**ABSTRACT**

The author asks forgiveness from Allah SWT before continuing to reveal the secrets contained in the verse concerning when a living human being does tahlil, what happens to the body of a dead person in the grave, from the point of view of the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

Where are the signs of Allah's greatness regarding when a living human being does tahlil, what happens to the body of a person who dies in the grave, namely the verses:

*"Did We not make the earth (a place) to gather, (Al Mursalaat: 77: 25) "the living and the dead (Al Mursalaat: 77: 26)*

*"Allah... the light of the heavens and the earth... the light upon the light... (An Nuur: 24: 35)*

*"And verily We have created man from an essence of clay. (Al Mu'minuun: 23:12)*

*"So when I have perfected the event and have breathed into it my spirit; then you should fall down prostrating to him." (Shaad: 38: 72)*

*"So when I have perfected the event, and have breathed into it my spirit, then submit to it prostrating yourself (Al Hijr: 15: 29)*

*"Then He perfected and breathed into it His spirit and He made for you hearing, sight and heart; you are very little grateful. (As Sajdah: 32: 9)*

*"And Mary, who has kept her honor, then We breathed into her a spirit from Us and We made her and her child a great sign for the worlds. (Al Anbiyaa ': 21: 91)*

*"So he put a veil from them; then We sent our spirit to him, and he appeared before him a perfect human being. (Maryam: 19:17)*

*"And among the signs of His power is the establishment of the heavens and the earth by His command. Then when He calls you once from the earth, you immediately come out (Ar Ruum: 30: 25)*

*"On the day they come out of the grave quickly as if they went quickly to idols (Al Ma'aarij: 70: 43)*

*"Read your book, it is enough for yourself at this time as a remembrance against you." (Al Israa ': 17: 14)*

*"Those who when disaster strikes, they say: "Inna lillahi wa innaa ilaihi raaji'uun" (Indeed we belong to Allah and to Him we shall return) (Al Baqarah: 2: 156)*

*"... so We bring out because of the rain various kinds of fruit. That is how We raise the dead..."*  
(Al A'raaf: 7: 57)

In an effort to open the veil of the greatness of Allah SWT regarding when a living human performs tahlil, what happens to the body of a dead person in the grave, the author uses the basic molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

## **HYPOTHESES**

Here the author proposes a hypothesis when living humans do tahlil, what happens 30 days with the body of a dead person in the grave, before Allah's spirit and other atoms leave the body, based on the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

## **DEOXYRIBONUCLEIC ACID (DNA)**

DNA is a repository of genetic information that has a double structure that form a double helix and which contains polynucleotide macromolecules arranged in repeatedly from nucleotide polymers. This nucleotide is composed of folate, a 5-carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine(A), Cytocine(C) and Thymine (T).

Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 atom oxygen and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5-carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

Based on deoxyribonucleic acid (DNA) humans are composed of 32.20% atoms carbon, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms. Where carbon, nitrogen, oxygen and hydrogen atoms are widely available around us and in atmosphere. These atoms are the raw materials for the manufacture of humans, animals, fungi, amoeba, plants, bacteria and archaea.

## **WHEN HUMANS WHO ARE STILL BUSY DOING TAHLIL, WHAT ACTUALLY HAPPENED TO THE HUMAN BODIES THAT WERE DEAD AND BURIED IN THE SOIL, BEFORE THE SPIRIT OF ALLAH AND OTHER ATOMS COME OUT OF THE DEAD'S BODY**

Now, we are still concentrating on uncovering the secrets contained behind the verses: *"... We have created man from an essence from the ground. (Al Mu'minuun: 23: 12)"... We made the earth (place) gather, (Al Mursalaat: 77: 25)"the living and the dead (Al Mursalaat: 77:26)"...they came out of the grave quickly...(Al Ma'aarij: 70 :43)*

Apparently, here Allah has declared: *"...We...created humans from...the ground. (Al Mu'minuun: 23:12)"...they came out of the grave quickly...(Al Ma'aarij : 70: 43)"...We made the earth (a place) to gather, (Al Mursalaat: 77: 25) "the living and the dead (Al Mursalaat: 77: 26)*

Well, apparently, the earth is where humans are born, where humans live, and where humans die.

