**ABSTRACT**

Firstly, by asking Allah's forgiveness, here I try to reveal the signs of Allah's greatness regarding the secret of why Allah describes human life in paradise and hell, like human life on earth, from the point of view of photons, quarks and the molecular structure of nucleic acids. or deoxyribonucleic acid (DNA)

Signs of Allah's greatness regarding why Allah describes human life in paradise and hell, like human life on earth, are found in several verses, namely:

*"He is the First and the Last, the Outward and the Inward, and He is All-Knowing of all things. (Al Hadid: 57:3)*

*"And give good tidings to those who believe and do good, that for them there are provided gardens with rivers flowing in them. Every time they are given sustenance of fruit in those paradises, they say: "This is what was given to them. us first." They are given similar fruits and for them are pure wives and they will abide therein (Al Baqarah: 2:25)*

*"So when I have perfected the event, and have breathed into it my spirit, then submit to it prostrating yourself (Al Hijr: 15: 29)*

*"Allah promises the believers, male and female, paradise under which rivers flow, they will abide therein, there are good places in paradise 'Adn. And Allah's pleasure is greater; that is great fortune. (At Taubah: 9:72)*

*"Allah threatens the male and female hypocrites and the disbelievers with Hellfire, they will abide in it forever. Hell is sufficient for them, and Allah has cursed them, and for them an eternal punishment. (At Taubah: 9:68)*

*"Indeed Allah will admit those who believe and do righteous deeds into Paradises beneath which rivers flow. In Paradise they are adorned with gold and pearl bracelets, and their clothing is silk. (Al Hajj :22:23)*

*"And We put before them a wall and behind them a wall, and We covered them so that they could not see. (Yaasiin: 36:9)*

*"Those who were earlier, were first from the emigrants and the Ansar and those who followed them well, Allah is pleased with them and they are pleased with Allah and Allah has provided for them paradises in which rivers flow. forever. They stay in it. That's a big win. (At Taubah: 9: 100)*

*"Then He perfected and breathed into it His spirit and He made for you hearing, sight and hearts; you are very little grateful. (As Sajdah: 32: 9)*

*Allah said: "Enter all of you into hell with the jinn and humans who went before you. Every time a people enter, he curses his friend; so that when they all entered, those who entered later among them said to those who entered earlier: "Our Lord, they have led us astray, so bring upon them a double torment from hell." Allah said: "Each one gets a double, but you do not know." (Al A'raaf : 7:38)*

In an effort to unmask the greatness of Allah SWT regarding why Allah describes human life in paradise and hell, as human life on earth, I use the basis of photons, quarks and the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

## **HYPOTHESIS**

Here I propose the hypothesis that Allah describes human life in paradise and in hell, like human life on earth, so that humans can understand, judging from the photons, quarks and the molecular structure of nucleic acid or deoxyribonucleic acid (DNA)?

## **PHOTON**

Photons are elementary particles of the boson type and carriers of electromagnetic interactions.

## **QUARK**

If we want to know quarks, then we consider one of the hydrogen atoms that is the building block of the human body, animals, plants and fruits and inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Then if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with gluons.

## **DEOXYRIBONUCLEIC ACID (DNA)**

DNA is a repository of genetic information that has a double structure that form a double helix and which contains polynucleotide macromolecules arranged in repeatedly from nucleotide polymers. This nucleotide is composed of folate, a 5-carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine(A), Cytocine(C) and Thymine (T).

Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 atom oxygen and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

## **ALLAH DESCRIBED HUMAN LIFE IN PARADISE AND HELL, AS HUMAN LIFE ON EARTH**

Now, we are still concentrating on revealing the secrets that are hidden in the verses: *"And give good tidings to those who believe and do good, that for them are provided paradises with rivers flowing in them. Each of them is given sustenance. fruits in those paradises, they say: "This is what was given to us in the past." They are given similar fruits and for them are pure wives and they will abide therein forever. (Al Baqarah: 2:25) "Allah threatens the male and female hypocrites and the disbelievers with Hellfire, they will abide in it forever. Hell is sufficient for them, and Allah has cursed them, and for them is an everlasting torment. (At Taubah: 9:68)*

Now, apparently, life in paradise "...they abide in it. (Al Baqarah: 2:25) and life in hell "...they will abide in it...(At Taubah: 9:68)

Now the question arises,

How long do humans live in paradise and in hell?

The answer is hidden in the secret behind the verse: *"He is the First and the Last... (Al Hadid: 57: 3)*

Well, it turns out that Allah, *"He is... the Last... (Al Hadid: 57: 3)*

It means, "...my spirit...(Al Hijr : 15: 29) will live to the age of 10 000000000 000000000 000000000 000000000 000000000 000000000 000000000 000000000 000000000 years. After that "... my spirit... (Al Hijr: 15: 29) will disappear, return to energy, return to Allah.

Why "... my spirit... (Al Hijr: 15: 29) will disappear after reaching a very long age?

Because, in "...my spirit...(Al Hijr: 15: 29) contains hydrogen atoms, nitrogen atoms, carbon atoms and oxygen atoms. These atoms will disappear, returning to energy, quarks and photons. Where the energy returns to Allah, it becomes Allah's energy.

**IN PARADISE AND IN HELL HUMANS WILL LIVE TO THE AGE OF 10 000000000 000000000 000000000 000000000 000000000 000000000 000000000 000000000 000000000 YEARS**

Now, because humans will live to the age of 10 000000000 000000000 000000000 000000000 000000000 000000000 000000000 000000000 years, then what is called a human is "...my spirit...(Al Hijr: 15: 29) . Because "... my spirit... (Al Hijr: 15: 29) which will reach a very long and long age. The human body, it will not be possible until it reaches the age of that level and that long.

**THE ACTUAL PICTURE OF PARADISE AND HELL IS A PICTURE OF MY SPIRIT THAT LIVES TO THE AGE OF 10 000000000 000000000 000000000 000000000 000000000 000000000 000000000 000000000 YEARS**

So, the real life in paradise and in hell is the life of "... my spirit... (Al Hijr: 15: 29).

As for the description "...flowing rivers in it...They are given similar fruits...there are holy wives...(Al Baqarah: 2:25) "...they are given jewelry with bracelets of gold and pearls, and their garments were silk. (Al Hajj: 22:23)

Everything, it is a picture of human life on earth today. In fact, they are atoms, hydrogen atoms, nitrogen atoms, carbon atoms, and oxygen atoms.

Why did Allah describe life in paradise and hell as life on earth today?

The answer is,

Hidden in the secret behind the verse: *"And We put before them a wall and behind them a wall, and We covered them so that they could not see. (Yaasiin: 36: 9)*

Well, it turns out that the human eye's view is limited, because the human eye can only see light in the electromagnetic spectrum region between 430 and 740 nanometers.

So, what is really happening in hell and in heaven, people now can't see it, even though paradise has actually been opened. "... Allah is pleased with them and they are pleased with Allah and Allah has prepared for them paradises in which rivers flow forever... (At Taubah: 9: 100)

Likewise hell already exists and has been opened." *Allah says: "Enter all of you into hell with the jinn and humans who were before you... (Al A'raaf: 7: 38)*

So, actually, Allah described the situation in paradise and in hell as in the world today, so that people would understand. Because if it is described with life "... my spirit... (Al Hijr: 15: 29) together with hydrogen atoms, nitrogen atoms, carbon atoms and oxygen atoms, humans will not understand.

## CONCLUSION

From what has been described above we can now conclude that the secrets that are hidden in the verses: *"And give good tidings to those who believe and do good, that for them are provided paradises with rivers flowing in them. Each of them is given sustenance. fruits in those paradises, they say: "This is what was given to us in the past."
