ABSTRACT

Before the author writes about the problem of why Allah is everywhere, also in humans, I first ask forgiveness from Allah SWT. Here I try to unravel the mystery of why Allah is everywhere, also in humans, from the point of view of the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

There are several verses that become Allah's secret unlocking tool about why Allah is everywhere, also in humans, namely the following verses:

"Allah... the light of the skys and the earth... the light upon the light... (An Nuur: 24: 35)

"Indeed We see your face looking up to the sky, then We will turn you to the Qibla that you like. Turn your face towards the Grand Mosque. And wherever you are, turn your face towards it. And indeed those who were given the Book do know, that turning to the Grand Mosque is true from their Lord, and Allah is never unaware of what they are doing (Al Baqarah: 2:144)

"And it is not possible for any human being that Allah can speak to him except by means of revelation or behind a veil or by sending a messenger and then it is revealed to him with His permission what He wills. Indeed, He is Most High, Most Wise. (Ash Syuura: 42:51)

"When I have perfected the event, and have breathed into it my spirit, then submit to it prostrating yourself (Al Hijr: 15: 29)

"And We made a wall before them and behind them a wall, and We covered them so that they could not see." (Yaasiin: 36:9)

"And verily We have created man and know what his heart whispers, and We are nearer to him than his jugular vein." (Qaf: 50:16)

"Then He perfected and breathed into it His spirit and He made for you hearing, sight, and heart; you are very little grateful." (As Sajdah: 32: 9)

"So when I have perfected the event and have breathed into it my spirit; then you should fall down prostrating to him." (Shaad: 38: 72)

"The angels and Gabriel ascended to Allah in a day the measure of which was fifty thousand years (Al Ma'aarij: 70:4)

"He is the First and the Last, the Outward and the Inward, and He is All-Knowing of all things. (Al Hadid: 57:3)

"Then He perfected and breathed into it His spirit and He made for you hearing, sight and heart; you are very little grateful. (As Sajdah: 32: 9)

"And Mary, the daughter of Imran, who kept her honor, so We breathed into her some of Our spirits, and she confirmed the words of her Lord and His Books, and she was one of the obedient ones. (At Tahrir: 66:12)

"And when My servants ask you about Me, then, that I am near. I grant the supplication of those who pray when they ask Me, then let them fulfill (all My commands) and let them believe in - Me, that they may always be in the truth (Al Baqarah: 2: 186)

"... We are closer to him than his jugular vein, (Qaf: 50:16)

"He is Allah, Who created all that is on earth for you and He willed the heavens, then He made the seven skys. And He is All-Knowing of all things. (Al Baqarah: 2:29)

In an effort to unmask Allah's secrets about why Allah is everywhere, also in humans, I use the basis of deoxyribonucleic acid or deoxyribonucleic acid or the molecular structure of nucleic acids.

HYPOTHESIS

Here I propose the hypothesis that Allah is everywhere, including in humans, because of Allah's energy, seen from the point of view of Deoxyribonucleic acid (DNA).

DEOXYRIBONUCLIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that forms a double helix and contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide consists of folate, a 5-carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytosine (C) and Thymine (T).

Guanine (G) consists of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytosine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. A 5-carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

FOR WHAT REASON ALLAH IS EVERYWHERE, ALSO IN HUMANS

Now, we are still concentrating on uncovering the secret behind the verse: *"... the Beginning... (Al Hadiid: 57: 3)*

Now the question arises, since when did Allah actually exist in the universe?

The answer is,

It is hidden in the secret behind the verse: *"He is the First... (Al Hadiid: 57: 3) "... Allah... He willed the heavens, then He made seven skys... (Al Baqarah: 2: 29)*

Well, it is Allah who made *"... the seven skys... (Al Baqarah: 2: 29)* , meaning the seven skys which are now called the universe with its contents consisting of billions of galaxies, where each galaxy consists of billions of stars, planets and moons.

It turns out that Allah existed before the universe was created *"He is the First... (Al Hadiid: 57: 3)*

When was the universe created?

The answer is,

The universe was created about 13 800 000 000 years ago according to human calculations. Meanwhile, according to Allah's calculation it was about 756 years ago, because according to Allah's reckoning 1 day is 50 000 years according to human calculations *"...a day whose content is fifty thousand years (Al Ma'aarij: 70: 4)*

So if it is calculated according to Allah's calculations, then in fact the universe is only 756 years old.

Well, Allah created the universe called *"... the seven skys... (Al Baqarah: 2: 29)* with Allah's energy. Where Allah's energy is what makes atomic nuclei called quarks.

So, by Allah's energy quarks were created, wherein quarks gave birth to atoms, and atoms gave birth to the universe. Or in other words, Allah's Energy is the source of everything in this universe.

Because Allah's energy that makes quarks and quarks is the nucleus of atoms, then this Allah's energy is also what gave birth to *"... my spirit... (Al Hijr: 15: 29)* because quarks are made up of hydrogen atoms, atoms, oxygen, nitrogen atoms and carbon atoms. Likewise, *"...my spirit...(Al Hijr: 15: 29)* is made up of hydrogen atoms, atoms, oxygen, nitrogen atoms and carbon atoms.

Or in other words, *"... my spirit... (Al Hijr: 15: 29)* which is born by Allah's energy through quarks is the building of the human body, because Allah *"...has breathed into it my spirit...(Al Hijr : 15:29)*

Or in other words, Allah's energy is in the human body, therefore Allah is *"...closer to him than his jugular vein." (Qaf: 50:16)*

MOST OF HUMANS STILL THINK ALLAH IS OUTSIDE THE HUMAN BODY AND THINK ALLAH IS FAR IN THE SKY

Well, it turns out that now it has been revealed that the energy of Allah that gives birth to the quarks, the source of life for the universe and its contents, including humans, is a form of Allah in the human body.

So if there are still most people who loudly plead with Allah, then in fact most of these humans do not understand about Allah who gave birth to Allah's energy in the human body *"...I am near... (Al Baqarah: 2: 186)*

CONCLUSION

Based on the description above, we can conclude that the secret behind the verse: *"... the Beginning... (Al Hadiid: 57: 3)*

Now the question arises, since when did Allah actually exist in the universe?

The answer is,

It is hidden in the secret behind the verse: *"He is the First... (Al Hadiid: 57: 3) "... Allah... He willed the heavens, then He made seven skys... (Al Baqarah: 2: 29)*
