ABSTRACT

Before I write down what is the real problem that makes my spirit live eternally in hell even though the hell fire is very hot, first I ask forgiveness from Allah SWT. Here I try to open the veil that covers the secret of what actually makes my spirit live eternally in hell even though hellfire is very hot, from the point of view of the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

There are several verses that become Allah's secret unlocking tool about what actually makes my spirit live eternally in hell even though the hell fire is very hot, namely the following verses:

"Allah... the light of the skys and the earth... the light upon the light... (An Nuur: 24: 35)

"So when I have perfected the event and have breathed into it my spirit; then you should fall down prostrating to him." (Shaad: 38: 72)

"So when I have perfected the event, and have breathed into it my spirit, then submit to it prostrating yourself (Al Hijr: 15: 29)

"Then He perfected and breathed into it His spirit and He made for you hearing, sight and heart; you are very little grateful. (As Sajdah: 32: 9)

"And if We made the apostle an angel, We would certainly have made him a male and, of course, We would have doubted about them what they doubted about themselves." (Al An'aam: 6:9)

"And it is not possible for any human being that Allah can speak with him except by means of revelation or behind a veil or by sending a messenger and then it is revealed to him with His permission what He wills. Verily, He is Most High, Most Wise. (Ash Shuura: 42: 51)

"And when My servants ask you about Me, then, that I am near. I grant the supplication of those who pray when they ask Me, then let them fulfill (all My commands) and let them believe in - Me, that they may always be in the truth.(Al Baqarah: 2:186)

"Those who remember Allah while standing or sitting or lying down and they think about the creation of the heavens and the earth: "Our Lord, You did not create this in vain, Glory be to You, so protect us from the torment of Hell. (Ali 'Imran: 3:191)

"He is the First and the Last, the Outward and the Inward; and He is All-Knowing of all things. (Al Hadid: 57:3)

"Allah did not create and resurrect you except as one soul. Indeed, Allah is All-Hearing, All-Seeing. (Luqman: 31: 28)

"And We made a wall before them and behind them a wall, and We covered them so that they could not see." (Yaasiin: 36:9)

"And among His signs is that you see the earth dry and arid, so when We send down water on it, it will surely move and thrive. Indeed, God Who gives life to it, surely can bring back the dead..."

(Fushshilat: 41: 39)

"Allah holds the soul when it dies and the soul that has not died in its sleep; so He holds the soul which He has appointed death and He releases another soul until the appointed time. Verily in that are signs of Allah's power for a people who think (Az Zumar : 39: 42)

"It is He Who created the skys and the earth in six days: Then He resides on the Throne. He knows what enters the earth and what comes out of it and what descends from the heavens and what ascends to Him. And He is with you in wherever you are. And Allah is All-Seeing of what you do. (Al Hadid: 57:4)

"Who has created the seven skys in layers. You do not see in the creation of the Most Gracious God anything that is not balanced. So look again and again, do you see anything that is not balanced? (Al Mulk: 67: 3)

"And verily We have created man from an essence from clay. (Al Mu'minuun: 23:12)

"He is Allah, Who created all that is on earth for you and He willed the heavens, then He made the seven skys. And He is All-Knowing of all things. (Al Baqarah: 2:29)

"And each person gets degrees with what he does. And your Lord is not heedless of what they do. (Al An'aam: 6:132)

"Angels and spirits ascend to God in a day the measure of which is fifty thousand years (Al Ma'aarij: 70: 4)

"And man prays for evil as he prays for good. And man is hasty. (Al Israa ': 17:11)

"This, let them taste it, very hot water and very cold water (Shaad: 38: 57)

"entered a very hot fire, (Al Ghaasyiyah: 88: 4)

"And verily We have created man and know what his heart whispers, and We are nearer to him than his jugular vein." (Qaf: 50:16)

In an effort to open the veil of Allah's secret about what actually makes my spirit live eternally in hell even though the hell fire is very hot, I use the base of deoxyribonucleic acid or deoxyribonucleic acid or the molecular structure of nucleic acids.

HYPOTHESIS

Here I propose a hypothesis that my spirit will live eternally in hell is because hydrogen atoms fuel hell, and in my spirit there are hydrogen atoms and oxygen atoms, so I don't feel the heat in hell, from the point of view of Deoxyribonucleic acid (DNA).

PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interactions.

QUARK

If we want to know quarks, then we consider one of the hydrogen atoms that are the building blocks of the human body, animals, plants and fruits as well as inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Then if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with

gluons.

DEOXYRIBONUCLIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that forms a double helix and contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide consists of folate, a 5-carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytosine (C) and Thymine (T).

Guanine (G) consists of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytosine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. A 5-carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

WHY DOES MY SPIRIT THAT LIFE ETERNALLY IN HELL DON'T FEEL HOT HOT HELL FIRE

Now, we are still concentrating on uncovering the secrets contained behind the verse: *"entering a very hot fire (Al Ghaasyiyah: 88: 4)*

It turns out that here Allah has declared that in hell is *"... a very hot fire (Al Ghaasyiyah: 88: 4)*

Now the question arises,

What is the fuel for hell, so hell becomes hot?

The answer is

The fuel in hell is the same as the fuel in the stars, including the sun, in the universe, namely hydrogen atoms.

Well, hydrogen atoms are the fuel in hell, which causes *"...a very hot fire" (Al Ghaasyiyah: 88: 4)*

Now, if *"...my spirit...(Shaad : 38:72)* which is made up of hydrogen atoms, carbon atoms, oxygen atoms and nitrogen atoms, is put into hell what will happen to *"...my spirit... (Shaad : 38:72)*

The answer is

Because hell's fuel is hydrogen atoms, while in the building *"... my spirit...(Shaad : 38: 72)* there is a hydrogen atom, then actually *"... my spirit...(Shaad : 38: 72)* is not will feel hot.

Only, the hydrogen atoms that are in *"...my spirit...(Shaad : 38:72)* are taken to be used as fuel for hell.

Now, *"... my spirit...(Shaad : 38: 72)* requires a hydrogen atom, because the hydrogen atom in *"... my spirit...(Shaad : 38: 72)* is taken to be used as fuel Hell.

Now, where does *"...My spirit...(Shaad : 38:72)* get back the hydrogen atom?

The answer is implied in the secret behind the verse: *"...let them taste it, very hot water and very cold*

water (Shaad: 38: 57)

Well, it turns out that "*...my spirit...(Shaad : 38: 72)* gets hydrogen atoms from "*...very hot water and very cold water (Shaad : 38: 57)*

What is it like in "*...very hot water and very cold water (Shaad: 38: 57)* ?

The answer is

In "*...very hot water and very cold water (Shaad: 38: 57)* hydrogen atoms and oxygen atoms are found.

Well, from "*...hot water and... cold water (Shaad: 38: 57)* this is "*...my spirit...(Shaad: 38: 72)*, not only getting hydrogen atoms , but also get an oxygen atom.

Where hydrogen atoms and oxygen atoms are needed by "*...my spirit...(Shaad : 38: 72)* to sustain its life for 10 000000000 000000000 000000000 000000000 000000000 000000000 000000000 000000000 000000000 000000000 years

MY SPIRIT CAN LIVE ETERNALLY IN HELL BECAUSE THERE ARE HYDROGEN ATOMS AND OXYGEN ATOMS FROM VERY HOT WATER AND VERY COLD WATER

Now, because in "*... my spirit...(Shaad : 38: 72)* there are hydrogen atoms and oxygen atoms, then when there is "*...hot water and...cold water (Shaad: 38:57)* then "*...My spirit...(Shaad : 38:72)* didn't feel the water was hot or the water was cold.

Therefore "*...My spirit...(Shaad : 38: 72)* can live forever until the age of 10 000000000 000000000 000000000 000000000 000000000 000000000 000000000 000000000 000000000 000000000 years.

So, once the hydrogen atom is taken from "*...My spirit...(Shaad : 38: 72)* to be used as fuel for hell, then "*... My spirit...(Shaad : 38: 72)* regains the atom hydrogen from "*...hot water and...cold water (Shaad : 38: 57)*

CONCLUSION

The conclusions that can be drawn from the explanation above are the secrets contained behind the verse: "*entering a very hot fire (Al Ghaasyiyah: 88: 4)*

It turns out that here Allah has declared that in hell is "*... a very hot fire (Al Ghaasyiyah: 88: 4)*
