ABSTRACT

Before the author writes about why Allah be searched for, even though Allah is in every human body, the author first asks forgiveness from Allah SWT. Here the author tries to open the veil that covers the secret of why Allah be searched for, even though Allah is in every human body, based on deoxyribonucleic acid (DNA).

There are several verses that reveal the secret of Allah about why Allah be searched for, even though Allah is in every human body, namely the following verses:

"So when I have perfected the life of Adam and breathed into Adam my spirit, then you will fall down and prostrate to him." (Shaad: 38: 72)

"Then He perfected and breathed into Adam His spirit and He made for you hearing, sight and heart, you are very few, grateful. (As Sajdah: 32: 9)

"Angels and spirit ascend to God in a day worth fifty thousand years (Al Ma'aarij: 70:4)

"Who has created the seven skys in layers. You never see in the creation of the Most Gracious God anything that is not balanced. So look again and again, do you see something that is not balanced? (Al Mulk: 67: 3)

"And to Allah belongs the east and the west, so wherever you turn there is the face of Allah. Indeed, Allah is All-Encompassing, All-Knowing. (Al Baqarah: 2: 115)

"And when Moses came at the time We had appointed and God had spoken to him, Moses said: "O my God, appear to me so that I may see You." God said: "You will never be able to see Me, but look at the mountain, if the mountain stays where it is you will surely see Me. When his God appeared to the mountain, the mountain was destroyed and Moses fell unconscious. So after Moses regained consciousness, he said: "Glory be to You, I repent to You and I am the first to believe." (Al A'raaf : 7: 143)

"And We showed Abraham signs of greatness in the skys and the earth and so that he would be among those who believe. (Al An'aam: 6: 75)

"When the night was dark, Abraham saw a star he said: "This is my God", but when the star sank he said: "I do not like those who drown." (Al An'aam: 6: 76)

"Then when Abraham saw the moon rising he said: "This is my God", but after the moon had set, he said: "Indeed, if my God had not guided me, I would have been one of those who went astray." (Al An'aam: 6: 77)

"Then when Abraham saw the sun rising, he said: "This is my God, this is greater." So when the sun set, he said: "O my people, indeed I disassociate myself from what you have associated with each other. (Al An'aam: 6: 78)

"When his God said to Ibrahim: "Submit to obey!" Ibrahim replied: "I submit to obey the God of

the worlds." (Al Baqarah: 2: 131)

In an effort to uncover the secret of Allah about why Allah be searched for, even though Allah is in every human body, the author uses the basis of deoxyribonucleic acid.

HYPOTHESIS

Here the author proposes hypothesis why Allah be searched for, even though Allah is in every human body, based on Deoxyribonucleic acid (DNA)

PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interactions.

QUARKS

If we want to know quarks then we pay attention to one of the hydrogen atoms which is a building element of the human body, animals, plants and fruit as well as inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Next, if this proton is split, we will find two up quarks and one down quark. Where these three quarks are combined with a gluon.

DEOXYRIBONUCLIC ACID (DNA)

DNA is a storehouse of genetic information that has a double structure that forms a double helix and contains polynucleotide macromolecules which are composed repeatedly of nucleotide polymers. This nucleotide consists of folate, a 5-carbon sugar and one of the nitrogen bases. The nitrogen bases are Guanine (G), Adenine (A), Cytosine (C) and Thymine (T).

Guanine (G) consists of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytosine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

Based on human deoxyribonucleic acid (DNA), it consists of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms. Where carbon, nitrogen, oxygen and hydrogen atoms are widely available around us and in the atmosphere.

WHY MUST ALLAH BE SEARCHED FOR, EVEN THOUGH ALLAH IS IN EVERY HUMAN BODY

So now, we still continue to focus our minds on uncovering the secrets contained behind the verses: *"...We showed Abraham signs of greatness in the skys and the earth...(Al An'aam: 6: 75)" .. Moses said: "O my God, appear to me so that I may see You." God said: "You will never be able to see Me, but look at the mountain, if the mountain stays where it is you will surely see Me. When his God appeared to the mountain, the mountain was destroyed and Moses fell unconscious...(Al A'raaf : 7: 143).*

Well, here Allah reveals a great secret about Allah's form, in the form of Allah's energy, Allah's particle and *"...my spirit...(Shaad : 38: 72) or "...Allah's spirit...(Shaad : 38: 72).*

How to empirically prove Allah's form, in the form of Allah's energy, Allah's particle and *"...my*

spirit...(Shaad : 38: 72) or "...Allah's spirit...(Shaad : 38: 72) ?

