and oxygen atoms created by Allah "*...the skys and the earth...(Asy Syuura: 42:11)* without hydrogen atoms, nitrogen atoms, carbon atoms and oxygen atoms will not exist. happen or not, this universe will be created.

Now, "*...light...(An Nuur : 24: 35)* of Allah comes from "*... my spirit...(Al Hijr : 15: 29)* in which there is a hydrogen atom.

Well, with this hydrogen atom created "*...light...(An Nuur: 24: 35)* of Allah .

How did "*...light...(An Nuur : 24: 35)* of Allah use hydrogen atoms?

The answer is

Hidden in the secret behind the verse: "*... We have adorned the sky close to the stars... (Al Mulk: 67: 5)*

Well, it is in these stars that the light of Allah is born, through the hydrogen atom.

It is because of these hydrogen atoms that the stars, billions in number in the universe, emit their rays, including the sun, which because of the hydrogen atom as fuel, light rays are born that reach the earth and our bodies.

## **ALLAH SEEING**

Now it has been revealed, "*Allah... the light of the skys and the earth... (An Nuur: 24: 35)* is from "*... my spirit... (Al Hijr: 15: 29)* which contains hydrogen atoms.

It is with this hydrogen atom that Allah's light is born which illuminates "*... the skys and the earth... (An Nuur: 24: 35)*

Or in other words, "*...Allah...All-Seeing (Al Hajj: 22: 61)* through "*...the light of the sky...(An Nuur: 24: 35)*

## **ALLAH HEARS**

So, next, we will uncover the secret behind the verse: "*Allah...Light upon light...(An Nuur: 24: 35)*

Well, it turns out, "*Allah...Light above light...(An Nuur: 24: 35)* is a force of energy, which is carried by photons. Or in other words photons are elementary particles of the boson type, carriers of electromagnetic interactions.

Well, by going through various frequency waves that carry energy and sound that reaches Allah.

Whatever sound is in the universe, and whatever energy is in the universe, which is carried through various frequency waves, it all reaches Allah.

Or in other words, Allah is all-hearing, through various frequency waves that carry energy and sound in the universe.

## CONCLUSION

Based on the description above, we can conclude that the secrets contained behind the verse: *"Allah... the light of the skys and the earth... the light upon the light... (An Nuur: 24: 35)*

It turns out that Allah is *"... the light of the skys and the earth... (An Nuur: 24: 35)*