So, actually, paradise and hell are in our earth right now. Because *"...the earth (the place) gathers, (Al Mursalaat: 77: 25)" the living and the dead (Al Mursalaat: 77: 26)*

Now, what happens to human bodies that are dead and have been buried in the soil, while humans who are still alive are busy doing tahlil?

## **WHAT HAPPENS A FEW MINUTES TO THE BODY AFTER HUMANS DIE**

Now, Allah has revealed Allah's secret about "... so We bring out with rain various kinds of fruit. That is how We raise those who have died..." (Al A'raaf: 7: 57)

Well, in fact, a few minutes after humans die, the body temperature drops according to the temperature of the surrounding environment. Where the body temperature drops an average of 1.5-2 degrees every hour. The blood in the body begins to cool, freezes, stops, and prevents the muscles from being able to contract. Every muscle in the body, from the eyelids to the large muscles, becomes inflexible and the joints stay in place, the whole body stiffens. A few minutes after the heart stops, oxygen levels in the body begin to run low, cells self-destruct, caused by the body's enzymes.

### **LOST ALL COLOR**

Loss of all color, is caused when blood cells start to break away from blood vessels, then gravity pulls them into smaller blood vessels and capillaries. As a result, the color changes in certain areas of the body. Changes in body color occur gradually and in line with the process of destruction in the body, green, blue, red, purple and finally black appear.

### **RECOVERY HAPPENED**

Putrefaction occurs when blood vessels and tissues are damaged. Gas and fluid build up and swell causing the body to become swollen in certain areas. For example, the eyeball is pushed out a little or the tongue slowly comes out of the mouth. Then the swelling is most noticeable in the abdomen. Billions of billions of bacteria take part in this process of decaying dead bodies.

### **30 DAYS AFTER THE HUMAN BODY IS BURIED, THE SPIRIT OF ALLAH AND OTHER ATOMS COME OUT OF THE BODY**

The whole body basically becomes liquid, about a month after death, the large organs and vessels within it become solid. When enough fluid has accumulated the body becomes fractured. This is where the breeding ground for billions of billions of bacteria.

In this decomposition process carbon atoms and oxygen atoms form carbon dioxide or carbon dioxide. Then this carbonic acid is absorbed by plants and converted into oxygen and glucose through the process of photosynthesis with the help of sunlight, water and chloroplasts. Chloroplasts are found in the green parts of plants. Where glucose is used as food by plants while oxygen is used for food through the respiratory process by humans and animals.

In this process of decay too, this dead human body turns into ammonia. Furthermore, this ammonia is converted into nitrite by nitrosoma bacteria. Then the nitrite is converted to nitrate by nitrobacter bacteria. Finally the nitrate goes through the denitrification process returns to nitrogen and rises to the atmosphere.

So the picture above is the secret behind the verses:

*"...the earth (where) gathers, (Al Mursalaat: 77:25) ...the dead" (Al Mursalaat: 77:26)*

## **THE SPIRIT OF ALLAH AND THE HYDROGEN ATOM, CARBON ATOM, NITROGEN ATOM AND OXYGEN ATOM OUT OF THE DEAD HUMAN BODY**

*"...Allah's spirit... (Shaad: 38: 72) and the carbon, nitrogen, oxygen and hydrogen atoms that are the building materials for the dead human body come back out and gather around us and some rise up into the atmosphere.*

Meanwhile *"...Allah's spirit... (Shaad: 38: 72)"...gets out of the grave quickly...(Al Ma'aarij: 70:43) to face Allah and get Allah's decision "Read your book, suffice yourselves at this time as a reckoning against you." (Al Israa ': 17: 14)*

Well, the picture of *"...Allah's spirit... (Shaad: 38: 72) and the carbon, nitrogen, oxygen and hydrogen atoms which are the building materials for the dead human body, come back out of the dead human body. verse: "... We bring forth with rain various kinds of fruit. That is how We raise up those who have died..." (Al A'raaf: 7: 57)*

This is the secret of Allah, concerning life, death and human life *"...Inna lillahi wa innaa ilaihi raaji'uun, indeed we belong to Allah and to Him we shall return (Al Baqarah: 2: 156)*

