ABSTRACT

First of all, by asking forgiveness from Allah SWT here the author tries to reveal the signs of Allah SWT's greatness regarding why Allah says Allah's spirit in paradise and hell is eternal when in fact it is not eternal, based on the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

There are several verses that reveal Allah's secret about why Allah says Allah's spirit in paradise and hell is eternal when in fact it is not eternal, namely the following verses:

"Then He perfected and breathed into it His spirit and He made for you hearing, sight and hearts; you are very little grateful. (As Sajdah: 32: 9)

"So when I have perfected the event and have breathed into it my spirit; then you should fall down prostrating to him." (Shaad: 38: 72)

"The paradise of 'Adn which they enter into, rivers flow under it, in that paradise they will find everything they want. Thus Allah will reward those who are pious, (An Nahl: 16: 31)

"In Paradise there will be a lot of fruit for you, some of which you eat. (Az Zukhruf: 43:73)

"Enter you into heaven, you and your wives will be rejoiced." (Az Zukhruf: 43:70)

"Those who were earlier, were first from the emigrants and the Ansar and those who followed them well, Allah is pleased with them and they are pleased with Allah and Allah has prepared for them paradises in which rivers flow. forever. They stay in it. That's a big win. (At Taubah: 9: 100)

"When the sun is rolled up, (At Takwiir: 81: 1)

Allah said: "Enter all of you into hell with the jinn and humans who went before you. Every time a people enter, he curses his friend; so that when they all enter say those who enter later among them say to those who entered earlier: "Our Lord, they have led us astray, so bring upon them a double torment from hell." Allah said: "Each one gets a double, but you do not know." (Al A'raaf : 7:38)

"And verily We made for Hell most of the jinn and humans, they have hearts, but they do not use to understand and they have eyes they do not use to see, and they have ears they do not use to hear. They are like cattle, they are even more misguided. They are the ones who are negligent. (Al A'raaf: 7:179)

"And whoever disobeys Allah and His Messenger and violates His statutes, Allah will surely put him in the fire of hell while he abides therein; and for him is a humiliating torment. (An Nisaa ': 4: 14)

"And as for those who are wicked, their place is Hell. Every time they want to get out of it, they are returned to it and it is said to them: "Taste the torment of hell, which you used to deny." (As Sajdah: 32:20)

"And if We had willed, We would have given every soul guidance, but the word has remained from Me: "Indeed, I will fill the Hell with jinns and humans together." (As Sajdah: 32:13)

"Allah, there is no god but He Who Lives eternally and continually takes care of; neither sleeps nor sleeps. To Him belongs what is in the heavens and the earth. No one can intercede with Allah without His permission? Allah knows what is before them and behind them, and they know nothing of Allah's knowledge except what He wills. Allah's seat covers the heavens and the earth. And Allah does not find it difficult to maintain them, and Allah is Most High, Most Merciful. Great.(Al Baqarah: 2:255)

"Their faces are burned by the fire of hell, and they are in that hell in disfigurement. (Al Mu'minun: 23:104)

In an effort to open the veil of Allah's secret about why Allah says Allah's spirit in paradise and hell is eternal when in fact it is not eternal, the author uses the basis of deoxyribonucleic acid or deoxyribonucleic acid or the molecular structure of nucleic acids.

HYPOTHESIS

Here the author proposes the hypothesis that Allah says Allah's spirit in paradise and hell lives eternally when in fact it is not eternal, because Allah's spirit is limited, based on Deoxyribonucleic acid (DNA).

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that form a double helix and which contains polynucleotide macromolecules arranged in repeatedly from nucleotide polymers. This nucleotide is composed of folate, a 5-carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine(A), Cytocine(C) and Thymine (T).

Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 atom oxygen and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms. 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

WHY DOES ALLAH SAY ALLAH'S SPIRIT IN PARADISE AND HELL LIFE IS ETERNAL, BUT ACTUALLY, IS NOT ETERNAL

Now, we still continue to focus all of our minds on uncovering the secrets that are hidden behind the verse: *"... Allah has provided for them paradises where rivers flow in them forever and ever. They are eternal in it ... (At Taubah: 9: 100) "... whoever disobeys Allah and His Messenger and violates His provisions, Allah will surely put him in the fire of hell while he eternal in it... (An Nisa': 4: 14)*

It turns out that here Allah declares *"... for them the paradise... They are eternal in it... (At Taubah: 9: 100)"... whoever disobeys Allah and His Messenger... Allah puts him in hell fire...he eternal in it...(An Nisaa ': 4: 14)*

Well, *"...my spirit...(Shaad: 38:72) or "...Allah's spirit..(Shaad: 38:72) that goes to paradise and hell"...They are eternal in it . ..(At Taubah: 9: 100)*

Now the question arises,

What exactly is meant by Allah “...*They are eternal in it...*(At Taubah: 9: 100)?

The answer is

Hidden in the secret behind the verse: "*Allah, there is no god but He Who Lives eternally...* (Al Baqarah: 2:255)

Well, it turns out that "*...Who Lives eternally...* (Al Baqarah: 2:255) is Allah.

So, because paradise and hell and "*...my spirit...(Shaad: 38:72)* or "*...Allah's spirit..(Shaad: 38:72)* are built with hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms, then the atoms will not be eternal, the atoms are limited in life.

Hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms will be lost when the nuclear energy holding the quarks in the atoms is lost. According to human calculations, hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms will disappear, returning to Allah's energy, after reaching the age of 10 000000000 000000000 000000000 000000000 000000000 000000000 000000000 000000000 000000000 000000000 years.

So, actually what Allah has declared is "*...for them the paradise...They are eternal in it...*(At Taubah: 9: 100)" "*...whoever disobeys Allah and His Messenger...Allah put him in hell fire...he is eternal in it...*(An Nisaa' : 4: 14) is "*...eternally...*(At Taubah: 9: 100) according to human calculations with a period of 10 000000000 000000000 000000000 000000000 000000000 000000000 000000000 000000000 000000000 000000000 years.

Well, this is Allah's secret, that in Paradise and in hell "*...my spirit...(Shaad: 38:72)* or "*...Allah's spirit..(Shaad: 38:72)* lives "*...eternally ...*(At Taubah: 9: 100) as long as hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms have not been lost.

CONCLUSION

Based on the description above, we can conclude that the secrets that are hidden behind the verse: "*... Allah has provided for them paradises where rivers flow in them forever and ever. They are eternal in it ...* (At Taubah: 9: 100) "*... whoever disobeys Allah and His Messenger and violates His provisions, Allah will surely put him in the fire of hell while he eternal in it...* (An Nisa': 4: 14)

It turns out that here Allah declares "*... for them the paradise... They are eternal in it...* (At Taubah: 9: 100)" "*... whoever disobeys Allah and His Messenger... Allah puts him in hell fire...he eternal in it...*(An Nisaa' : 4: 14)

Well, "*...my spirit...(Shaad: 38:72)* or "*...Allah's spirit..(Shaad: 38:72)* that goes to paradise and hell"*...They are eternal in it . ..*(At Taubah: 9: 100)

Now the question arises,
