ABSTRACT

First of all, by asking Allah's forgiveness, here I am trying to reveal the signs of Allah's greatness regarding the secret of, on what basis, Allah created the universe, from the point of view of photons, quarks and the molecular structure of nucleic acids or deoxyribonucleic acid (DNA).

The signs of Allah's greatness regarding, on what basis, Allah created the universe, are found in several verses, namely:

"Allah, there is no god but He Who Lives eternally and continually takes care of; neither sleeps nor sleeps. To Him belongs what is in the heavens and the earth. No one can intercede with Allah without His permission? Allah knows what is before them and behind them, and they know nothing of Allah's knowledge except what He wills. Allah's seat covers the heavens and the earth. And Allah does not find it difficult to maintain them, and Allah is Most High, Most Merciful. Great.(Al Baqarah: 2:255)

"He is Allah, Who created all that is on earth for you and He willed the heavens, then He made the seven heavens. And He is All-Knowing of all things. (Al Baqarah: 2:29)

"So when I have perfected the event, and have breathed into it my spirit, then submit to it prostrating yourself (Al Hijr: 15: 29)

"The angels and the spirit (Gabriel) ascend to God in a day whose level is fifty thousand years Al Ma'aarij (70:4)

"Then He perfected and breathed into it His spirit and He made for you hearing, sight and hearts; you are very little grateful. (As Sajdah: 32: 9)

"He is the First and the Last, the Outward and the Inward; and He is All-Knowing of all things. (Al Hadid: 57:3)

"Indeed, the worst of animals in the sight of Allah are those who are deaf and deaf who do not understand anything. (Al Anfaal: 8: 22)

In an effort to unmask the greatness of Allah SWT regarding, on what basis, Allah created the universe, I use the basis of photons, quarks and the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

HYPOTHESIS

Here I propose a hypothesis, Allah created the universe is not like a game, judging from the photons, quarks and the molecular structure of nucleic acids or deoxyribonucleic acid (DNA).

PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interactions.

QUARK

If we want to know quarks, then we consider one of the hydrogen atoms which is the building block of the human body, animals, plants and fruits and inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Then if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with gluons.

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that form a double helix and which contains polynucleotide macromolecules arranged in repeatedly from nucleotide polymers. This nucleotide is composed of folate, a 5-carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine(A), Cytocine(C) and Thymine (T).

Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 atom oxygen and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms. 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

WHERE IS ALLAH, BEFORE THE UNIVERSE WAS CREATED, WHAT IS ALLAH'S RELATIONSHIP WITH ENERGY

Now, we still continue to focus our minds and energies on uncovering the secrets hidden behind the verse: "*Allah, there is no god but He Who Lives eternally... (Al Baqarah: 2:255)*"

So, now the question arises,

Since when did Allah "*...Eternal life...(Al Baqarah: 2:255)*"?

The answer is

Hidden in the secret behind the verse: "*He is the First... (Al Hadid: 57: 3)*"

Well, apparently Allah, is "*... the Beginning... (Al Hadiid: 57: 3)*" since the universe did not yet exist.

Now another question arises,

Where was Allah before the universe existed?

The answer

In the place of energy "*...To Him belongs whatever is in the skys...(Al Baqarah: 2:255)*"

Well, it turns out, the origin of this universe exists, is because of energy. It is because of this energy that the universe came into being, which originally did not exist.

That is, the origin of quarks into atoms and into the universe as we see, feel and enjoy on this earth.

The question arises again,

Since when did that energy appear?

The answer is

Since 0.0000000000 0000000000 0000000000 0000000000 001 seconds,
This means that 1 second is divided by the number of digits 10000000000 0000000000 0000000000
0000000000 000

What is this energy used for?

The answer is

To create a quark

So, in a very short time, quarks are created through energy .

Where does that energy come from?

The answer is

Hidden in the secret behind the verse: *"He is the First... (Al Hadiid: 57: 3)*

Now, because Allah was the beginning, then from Allah came the energy to create quarks, continue to become atoms, continue to become the universe as it is today.

Now another question arises,

How big was the universe when quarks started appearing?

The answer is

The size of a marble compared to a football field. Or in other words, something that is billions of times smaller than the size of a proton. Protons are the nucleus of an atom, which contains quarks.

So, now it has been revealed, the secret behind the verse: *"He is the First...(Al Hadiid: 57:3) "...He Who Lives Eternally...(Al Baqarah: 2:255) "...Owned- His is what is in the sky...(Al Baqarah: 2:255)*

WHAT IS BEFORE ALLAH

Now, we continue to unravel the secret behind the verse: *"He is the First and the Last, the Outer and the Inner... (Al Hadiid: 57: 3)*

It turns out, it is clearly seen, because Allah *"He is the First ... (Al Hadiid: 57: 3)* where energy belongs to Allah, *"... To Him belongs whatever is in the sky... (Al Baqarah: 2: 255)*, then the energy returns to Allah, then Allah gives birth to energy again.

Because, in this universe, nothing is lost. Everything is stored in the universe.

If the atom is lost, it means that the atom returns to energy. Energy gives birth to quarks, quarks give birth to atoms, atoms return to energy. Energy returns to Allah, Allah gives energy again. Everything is stored well in the universe *"... people... don't understand... (Al Anfaal: 8: 22)* about this.

CONCLUSION

From what has been described above we can now conclude that the secrets hidden behind the verse:
"Allah, there is no god but He Who Lives eternally... (Al Baqarah: 2:255)

So, now the question arises,

Since when did Allah "...*Eternal life... (Al Baqarah: 2:255)*?