### **CONCLUSION**

From what is described above, it can be concluded that the secrets contained behind the verses: *"... We have created man from an essence from the ground. (Al Mu'minuun: 23: 12)"... We made the earth (place) gather, (Al Mursalaat: 77: 25)"the living and the dead (Al Mursalaat: 77:26)"...they came out of the grave quickly...(Al Ma'aarij: 70 :43)*

Apparently, here Allah has declared: *"...We...created humans from...the ground. (Al Mu'minuun: 23:12)"...they came out of the grave quickly...(Al Ma'aarij : 70: 43)"...We made the earth (a place) to gather, (Al Mursalaat: 77: 25) "the living and the dead (Al Mursalaat: 77: 26)*

Well, apparently, the earth is where humans are born, where humans live, and where humans die.

So, actually, paradise and hell are in our earth right now. Because *"...the earth (the place) gathers, (Al Mursalaat: 77: 25)" the living and the dead (Al Mursalaat: 77: 26)*

Now, what happens to human bodies that are dead and have been buried in the soil, while humans who are still alive are busy doing tahlil?

Now, Allah has revealed Allah's secret about *"... so We bring out with rain various kinds of fruit. That is how We raise those who have died..." (Al A'raaf: 7: 57)*

Well, in fact, a few minutes after humans die, the body temperature drops according to the temperature of the surrounding environment. Where the body temperature drops an average of 1.5-2 degrees every hour. The blood in the body begins to cool, freezes, stops, and prevents the muscles from being able to contract. Every muscle in the body, from the eyelids to the large muscles, becomes inflexible and the joints stay in place, the whole body stiffens. A few minutes after the heart stops, oxygen levels in the body begin to run low, cells self-destruct, caused by the body's enzymes.

Loss of all color, is caused when blood cells start to break away from blood vessels, then gravity pulls them into smaller blood vessels and capillaries. As a result, the color changes in certain areas of the body. Changes in body color occur gradually and in line with the process of destruction in the body, green, blue, red, purple and finally black appear.

Putrefaction occurs when blood vessels and tissues are damaged. Gas and fluid build up and swell causing the body to become swollen in certain areas. For example, the eyeball is pushed out a little or the tongue slowly comes out of the mouth. Then the swelling is most noticeable in the abdomen. Billions of billions of bacteria take part in this process of decaying dead bodies.

The whole body basically becomes liquid, about a month after death, the large organs and vessels within it become solid. When enough fluid has accumulated the body becomes fractured. This is where the breeding ground for billions of billions of bacteria.

In this decomposition process carbon atoms and oxygen atoms form carbon dioxide or carbon dioxide. Then this carbonic acid is absorbed by plants and converted into oxygen and glucose through the process of photosynthesis with the help of sunlight, water and chloroplasts. Chloroplasts are found in the green parts of plants. Where glucose is used as food by plants while oxygen is used for food through the respiratory process by humans and animals.

In this process of decay too, this dead human body turns into ammonia. Furthermore, this ammonia is converted into nitrite by nitrosoma bacteria. Then the nitrite is converted to nitrate by nitrobacter bacteria. Finally the nitrate goes through the denitrification process returns to nitrogen and rises to the atmosphere.

So the picture above is the secret behind the verses:

*"...the earth (where) gathers, (Al Mursalaat: 77:25) ...the dead" (Al Mursalaat: 77:26)*

*"...Allah's spirit... (Shaad: 38: 72) and the carbon, nitrogen, oxygen and hydrogen atoms that are the building materials for the dead human body come back out and gather around us and some rise up into the atmosphere.*

Meanwhile *"...Allah's spirit... (Shaad: 38: 72)"...gets out of the grave quickly...(Al Ma'aarij: 70:43) to face Allah and get Allah's decision "Read your book, suffice yourselves at this time as a reckoning against you." (Al Israa ': 17: 14)*

Well, the picture of *"...Allah's spirit... (Shaad: 38: 72) and the carbon, nitrogen, oxygen and hydrogen atoms which are the building materials for the dead human body, come back out of the dead human body. verse: "... We bring forth with rain various kinds of fruit. That is how We raise up those who have died..." (Al A'raaf: 7: 57)*

This is the secret of Allah, concerning life, death and human life *"...Inna lillahi wa innaa ilaihi raaji'uun, indeed we belong to Allah and to Him we shall return (Al Baqarah: 2: 156)*
