ABSTRACT

Before the author writes about why Allah accepted the thoughts of the Jewish rabbi about gan eden and gehenom, the author first asks Allah swt for forgiveness. Here the author tries to open the veil that covers the secret of why Allah accepted the thoughts of the Jewish rabbi about gan eden and gehenom, based on deoxyribonucleic acid (DNA).

There are several verses that reveal Allah's secrets about why Allah accepted the thoughts of the Jewish rabbi about gan eden and gehenom, namely the following verses:

"And indeed We have created man from an essence of soil (Al Mu'minuun: 23: 12)

"So when I have perfected the body and I have breathed on him my spirit, then you should fall down and prostrate to him." (Shaad: 38: 72)

"Then He perfected and breathed into it His spirit and He made for you hearing, sight and heart, you are very little grateful. (As Sajdah: 32: 9)

"life is nothing but our life in this world, we die and we live and will never be resurrected (Al Mu'minuun: 23: 37)

"Allah promises the believers, men and women, paradise 'Adn, beneath which rivers flow, eternally in them, and a good place in paradise 'Adn. And the pleasure of Allah is greater, it is a great fortune. (At Tauba : 9: 72)

"Allah said: "Enter all of you into hell with the jinn and humans who came before you... (Al A'raaf: 7: 38)

In an effort to uncover Allah's secret veil about why Allah accepted the thoughts of the Jewish rabbi about gan eden and gehenom, the author uses deoxyribonucleic acid as the basis.

HYPOTHESIS

Here the author proposes a hypothesis why Allah accepted the thoughts of the Jewish rabbi about gan eden and gehenom, based on Deoxyribonucleic acid (DNA)?

PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interaction.

QUARK

If we want to know about quarks, then we have to look at one of the hydrogen atoms, which is the building element of the human body, animals, plants and fruits, as well as inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. So if this

proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with a gluon.

DEOXYRIBONUCLEATED ACID (DNA)

DNA is a storehouse of genetic information that has a double structure that forms a double helix and contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide consists of folate, a 5-carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytosine (C) and Thymine (T).

Guanine (G) consists of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytosine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 atom of phosphorus, 4 atoms of oxygen and 2 atoms of hydrogen. A 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

Based on human Deoxyribonucleic acid (DNA), it consists of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms. Where carbon, nitrogen, oxygen and hydrogen atoms are widely available around us and in the atmosphere.

WHY ALLAH ACCEPTED THE THOUGHTS OF THE JEWISH RABBI ABOUT GAN EDEN AND GEHENOM

Now, we are still concentrating on dismantling the secrets contained behind the verses: "*...I breathed on him my spirit...(Shaad : 38: 72)*" "*...We have created man from an essence of soil. (Al Mu'minuun: 23: 12)*

Well, here, Allah has declared for all people in the world "*...We have created man from an essence of soil (Al Mu'minuun: 23: 12)*

Now, the question arises,

"*...an essence of soil (Al Mu'minuun: 23: 12)* and what does it have to do with the Jewish belief about Adam?"

Well, it turns out that in soil contains hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms.

Well, according to Jewish belief, Jahve breathed into Adam's nostrils so that Adam would live.

So, now another question arises,

What exactly do the Jews believe that Jahve breathed into Adam's nostrils?

Well, it turns out that Jahve breathed into Adam's nostrils meaning, Jahve breathed oxygen atoms into Adam's lungs.

Well, did the Jews understand that the oxygen atoms were blown by Jahve into Adam's lungs through Adam's nostrils?

The answer is, when the Jews understood that the oxygen atoms that were breathed by Jahve into Adam's nostrils, Adam lived, then when Adam's heart and all organs were no longer functioning,

Adam died.

So, the question again, now is,

What will happen to Adam after Adam died according to the Jews?

Well, the answer is, Jews only believe in life in the here and now.

That is, after Adam died, Adam's life story ended.

So actually, because the Jews did not believe there was life in the afterlife, when Jahve breathed into Adam's nostrils it was so that Adam would only live in this world.

When Adam died, because his heart and all his organs were no longer functioning, then Adam's life would end there.

So, now another question arises,

Why, since 2612 years ago, have some Jews been talking about, **gan eden** which means paradise and there is **gehennom** which means hell, when in fact the Jews do not believe in paradise and hell?

Well, the answer is, when the Babylonian King Nebuchadnessar, in present-day Southern Iraq, in 589 BC occupied the present Jerusalem area, for 2 years the Jews living in Jerusalem were under pressure from the Babylonian King Nebuchadnessar.

Well, because the Jews were under pressure from the Babylonian King Nebuchadnessar, the thoughts of the Jewish rabbi emerged about life after human death. According to the Jewish rabbi at that time, there was **gan eden** which means paradise and there is **gehennom** which means hell.

So, there appeared **gan eden** which means paradise and there was **gehennom** which means hell, because the brains of the Jewish rabbins had worked, not because it was in the teachings of Judaism.

Now, when Islam came, Allah acknowledged that there was **gan eden** which means paradise and there was **gehennom** which means hell *"Allah promises the believers...paradise of 'Adn...(At Taubah : 9: 72)" Allah says: "Enter you all into hell ... (Al A'raaf: 7: 38)*

Well, *"...paradise of 'Adn...(At Taubah : 9: 72)* is **gan eden** according to the ideas of the Jewish rabbi. As for *"...hell...(Al A'raaf: 7: 38)* is **gehennom** according to the ideas of the Jewish rabbi.

So, here, Allah has confirmed the results of the thoughts of the Jewish rabbi, **gan eden** which means paradise and there is **gehennom** which means hell.

Where before the Babylonian King Nebuchadnessar controlled Jerusalem in 589 BC, the Jews did not believe in paradise and hell.

But, of course, the fact remains that, until recently, most Jews did not believe in **gan eden** and **gehennom**.

CONCLUSION

Based on the description above, we can conclude that the secrets contained behind the verses: *"....I breathed on him my spirit...(Shaad : 38: 72)"...We have created man from an essence of soil. (Al*

Mu'minuun: 23: 12)

Well, here, Allah has declared for all people in the world "...*We have created man from an essence of soil (Al Mu'minuun: 23: 12)*

Now, the question arises,
