ABSTRACT

Before the author writes about why Adam and all humans have family relations with ancient humans homo habilis, homo florensiensis, homo neanderthalensis, animals, plants, fungi, amoebaa, bacteria, viruses, first the author asks forgiveness from Allah SWT. Here the author tries to open the veil that covers the secret about why Adam and all humans have family relations with ancient humans homo habilis, homo florensiensis, homo neanderthalensis, animals, plants, fungi, amoebaa, bacteria, viruses, based on deoxyribonucleic acid (DNA).

There are several verses that open Allah's secrets about why Adam and all humans have family relations with ancient humans homo habilis, homo florensiensis, homo neanderthalensis, animals, plants, fungi, amoebaa, bacteria, viruses, namely the following verses:

"And verily We have created man from an essence of soil (Al Mu'minuun: 23:12).

"So when I have perfected the event and have breathed into it my spirit; then you should fall down prostrating to him." (Shaad: 38: 72).

"Then He perfected Adam and breathed into Adam His spirit and He made for you hearing, sight and hearts, you are very little grateful. (As Sajdah: 32: 9).

"He Who created you from from one self and from him He created his wife, that he might be pleased with her... (Al A'raaf: 7:189).

"Those who remember Allah while standing or sitting or lying down and they think about the creation of the sky and the earth: "Our God, You did not create this in vain, Glory be to You, so protect us from the torment of Hell. (Ali 'Imran: 3:191).

In an effort to open the veil of Allah's secret about why Adam and all humans have family relations with ancient humans homo habilis, homo florensiensis, homo neanderthalensis, animals, plants, fungi, amoebaa, bacteria, viruses, the author uses the basis of deoxyribonucleic acid.

HYPOTHESIS

Here the author proposes hypothesis why Adam and all humans have family relations with ancient humans homo habilis, homo florensiensis, homo neanderthalensis, animals, plants, fungi, amoebaa, bacteria, viruses, based on Deoxyribonucleic acid (DNA).

PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interactions.

QUARK

If we want to know quarks, then we consider one of the hydrogen atoms that is the building block of the human body, animals, plants and fruits and inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Then if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with gluons.

DEOXYRIBONUCLIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that forms a double helix and contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide consists of folate, a 5-carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytosine (C) and Thymine (T).

Guanine (G) consists of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytosine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. A 5-carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

Based on Deoxyribonucleic acid (DNA) humans are composed of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms. Where carbon, nitrogen, oxygen and hydrogen atoms are widely available around us and in the atmosphere.

WHY ADAM AND ALL HUMANS HAVE FAMILY RELATIONS WITH ANCIENT HUMANS HOMO HABILIS, HOMO FLORENSIENSIS, HOMO NEANDERTHALENSIS, ANIMALS, PLANTS, FUNGI, AMOEBAA, BACTERIA, VIRUSES

Now, we are still concentrating on uncovering the secrets contained behind the verses: *"He Who created you from one self...(Al A'raaf: 7:189)"... We have created human from a essence of soil (Al Mu'minuun: 23:12).*

Well, it turns out that Allah has clearly declared *"He Who created you from one self...(Al A'raaf: 7:189).*

Now a question arises,

What does Allah actually mean *"He Who created you from one self...(Al A'raaf: 7:189)?*

Well, the answer is in the secret behind the verse: *"...We have created human from an essence from soil (Al Mu'minuun: 23: 12).*

Apparently, Allah *"...created human from... soil (Al Mu'minuun: 23:12).*

Now, people all over the world understand that the soil contains carbon atoms, hydrogen atoms, nitrogen atoms and oxygen atoms. Or in other words, the soil contains *"...my spirit...(Shaad: 38:72)* or *"...Allah's spirit...(Shaad: 38:72).*

So, because Allah created human from *"...my spirit...(Shaad: 38:72)* or *"...Allah's spirit...(Shaad: 38:72)* or from carbon atoms, hydrogen atoms, nitrogen atoms and oxygen atoms, then whatever is in the seven skies and all that is in them, is built with *"...my spirit...(Shaad: 38:72)* or *"...Allah's*

spirit...(Shaad: 38:72).

Well, based on Allah's declaration "*He Who created you from one self...(Al A'raaf: 7:189)* means, humans were created from one cell, in which there is "*...my spirit...(Shaad: 38:72)* or "*...Allah's spirit...(Shaad: 38:72)* which is made up of carbon atoms, hydrogen atoms, nitrogen atoms and oxygen atoms.

Now another question arises,

What about "*...the creation of the sky and the earth...(Ali 'Imran: 3:191)*?

Well, the sky and the earth were created with "*...my spirit...(Shaad: 38:72)* or "*...Allah's spirit...(Shaad: 38:72)* which is built with carbon atoms, hydrogen atoms, atoms nitrogen and oxygen atoms.

So, actually, whatever is in the seven skies, was created by Allah with "*...my spirit...(Shaad: 38:72)* or "*...Allah's spirit...(Shaad: 38:72)* which built with carbon atoms, hydrogen atoms, nitrogen atoms and oxygen atoms.

Now, why do humans have a family relationship with animals, plants, fungi, amoeba, bacteria and also early humans?