The answer is in the secret behind the verse: *"...look at the mountain...when his God appeared to the mountain, the mountain was destroyed...(Al A'raaf : 7: 143)"...Wherever you turn, there is the face of Allah...(Al Baqarah : 2: 115) "...I breathed into Adam my spirit...(Shaad : 38: 72).*

Now, from Allah's declaration, 3 very important factors were found, namely the first factor is Allah's energy which is referred to *"...look at the mountain...when his God appeared to the mountain, the mountain was destroyed...(Al A'raaf : 7: 143).* Well, *"...the mountain was destroyed...(Al A'raaf: 7: 143)* because there was Allah's energy, where Allah's energy is very small, **0.000000000 000000000 000000000 01** grams per cubic cm. Allah's energy is what forms quarks, within a period of **0.000000000 000000000 000000000 000000000 001** seconds, quarks are created, which will become the nucleus of the atom. These atoms are the building blocks of the universe or *"seven skys"* *(Al Mulk: 67: 3).* Or in other words, Allah's energy is the source of life in the universe or in the *"..seven skys...(Al Mulk: 67: 3),* Allah's energy and Allah are united.

The second factor, Allah's particle which refers to *"...wherever you turn, there is the face of Allah...(Al Baqarah : 2: 115).* Where the Allah's particle is very small, almost non-existent, **0.000000000 000000000 000000000 00000 3335917542091889** grams. Allah's particle require very little Allah's energy, **0.000000000 000000000 000000000 01** grams per cubic cm, and have a speed more than the speed of light, **5 475 103 664 604.84** km per second. Well, Allah's particle with the help of Allah's energy which has a speed greater than the speed of light, **5 475 103 664 604.84** km per second, wherever the human eye is directed, before the eye reaches its destination, Allah's particle with the help of Allah's energy have a speed more than the speed of light, **5 475 103 664 604.84** km per second, already at that point. Or in other words, *"...wherever you turn, there is the face of Allah...(Al Baqarah: 2: 115).*

The third factor, Allah's energy which forms quarks, quarks form atoms, such as hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms, which refers to *"...my spirit...(Shaad : 38: 72) or "...Allah's spirit...(Shaad : 38: 72).* Well, hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms which form *"...my spirit...(Shaad : 38: 72) or "...Allah's spirit...(Shaad : 38: 72)* which becomes building of the universe or *"..seven skys...(Al Mulk: 67: 3).*

Well, if we delve deeper, it turns out that these three factors make the universe or *"..seven skys...(Al Mulk: 67: 3) "...balanced (Al Mulk: 67: 3).* Why ?

Because there are eternal factors and uneternal factors. Where the eternal factors are Allah's energy, Allah's particle, quarks. While uneternal factor is *"...my spirit...(Shaad : 38: 72) or "...Allah's spirit...(Shaad : 38: 72)* which is built with hydrogen atoms, carbon atoms, nitrogen atoms , oxygen atom.

Why *"...my spirit...(Shaad : 38: 72) or "...Allah's spirit...(Shaad : 38: 72)* which is built with hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms is uneternal ?

Because the nuclear energy that holds the quarks in the atom is lost, it returns to Allah's energy. The nuclear energy that holds the quarks in the atom disappears, returning to Allah's energy after reaching the age of **10 000000000 000000000 000000000 000000000 000000000 000000000 000000000 000000000 000000000** years.

With nuclear power that keeps the quarks in the atom from disappearing, returning to Allah's energy, the universe will disappear or *"..the seven skys...(Al Mulk: 67: 3)* will disappear.

Meanwhile, what remains is Allah's energy, Allah's particle and quarks.

So, with the existence of eternal factors and uneternal factors that make the universe or *"..seven skys...(Al Mulik: 67: 3) "...balanced (Al Mulik: 67: 3).*

Well, the nuclear energy that holds the quarks in the atom disappears, returning to Allah's energy, the universe or *"..seven skys...(Al Mulik: 67: 3)* will disappear, meanwhile, what remains is Allah's energy, Allah's particle and quarks, then through the existing quarks new atoms and a new universe will be formed.

