ABSTRACT

First of all, by asking Allah's forgiveness, here I am trying to reveal the signs of Allah's greatness regarding Allah's secret about, on what basis, Allah made the human body, as a symbol, the universe, seen from the point of view of photons, quarks and the molecular structure of nucleic acids or nucleic acids. deoxyribonucleic acid (DNA)

Signs of Allah's greatness regarding Allah's secret on what basis, Allah made the human body, as a symbol, the universe, found several verses that the author considers to be the key to unlocking Allah's secret about, on what basis, Allah made the human body, as a symbol, universe, namely the verses:

"And verily We have created above you seven paths; and We are not heedless of creation. (Al Mu'minuun: 23:17)

"So He made it seven heavens in two days. He revealed in each sky its affairs. And We adorn the near sky with bright stars and We take care of it as well as possible. Such is the provision of the Mighty, All-Knowing. (Fushshilat :41:12)

"He is Allah, Who created all that is on earth for you and He willed (created) the heavens, then He made the seven heavens. And He is Knower of all things." (Al Baqarah: 2:29)

"Indeed, the creation of the heavens and the earth is greater than the creation of man, but most people do not know. (Al Mu'min: 40: 57)

"Glory be to Allah Who has made in the sky the constellations of stars and He has also made the sun and the moon shining in them. (Al-Furqaan: 25:61)

"O mankind, if you are in doubt about the resurrection, then verily We have created you from clay, then from a drop of semen, then from a clot of blood, then from a lump of flesh which is perfect and imperfect, so that We may explain it to you and determine in the womb, what We will until a predetermined time, then We bring you out as babies, then you come to maturity, and some of you are passed away and some of you have extended their life to senility, so that he will no longer know anything that is wrong. he knew before. And you see the earth is dry, then when We send down water on it, the earth lives and is fertile and grows all kinds of beautiful plants. (Al Hajj: 22: 5)

"And why do they not think about themselves? Allah did not make the heavens and the earth and what is between them except with the truth and the appointed time. And indeed most of the people really deny meeting their Lord. (Ar Ruum: 30:8)

In an effort to unveil the greatness of Allah SWT regarding Allah's secret about, on what basis, Allah made the human body, as a symbol, the universe, I use the basis of photons, quarks and the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

HYPOTHESIS

Here I propose the hypothesis that Allah made the human body, as a symbol, the universe, when viewed from photons, quarks and the molecular structure of nucleic acids or deoxyribonucleic acid (DNA).

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that form a double helix and which contains polynucleotide macromolecules arranged in repeatedly from nucleotide polymers. This nucleotide is composed of folate, a 5-carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine(A), Cytocine(C) and Thymine (T).

Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 atom oxygen and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

THE HUMAN BODY CONSISTS OF 7 000 000 000 000 000 000 000 000 000 ATOMS

Well, now, we are still trying to uncover the secret that is hidden behind the verse: *"...Indeed We have created you from clay, then from a drop of semen, then from a clot of blood, then from a lump of flesh that is perfect and imperfect, that We may explain to you and We will determine in the womb what We will until the appointed time, then We will bring you out as babies... (Al Hajj: 22: 5)*

Apparently, humans are derived from *"...soil..." (Al Hajj: 22: 5)* which becomes *"...a drop of semen.. (Al Hajj: 22: 5)* which is built by hydrogen atoms, carbon atoms, oxygen atoms and nitrogen atoms.

The human body contains 7 000 000 000 000 000 000 000 000 000 atoms.

Based on Deoxyribonucleic acid (DNA), humans are composed of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms.

THE UNIVERSE CONSISTS OF BILLIONS OF GALAXY

Now, let's unveil the secret behind the verse: *"...He made the seven skys in two days...We adorn the near sky with bright stars...Fushshilat : 41:12)*

It turns out, in *"...the seven skys...(Fushshilat: 41:12)* contains billions of galaxies. Each galaxy contains billions of stars and planets and moons. The Milky Way galaxy, where our earth is located, is made up of billions of stars, planets and moons.

THE HUMAN BODY IS A SYMBOL OF THE UNIVERSE

Now, let's dig and unveil the secret behind the verse: *"...why don't they think about themselves?... (Ar Ruum: 30:8) "...He made seven heavens in two days...We decorated the sky is close to the bright stars... (Fushshilat : 41:12)*

It turns out, now clearly illustrated, Allah has given a picture or symbol of the human body *"...why don't they think about themselves?... (Ar Ruum: 30:8)*

Where, in the human body there are 7 000 000 000 000 000 000 000 000 000 000 atoms.

Then, Allah has explained *"...He made the seven skys in two days... We adorn the near sky with bright stars...(Fushshilat: 41:12)*

It turns out, in *"...the seven skys...(Fushshilat: 41:12)* there are billions of galaxies, each galaxy contains billions of stars, planets and moons.

Now, it has been revealed, it turns out that the human body contains 7 000 000 000 000 000 000 000 000 000 000 atoms, compared to the universe containing billions of galaxies, each galaxy contains billions of stars, planets and moons.

Or in other words, the human body is a symbol of the universe.

If humans want to understand the universe, then *"...why don't they think about themselves? ...(Ar Ruum: 30:8)* , the human body contains 7 000 000 000 000 000 000 000 000 000 atoms, compared to the universe which has billions of galaxies.

CONCLUSION

From what has been described above we can now conclude that the secret that is hidden behind the verse: *"...Indeed We have created you from clay, then from a drop of semen, then from a clot of blood, then from a lump of flesh that is perfect and imperfect, that We may explain to you and We will determine in the womb what We will until the appointed time, then We will bring you out as babies...
