ABSTRACT

Before the author writes about the problem of what the Jews actually believe that Jahve breathed into Adam's nostrils so that Adam could live, the author first asks forgiveness from Allah SWT. Here the author tries to open the veil that covers the secret of what is actually believed by the Jews that Jahve breathed into Adam's nostrils in order for Adam to live, based on the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

There are several verses that reveal Allah's secret about what the Jews actually believe that Jahve breathed into Adam's nostrils in order for Adam to live, namely the following verses:

"Allah... the light of the skys and the earth... the light upon the light... (An Nuur: 24: 35)

"And verily We have created man from an essence of clay. (Al Mu'minuun: 23:12)

"So when I have perfected the event and have breathed into it my spirit; then you should fall down prostrating to him." (Shaad: 38: 72)

"So when I have perfected the event, and have breathed into it my spirit, then submit to it prostrating yourself (Al Hijr: 15: 29)

"Then He perfected and breathed into it His spirit and He made for you hearing, sight and hearts; you are very little grateful. (As Sajdah: 32: 9)

"And it is not possible for any human being that Allah can speak with him except by means of revelation or behind a veil or by sending a messenger and then it is revealed to him with His permission what He wills. Verily, He is Most High, Most Wise. (Ash Shuura: 42: 51)

"And verily We have created man and know what his heart whispers, and We are nearer to him than his jugular vein." (Qaf: 50:16)

"And when My servants ask you about Me, then, that I am near. I grant the supplication of those who pray when he asks Me, then let them fulfill and let them believe in Me, so that they will always be in truth.(Al Baqarah: 2:186)

"Angels and spirits ascend to God in a day whose measure is fifty thousand years." (Al Ma'aarij: 70:4)

"Who has created the seven heavens in layers. You do not see in the creation of the Most Gracious God anything that is not balanced. So look over and over again, do you see anything that is not balanced? (Al Mulk: 67: 3)

"And to Allah belongs the east and the west, so wherever you turn there is the face of Allah. Verily Allah is All-Wise, All-Knowing. (Al Baqarah: 2:115)

"And they ask you about the spirit. Say: "The spirit belongs to my Lord, and knowledge is not given to you but a little." (Al Israa ': 17: 85)

In an effort to open the veil of Allah's secret about what the Jews actually believed that Jahve breathed into Adam's nostrils in order for Adam to live, the author uses the basis of deoxyribonucleic acid or deoxyribonucleic acid or the molecular structure of nucleic acids.

HYPOTHESIS

Here the author proposes a hypothesis that the Jews believe that Jahve breathed into Adam's nostrils so that Adam could live, because that breath contained "*...my spirit...(Shaad: 38:72)* or "*...Allah's spirit.. .(Shaad : 38:72)* based on Deoxyribonucleic acid (DNA)

PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interactions.

QUARK

If we want to know quarks, then we consider one of the hydrogen atoms that is the building block of the human body, animals, plants and fruits and inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Then if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with gluons.

DEOXYRIBONUCLIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that forms a double helix and contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide consists of folate, a 5-carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytosine (C) and Thymine (T).

Guanine (G) consists of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytosine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. A 5-carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

Based on Deoxyribonucleic acid (DNA) humans are composed of 32.20% atoms carbon, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms. Where carbon, nitrogen, oxygen and hydrogen atoms are widely available around us and in atmosphere.

WHAT REALLY JEWS BELIEVE THAT JAHVE BLOWED BREATH INTO ADAM'S NOSE HOLE TO MAKE ADAM LIVE

Now, we are still concentrating on uncovering the secrets contained behind the verses: "*...We have created man from an essence from the ground (Al Mu'minuun: 23:12)*" "*...I breathed into him my spirit. .. (Shaad : 38:72)*

Here, Allah has declared "*... We have created man from an essence from the ground (Al Mu'minuun: 23:12)*

It turns out that the Jews believed that Jahve breathed into Adam's nostrils in order for Adam to live.

Now the question arises

What exactly do the Jews believe that Jahve breathed into Adam's nostrils?

Well, it turns out that Jahve breathed into Adam's nostrils meaning, Jahve blew oxygen atoms into Adam's lungs.

Now, do the Jews understand that the oxygen atoms were blown by Jahve into Adam's lungs through Adam's nostrils?

The answer is, when the Jews understood that the oxygen atom that was blown by Jahve into Adam's nostrils, Adam lived, then when Adam's heart and all organs of the body ceased to function, Adam died.

So, the question now is,

What will happen to Adam after Adam dies according to the Jews?

Now, the answer is, Jews only believe in life here and now.

That is, after Adam died, then Adam's life history ended.

So actually, since the Jews don't believe in the existence of the afterlife, then when Jahve breathed into Adam's nostrils it was so that Adam could live in this world only.

If Adam dies, because his heart and all his organs are no longer functioning, then Adam's life ends there.

Then another question arises,

Do the Jews believe that after Adam died, Adam would incarnate into another human and become plants and animals?

The answer is, because the Jews only believed in life here and now, then when Adam died, everything that had to do with Adam was finished.

Well, this is where most Jews think wrong. In fact, because the human body is made up of **7 000000000 000000000 000000000** atoms, including hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms, when a human dies, these atoms come back out of the deceased human's body.

Atoms of oxygen are inhaled by humans and animals. The carbon atoms are absorbed by plants. Nitrogen atoms enter the soil and rise to the atmosphere. Hydrogen atoms combine with oxygen atoms to form water.

So, in fact, if the Jews believe that life is just life in the here and now, then that belief is a grave error.

It is evident from the atoms that came out of the body of Adam who died, still the atoms continue to live in other forms.

Well, actually, if the Jew understood that what was breathed by Allah into Adam's nostrils was the Allah's spirit which contained hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms, as

the source of life for humans and for all the seven skyss and all that is in them.

CONCLUSION

Based on the description above, we can conclude that the secrets contained behind the verses: "*...We have created man from an essence from the ground (Al Mu'minuun: 23:12) ...I breathed into him my spirit. ..(Shaad : 38:72)*"