Well, this is actually what Prophet Abraham and Prophet Moses were looking for, namely the real Allah through Allah's form in the form of Allah's energy, in the form of Allah's particle and in the form of *"...my spirit...(Shaad : 38: 72)* or *"...Allah's spirit...(Shaad : 38: 72)* which is built with hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms.

Well, Prophet Ibrahim looked for the real Allah *"...Ibrahim saw a star he said: This is my God...(Al An'aam: 6: 76) "...Ibrahim saw the rising moon he said: this is my God... (Al An'aam: 6: 77) "....Ibrahim saw the sun...he said: this is my God...(Al An'aam: 6: 78).*

It turns out, after the Prophet Ibrahim found the real Allah *"...Ibrahim said: ...I disassociate myself from what you associate with me (Al An'aam: 6: 78). "When his God said to Ibrahim: "Submit to obey!" Ibrahim replied: "I submit to obey the God of the worlds." (Al Baqarah: 2: 131)*

Likewise with the Prophet Moses, when the Prophet Moses were looking for Allah *"... Moses said: O my God, appear to me so that I can see You. God said: You can never see Me, but look at the mountain, If the mountain remained in its place, you would have seen Me. When the God appeared to the mountain, He made the mountain was destroyed and Moses fell unconscious... Moses said: ... I repent... I am the first to believe." (Al A'raaf : 7: 143).*

So, Prophet Abraham and Prophet Moses looked for the real Allah through Allah's form in the form of Allah's energy, in the form of Allah's particle and in the form of *"...my spirit...(Shaad : 38: 72)* or *"...Allah's spirit...(Shaad : 38: 72)* which is built with hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms.

CONCLUSION

Based on the description above we can conclude that the secrets contained behind the verses: *"...We showed Abraham signs of greatness in the skys and the earth...(Al An'aam: 6: 75)" .. Moses said: "O my God, appear to me so that I may see You." God said: "You will never be able to see Me, but look at the mountain, if the mountain stays where it is you will surely see Me. When his God appeared to the mountain, the mountain was destroyed and Moses fell unconscious...(Al A'raaf : 7: 143).*

Well, here Allah reveals a great secret about Allah's form, in the form of Allah's energy, Allah's particle and *"...my spirit...(Shaad : 38: 72)* or *"...Allah's spirit...(Shaad : 38: 72).*

How to empirically prove Allah's form, in the form of Allah's energy, Allah's particle and *"...my spirit...(Shaad : 38: 72)* or *"...Allah's spirit...(Shaad : 38: 72) ?*

The answer is in the secret behind the verse: *"...look at the mountain...when his God appeared to the mountain, the mountain was destroyed...(Al A'raaf : 7: 143)"...Wherever you turn, there is the face of Allah...(Al Baqarah : 2: 115) "...I breathed into Adam my spirit...(Shaad : 38: 72).*

Now, from Allah's declaration, 3 very important factors were found, namely the first factor is Allah's energy which is referred to *"...look at the mountain...when his God appeared to the mountain, the mountain was destroyed...(Al A'raaf : 7: 143).* Well, *"...the mountain was destroyed...(Al A'raaf: 7:*

143) because there was Allah's energy, where Allah's energy is very small, **0.000000000 000000000 000000000 01** grams per cubic cm. Allah's energy is what forms quarks, within a period of **0.000000000 000000000 000000000 000000000 001** seconds, quarks are created, which will become the nucleus of the atom. These atoms are the building blocks of the universe or "*seven skys*" (*Al Mulk: 67: 3*). Or in other words, Allah's energy is the source of life in the universe or in the "*..seven skys... (Al Mulk: 67: 3)*, Allah's energy and Allah are united.

The second factor, Allah's particle which refers to "*...wherever you turn, there is the face of Allah... (Al Baqarah : 2: 115)*. Where the Allah's particle is very small, almost non-existent, **0.000000000 000000000 000000000 00000 3335917542091889** grams. Allah's particle require very little Allah's energy, **0.000000000 000000000 000000000 01** grams per cubic cm, and have a speed more than the speed of light, **5 475 103 664 604.84** km per second. Well, Allah's particle with the help of Allah's energy which has a speed greater than the speed of light, **5 475 103 664 604.84** km per second, wherever the human eye is directed, before the eye reaches its destination, Allah's particle with the help of Allah's energy have a speed more than the speed of light, **5 475 103 664 604.84** km per second, already at that point. Or in other words, "*...wherever you turn, there is the face of Allah... (Al Baqarah: 2: 115)*.

