ABSTRACT

First of all, by asking forgiveness from Allah SWT, here I try to reveal the signs of the greatness of Allah SWT regarding why Isa son of Maryam is still being worshiped as son of God, even though hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms are blown into his body, based on the molecular structure of nucleic acids or deoxyribonucleic acid (DNA)

There are several verses that become Allah's secret unlocking tool regarding why Isa son of Maryam is still worshiped as son of God, even though hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms are breathed into his body, namely the following verses:

"And they ask you about the spirit. Say: "The spirit belongs to the business of my Lord, and you are not given knowledge but a little." (Al Israa ': 17: 85)

"So he put a veil from them; then We sent our spirit to him, and he appeared before him a perfect human being. (Maryam: 19:17)

"He said: "Indeed I am only a messenger of your Lord, to give you a pure son." (Maryam: 19: 19)

"Gabriel said: "So it is." Your Lord said: "That thing is easy for Me; and that We may make it a sign for mankind and as a mercy from Us; and it is a matter that has been decided." (Maryam: 19:21)

"Then He perfected and breathed into it His spirit and He made for you hearing, sight and heart; you are very little grateful. (As Sajdah: 32: 9)

"And Mary, who has kept her honor, then We breathed into her a spirit from Us and We made her and her child a great sign to the worlds. (Al Anbiyaa': 21: 91)

"And Mary, the daughter of Imran, who kept her honor, so We breathed into her some of Our spirits, and she confirmed the words of her Lord and His Books, and she was one of the obedient ones. (At Tahrir: 66:12)

"So when I have perfected the event, and have breathed into it my spirit, then submit to it prostrating yourselves (Al Hijr: 15: 29)

"And verily We brought the Book to Moses, and We followed after him with messengers, and We gave evidences of truth to Jesus the son of Mary and We strengthened it with the Holy Spirit. Does every messenger come to you bringing something that not according to your desires and you are arrogant; then you deny some people and kill some people? (Al Baqarah: 2:87)

"And if We made the apostle an angel, We would certainly have made him a man and, of course, We would have doubted about them what they doubted about themselves (Al An'aam: 6:9)

"So when I have perfected the event and I have breathed into it My spirit; then you should fall down prostrating to it." (Shaad: 38:72)

"And verily We have created man and know what his heart whispers, and We are nearer to him than his jugular vein." (Qaf: 50:16)

In an effort to open the veil of Allah's secret about why Isa son of Maryam is still worshiped as son of God, even though hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms are blown into his body, I use the basis of deoxyribonucleic acid or deoxyribonucleic acid or the molecular structure of nucleic acids.

HYPOTHESES

Here I propose the hypothesis that Isa son of Maryam is still worshiped as son of God, even though hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms are blown into Maryam's womb, because if the emperor Konstantin's decision 325 years after Prophet Isa died in Nicaea or in Iznik Turkey, that Prophet Isa is son of God and is considered God, so if now the decision is considered wrong, the belief in Isa son of Maryam is lost as son of God, seen from the basic point of Deoxyribonucleic acid (DNA)

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that form a double helix and which contains polynucleotide macromolecules arranged in repeatedly from nucleotide polymers. This nucleotide is composed of folate, a 5-carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine(A), Cytocine(C) and Thymine (T). Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5-carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

Based on Deoxyribonucleic acid (DNA) humans are composed of 32.20% atoms carbon, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms.

HYDROGEN ATOM, CARBON ATOM, NITROGEN ATOM AND OXYGEN ATOM THAT ARE THE BUILDING OF DNA, THAT ARE BLOWED INTO MARYAM'S WOMEN

Now, we still continue to focus our minds in order to uncover the secrets hidden behind the verse:
"... We breathed into her womb some of our spirits... (At Tahrir: 66:12)

In fact, what Allah declared *"...Our spirit...(At Tahrir: 66:12)* was used as an excuse that Allah was incarnated as Isa, son of Maryam, and at the same time as son of Allah.

In fact, *"...Our spirit...(At Tahrir: 66: 12)* is made up of hydrogen atoms, carbon atoms, oxygen atoms and nitrogen atoms, which are the building blocks of Deoxyribonucleic acid (DNA). Where according to human DNA is composed of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms.

IF THE BELIEVE IN JESUS THE SON OF MARYAM AS THE SON OF GOD, NOW IS CONSIDERED WRONG, THEN DESTROYED THE DECISION OF EMPEROR CONSTANTIN THAT DECLARE JESUS THE SON OF MARYAM AS THE SON OF GOD

Now, Emperor Constantine decided, 325 years after Prophet Isa died, in Nicaea or in Iznik Turkey, that Prophet Isa was the son of God and was considered God.

So, actually when Isa son of Maryam was still alive and spreading his teachings, he was not considered an incarnation of God or son of God.

However, after Isa the son of Maryam died, various human opinions emerged, such as Emperor Konstantin decided, 325 years after Prophet Isa died, that Isa the son of Maryam was the son of God, some people believe Isa the son of Maryam is the incarnation of God, some people see Isa the son of Maryam rose into the air with his body, some people believe that Isa son of Maryam will return to earth with his body.

HOLY SPIRIT IS BUILT WITH HYDROGEN ATOM, CARBON ATOM, NITROGEN ATOM AND OXYGEN ATOM

Well, the holy spirit is a part of belief for most people in this world, which cannot be separated. Where God breathes the holy spirit, which is made up of hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms.

So, God, Isa aputera Maryam and the holy spirit, according to the beliefs of most people in the world, cannot be separated, three is one, one is three.

Well, this belief is real, its foundation is not strong.

Why is the base not strong?

Because, actually in Allah in the form of Allah's energy there are hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms. Without hydrogen atoms, carbon atoms, nitrogen atoms and oxygen atoms, it is impossible for the seven heavens to be created and all of their contents including humans.

So, if most of the people in the world think that when the Holy Spirit is breathed into Maryam and continues to enter into Isa son of Maryam, then Isa, son of Maryam, is considered as son of God and at the same time God becomes Isa son of Maryam.

Well, such assumptions and beliefs that have no solid foundation.

Only of course, the belief in God, the Son of God and the holy spirit will continue to be maintained, because otherwise that belief will disappear from the surface of the earth.

CONCLUSION

Based on the description above, we can conclude that the secrets hidden behind the verse: *"... We breathed into her womb some of our spirits... (At Tahrir: 66:12)*

In fact, what Allah declared *"...Our spirit...(At Tahrir: 66:12)* was used as an excuse that Allah was incarnated as Isa, son of Maryam, and at the same time as son of Allah.
