## ABSTRACT

First of all, by asking forgiveness from Allah SWT, here I try to reveal the signs of Allah SWT regarding the secret of why in my spirit there are hydrogen atoms, carbon atoms, oxygen atoms and nitrogen atoms, from the point of view of photons, quarks and the molecular structure of nucleic acids. or deoxyribonucleic acid (DNA)

Signs of Allah's greatness regarding why in my spirit there are hydrogen atoms, carbon atoms, oxygen atoms and nitrogen atoms, are found in several verses, namely:

*"Allah, there is no god but He Who Lives eternally and continually takes care of; neither sleeps nor sleeps. To Him belongs what is in the heavens and the earth. No one can intercede with Allah without His permission? Allah knows what is before them and behind them, and they know nothing of Allah's knowledge except what He wills. Allah's seat covers the heavens and the earth. And Allah does not find it difficult to maintain them, and Allah is Most High, Most Merciful. Great. (Al Baqarah: 2:255)*

*"He is Allah, Who created all that is on earth for you and He willed the heavens, then He made the seven heavens. And He is All-Knowing of all things. (Al Baqarah: 2:29)*

*"So when I have perfected the event, and have breathed into it my spirit, then submit to it prostrating yourself (Al Hijr: 15: 29)*

*"The angels and the spirit (Gabriel) ascend to God in a day whose level is fifty thousand years Al Ma'aarij (70:4)*

*"Then He perfected and breathed into it His spirit and He made for you hearing, sight and hearts; you are very little grateful. (As Sajdah: 32: 9)*

*"He is the First and the Last, the Outward and the Inward; and He is All-Knowing of all things. (Al Hadid: 57:3)*

*"And they do not glorify Allah with proper exaltation when the whole earth is in His hands on the Day of Resurrection and the heavens are rolled up with His right hand. Glory be to God and exalted is He from what they associate with. (Az Zumar: 39: 67) Indeed, the Day of Judgment will surely come, there is no doubt about it, but most people do not believe (Al Mu'min: 40: 59)*

In an effort to unmask the greatness of Allah SWT regarding why in my spirit there are hydrogen atoms, carbon atoms, oxygen atoms and nitrogen atoms, I use the basis of photons, quarks and the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

## HYPOTHESIS

Here I propose a hypothesis, in my spirit there are hydrogen atoms, carbon atoms, oxygen atoms and nitrogen atoms, because quarks arise through God's energy, seen from photons, quarks and the molecular structure of nucleic acids or deoxyribonucleic acid (DNA).

## PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interactions.

## QUARK

If we want to know quarks, then we consider one of the hydrogen atoms which is the building block of the human body, animals, plants and fruits and inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Then if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with gluons.

## DEOXYRIBONUCLEIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that form a double helix and which contains polynucleotide macromolecules arranged in repeatedly from nucleotide polymers. This nucleotide is composed of folate, a 5-carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine(A), Cytocine(C) and Thymine (T).

Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 atom oxygen and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms. 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5 carbon sugar has 5

## MY SPIRIT THAT IS BLOWED BY ALLAH INTO HUMAN BODY, CONTAINS HYDROGEN ATOM, CARBON ATOM, OXYGEN ATOM AND NITROGEN ATOM

Now, we are still focusing our minds on uncovering the secret hidden behind the verse: *"...I have perfected the event, and have breathed into it my spirit...(Al Hijr: 15: 29)*

It turns out that my spirit contains hydrogen atoms, carbon atoms, oxygen atoms and nitrogen atoms.

Why are there hydrogen atoms, carbon atoms, oxygen atoms and nitrogen atoms in my spirit?

The answer is

Hidden in the secret behind the verse: *"He is the First... Al Hadid: 57: 3)*

That is, when the universe is still a core that cannot be seen by the human eye, that is, when Allah's energy forms quarks, which are the source of life for all the atoms in this universe.

It is through these quarks that hydrogen atoms, oxygen atoms, nitrogen atoms and carbon atoms are formed.

Well, hydrogen atoms, oxygen atoms, nitrogen atoms and carbon atoms that make up my spirit, which is breathed by Allah into all humans born into the world.

Why is my spirit formed by hydrogen atoms, oxygen atoms, nitrogen atoms and carbon atoms?

The answer is

Hidden in the secret behind the verse: *"...He willed the skys, then He made seven skys... (Al Baqarah: 2: 29)*

Well, with the will of Allah, to create *"... the seven skys... (Al Baqarah: 2: 29)* ,

Where *"... the seven skys... (Al Baqarah: 2: 29)* or what is called the universe, in which there are objects including all living things, built by hydrogen atoms, oxygen atoms, nitrogen atoms and carbon atoms.

Allah with Allah's energy forms quarks, then quarks form hydrogen atoms, oxygen atoms, nitrogen atoms and carbon atoms.

Or in other words, with Allah's energy, quarks, hydrogen atoms, oxygen atoms, nitrogen atoms and carbon atoms are born.

Since Allah is the source of energy that makes up quarks, hydrogen atoms, oxygen atoms, nitrogen atoms and carbon atoms, whatever comes out of Allah contains oxygen atoms, nitrogen atoms and carbon atoms.

My spirit which comes from Allah directly, contains hydrogen atoms, oxygen atoms, nitrogen atoms and carbon atoms.

## CONCLUSION

From what has been described above we can now conclude that the secret hidden behind the verse: *"...I have perfected the event, and have breathed into it my spirit...(Al Hijr: 15: 29)*

It turns out that my spirit contains hydrogen atoms, carbon atoms, oxygen atoms and nitrogen atoms.

Why are there hydrogen atoms, carbon atoms, oxygen atoms and nitrogen atoms in my spirit?

The answer is

Hidden in the secret behind the verse: *"He is the First... Al Hadid: 57: 3)*

My spirit which comes from Allah directly, contains hydrogen atoms, oxygen atoms, nitrogen atoms and carbon atoms.