The third factor, Allah's energy which forms quarks, quarks form atoms, such as hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms, which refers to "*...my spirit... (Shaad : 38: 72)* or "*...Allah's spirit... (Shaad : 38: 72)*. Well, hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms which form "*...my spirit... (Shaad : 38: 72)* or "*...Allah's spirit... (Shaad : 38: 72)* which becomes building of the universe or "*..seven skys... (Al Mulk: 67: 3)*.

Well, if we delve deeper, it turns out that these three factors make the universe or "*..seven skys... (Al Mulk: 67: 3)* "*...balanced (Al Mulk: 67: 3)*. Why ?

Because there are eternal factors and uneternal factors. Where the eternal factors are Allah's energy, Allah's particle, quarks. While uneternal factor is "*...my spirit... (Shaad : 38: 72)* or "*...Allah's spirit... (Shaad : 38: 72)* which is built with hydrogen atoms, carbon atoms, nitrogen atoms , oxygen atom.

Why "*...my spirit... (Shaad : 38: 72)* or "*...Allah's spirit... (Shaad : 38: 72)* which is built with hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms is uneternal ?

Because the nuclear energy that holds the quarks in the atom is lost, it returns to Allah's energy. The nuclear energy that holds the quarks in the atom disappears, returning to Allah's energy after reaching the age of **10 000000000 000000000 000000000 000000000 000000000 000000000 000000000 000000000 000000000** years.

With nuclear power that keeps the quarks in the atom from disappearing, returning to Allah's energy, the universe will disappear or "*..the seven skys... (Al Mulk: 67: 3)* will disappear.

Meanwhile, what remains is Allah's energy, Allah's particle and quarks.

So, with the existence of eternal factors and uneternal factors that make the universe or "*..seven skys... (Al Mulk: 67: 3)* "*...balanced (Al Mulk: 67: 3)*.

Well, the nuclear energy that holds the quarks in the atom disappears, returning to Allah's energy, the universe or "*..seven skys... (Al Mulk: 67: 3)* will disappear, meanwhile, what remains is Allah's energy, Allah's particle and quarks, then through the existing quarks new atoms and a new universe will be formed.

Well, this is actually what Prophet Abraham and Prophet Moses were looking for, namely the real Allah through Allah's form in the form of Allah's energy, in the form of Allah's particle and in the form of "...my spirit...(Shaad : 38: 72) or "...Allah's spirit...(Shaad : 38: 72) which is built with hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms.

Well, Prophet Ibrahim looked for the real Allah "*...Ibrahim saw a star he said: This is my God...(Al An'aam: 6: 76) "...Ibrahim saw the rising moon he said: this is my God... (Al An'aam: 6: 77) "....Ibrahim saw the sun...he said: this is my God...(Al An'aam: 6: 78).*

It turns out, after the Prophet Ibrahim found the real Allah "*...Ibrahim said: ...I disassociate myself from what you associate with me (Al An'aam: 6: 78). "When his God said to Ibrahim: "Submit to obey!" Ibrahim replied: "I submit to obey the God of the worlds." (Al Baqarah: 2: 131)*

Likewise with the Prophet Moses, when the Prophet Moses were looking for Allah "*... Moses said: O my God, appear to me so that I can see You. God said: You can never see Me, but look at the mountain, If the mountain remained in its place, you would have seen Me. When the God appeared to the mountain, He made the mountain was destroyed and Moses fell unconscious... Moses said: ... I repent... I am the first to believe." (Al A'raaf : 7: 143).*

So, Prophet Abraham and Prophet Moses looked for the real Allah through Allah's form in the form of Allah's energy, in the form of Allah's particle and in the form of "...my spirit...(Shaad : 38: 72) or "...Allah's spirit...(Shaad : 38: 72) which is built with hydrogen atoms, carbon atoms, nitrogen atoms, oxygen atoms.