The answer is hidden in the secret behind the verse: "*...He made for you hearing, sight and heart... (As Sajdah: 32: 9).*

It turns out that "*...hearing, seeing and heart...(As Sajdah: 32: 9)* is formed by Deoxyribonucleic acid (DNA), which contains hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms. Where Deoxyribonucleic acid (DNA) forms chromosomes that are inside cells.

Well, the creation of humans from this one self, is in the genetic code contained in the molecular structure of nucleic acids or DNA (Deoxyribonucleic acid) and through RNA (Ribonucleic acid) which has a role to synthesize proteins and carry out catalytic activities.

This genetic code is used by almost all types of living organisms from archaea, bacteria, plants, amoeba, fungi, animals to humans today. Since the genetic code is universal, the same genetic code applies to all types of living organisms. With the similarity of this genetic code we can say that humans living today have similarities in their genetic code with all other types of living organisms.

In other words, humans have a family relationship with all types of living organisms from archaea, bacteria, plants, amoeba, fungi, animals, ancient humans including Homo habilis, Homo georgicus, Homo ergaster, Homo erectus, Homo antecessor, Homo heidelbergensis, Homo florensiensis. and Homo neanderthalensis.

So, actually Adam and his descendants down to us today have family relationships with archaea, bacteria, plants, amoeba, fungi, animals, ancient humans including Homo habilis, Homo georgicus, Homo ergaster, Homo erectus, Homo antecessor, Homo heidelbergensis, Homo florensiensis and Homo neanderthalensis.

Or it could be said that actually Adam and his wife came from the descendants of homo neanderthalensis.

CONCLUSION

Based on the description above, we can conclude that the secrets contained behind the verses: *"He Who created you from one self...(Al A'raaf: 7:189)"...We have created human from a essence of soil (Al Mu'minuun: 23:12).*

Well, it turns out that Allah has clearly declared *"He Who created you from one self...(Al A'raaf: 7:189).*

Now a question arises,

What does Allah actually mean *"He Who created you from one self...(Al A'raaf: 7:189)?*

Well, the answer is in the secret behind the verse: *"...We have created human from an essence from soil (Al Mu'minuun: 23: 12).*

Apparently, Allah *"...created human from... soil (Al Mu'minuun: 23:12).*

Now, people all over the world understand that the soil contains carbon atoms, hydrogen atoms, nitrogen atoms and oxygen atoms. Or in other words, the soil contains *"...my spirit...(Shaad: 38:72)* or *"...Allah's spirit...(Shaad: 38:72).*

So, because Allah created human from *"...my spirit...(Shaad: 38:72)* or *"...Allah's spirit...(Shaad: 38:72)* or from carbon atoms, hydrogen atoms, nitrogen atoms and oxygen atoms, then whatever is in the seven skies and all that is in them, is built with *"...my spirit...(Shaad: 38:72)* or *"...Allah's spirit...(Shaad: 38:72).*

Well, based on Allah's declaration *"He Who created you from one self...(Al A'raaf: 7:189)* means, humans were created from one cell, in which there is *"...my spirit...(Shaad: 38:72)* or *"...Allah's spirit...(Shaad: 38:72)* which is made up of carbon atoms, hydrogen atoms, nitrogen atoms and oxygen atoms.

Now another question arises,

What about *"...the creation of the sky and the earth...(Ali 'Imran: 3:191)?*

Well, the sky and the earth were created with *"...my spirit...(Shaad: 38:72)* or *"...Allah's spirit...(Shaad: 38:72)* which is built with carbon atoms, hydrogen atoms, atoms nitrogen and oxygen atoms.

So, actually, whatever is in the seven skies, was created by Allah with *"...my spirit...(Shaad: 38:72)* or *"...Allah's spirit...(Shaad: 38:72)* which built with carbon atoms, hydrogen atoms, nitrogen atoms and oxygen atoms.

Now, why do humans have a family relationship with animals, plants, fungi, amoeba, bacteria and also early humans?

The answer is hidden in the secret behind the verse: *"...He made for you hearing, sight and heart... (As Sajdah: 32: 9).*

It turns out that *"...hearing, seeing and heart...(As Sajdah: 32: 9)* is formed by Deoxyribonucleic acid (DNA), which contains hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms. Where Deoxyribonucleic acid (DNA) forms chromosomes that are inside cells.

Well, the creation of humans from this one self, is in the genetic code contained in the molecular structure of nucleic acids or DNA (Deoxyribonucleic acid) and through RNA (Ribonucleic acid) which has a role to synthesize proteins and carry out catalytic activities.

This genetic code is used by almost all types of living organisms from archaea, bacteria, plants, amoeba, fungi, animals to humans today. Since the genetic code is universal, the same genetic code applies to all types of living organisms. With the similarity of this genetic code we can say that humans living today have similarities in their genetic code with all other types of living organisms.

In other words, humans have a family relationship with all types of living organisms from archaea, bacteria, plants, amoeba, fungi, animals, ancient humans including Homo habilis, Homo georgicus, Homo ergaster, Homo erectus, Homo antecessor, Homo heidelbergensis, Homo florensiensis. and Homo neanderthalensis.

So, actually Adam and his descendants down to us today have family relationships with archaea, bacteria, plants, amoeba, fungi, animals, ancient humans including Homo habilis, Homo georgicus, Homo ergaster, Homo erectus, Homo antecessor, Homo heidelbergensis, Homo florensiensis and Homo neanderthalensis.

Or it could be said that actually Adam and his wife came from the descendants of homo neanderthalensis.
