ABSTRACT

Previously the author asked forgiveness from Allah SWT regarding here I tried to reveal the signs of Allah SWT on what basis, Prophet Musa wanted to see the face of Allah, based on the molecular structure of nucleic acid or deoxyribonucleic acid (DNA)

There is one verse from the entire contents of the Koran that can be used as a basis for revealing Allah's secret about what basis, Prophet Moses wanted to see Allah's face, namely the verse:

"And when Musa came to (munajat with Us) at the time We had determined and Allah had spoken (directly) to him, Musa said: "O my Lord, show me (yourself) so that I can see You." Allah said: "You will never be able to see Me, but look at the hill, so if it stays where it was (as before) you will surely see Me." When his Lord appeared to the mountain, he made the mountain crumble and Moses fell unconscious. So after Moses regained consciousness, he said: "Glory be to You, I repent to You and I am the first to believe." (Al A'raaf: 7: 143)

"So when I have perfected the event, and have breathed into it my spirit, then submit to it prostrating yourself (Al Hijr: 15: 29)

"And We put before them a wall and behind them a wall, and We covered them so that they could not see (Yaasiin: 36:9)

Allah said: "O Musa, verily I chose (excessive) you and other humans (in your time) to carry My message and to speak directly with Me, therefore hold fast to what I have given you and be of the grateful people." (Al A'raaf: 7:144)

In an effort to reveal the secret, on what basis, Prophet Musa wanted to see the face of Allah, I used a tool called deoxyribonucleic acid or deoxyribonucleic acid or the molecular structure of nucleic acids.

HYPOTHESIS

Here I propose the hypothesis that Prophet Musa wanted to see the face of Allah through the spirit of Allah that is throughout the human body, seen from the point of Deoxyribonucleic acid (DNA)

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that form a double helix and which contains polynucleotide macromolecules arranged in repeatedly from nucleotide polymers. This nucleotide is composed of folate, a 5-carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine(A), Cytocine(C) and Thymine (T).

Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 atom oxygen and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms. 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5 carbon sugar has 5 carbon atoms,

2 oxygen atoms and 8 hydrogen atoms.

THE PROPHET MUSA WANT TO SEE ALLAH'S FACE, BUT THE SPIRIT OF ALLAH IS AROUND THE HUMAN BODY

Now, we are still focused on unlocking the secret that is hidden behind the verse: *"...Musa said: "My Lord, show me (yourself) so that I can see you." Allah said: "You will never be able to see Me, but look at the hill, so if it stays where it is, you will surely see Me." When his Lord appeared to the mountain, he made the mountain crumble and Musa fell unconscious... (Al A'raaf: 7: 143)*

Apparently, prophet Musa, in order to believe in Allah, before being appointed as a prophet, wanted to see the face of Allah, *"...said Musa: "O my Lord, show me (Yourself) so that I can see You."... (Al A'raaf: 7: 143)*

Apparently, what happened, Allah *"...said: "You will never be able to see Me, but look at the hill, so if it stays where it is, you will surely see Me."... (Al A'raf : 7:143)*

Why did Allah tell prophet Musa to look *"...to the hill... (Al A'raaf: 7:143)?*

The answer is

Hidden in the secret behind the verse: *"... I... have breathed into it my spirit... (Al Hijr: 15: 29)*

It turns out that in the *"...hill... (Al A'raaf : 7: 143)* there is *"... my spirit... (Al Hijr : 15: 29)*

What exactly is *"... my spirit... (Al Hijr: 15: 29) ?*

The answer is

Deoxyribonucleic acid (DNA), which humans are composed of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78% oxygen atoms and 35.59% hydrogen atoms. Carbon atoms, nitrogen atoms, oxygen atoms and hydrogen atoms are widely available around us and in the atmosphere. Carbon atoms, nitrogen atoms, oxygen atoms and hydrogen atoms are found in the human body, animals, fungi, amoeba, plants, bacteria and archaea.

Now, when Allah told prophet Musa to look *"...to the hill... (Al A'raaf: 7:143)*, it turns out that on the hill there are carbon atoms, nitrogen atoms, oxygen atoms and hydrogen atoms.

So, actually Allah told prophet Musa to think about *"... my spirit... (Al Hijr: 15: 29)* not see the face of God.

Why did prophet Musa not see the face of Allah?

The answer is

Hidden in the secret behind the verse: *"And We put before them a wall and behind them a wall, and We covered them so that they could not see (Yaasiin: 36: 9)*

So, the eyes of Prophet Musa and the eyes of all humans on this earth, have been closed by Allah, from the front, from the back, so that the eyes of Prophet Moses and the eyes of all humans cannot see.

Why the eyes of Prophet Moses and the eyes of all humans can not see?

The answer is

Because the human eye can only see light in the electromagnetic spectrum region between 430 and 740 nanometers. If there is light in the electromagnetic spectrum below 430 nanometers and light in the electromagnetic spectrum above 740 nanometers, the human eye cannot see the light.

IF HUMANS WANT TO SEE ALLAH'S FACE, THROUGH THE SPIRIT OF ALLAH WHICH IS AROUND THE HUMAN BODY

Now, humans do not need to see the face of Allah, but must understand and understand through "*... my spirit... (Al Hijr: 15: 29)*"

Where "*... my spirit... (Al Hijr: 15: 29)*" which is formed from carbon atoms, nitrogen atoms, oxygen atoms and hydrogen atoms exists throughout the human body.

It turned out that "*...When his Lord appeared to the mountain, he made the mountain crumble and Musa fell unconscious... (Al A'raaf: 7: 143)*"

Why "*... the mountain was crushed... (Al A'raaf: 7: 143)*"?

Because, Allah showed Prophet Musa, that "*... my spirit... (Al Hijr : 15: 29)*" is on the "*... hill... (Al A'raaf : 7: 143)*" it is in the form of atoms carbon, nitrogen atoms, oxygen atoms and hydrogen atoms.

Prophet Musa should not look at "*...the hill...(Al A'raaf : 7: 143)*" but pay attention and think "*... my spirit... (Al Hijr : 15: 29)*" which is formed from carbon atoms, nitrogen atoms, oxygen atoms and hydrogen atoms.

So the Prophet Moses had to look at the dust as a result of "*...the mountain was crushed... (Al A'raaf: 7: 143)*" which contained "*... My spirit... (Al Hijr: 15: 29)*" which is formed from carbon atoms, nitrogen atoms, oxygen atoms and hydrogen atoms.

Or in other words, if humans want to see the face of Allah, then they must pay attention and think about "*... my spirit... (Al Hijr: 15: 29)*" which is formed from carbon atoms, nitrogen atoms, oxygen atoms and hydrogen atoms.

Now the secret that is hidden behind the verse has been revealed: "*...Musa said: "O my Lord, show me (yourself) so that I can see you."...(Al A'raaf: 7: 143)*"

It turns out that to see the face of Allah, Prophet Musa and all humans must pay attention and think about "*... my spirit... (Al Hijr: 15: 29)*" which is formed from carbon atoms, nitrogen atoms, oxygen atoms and hydrogen atoms. Through "*... my spirit... (Al Hijr: 15: 29)*" humans will understand Allah.

CONCLUSION

Based on what has been described above, we can conclude that the secret that is hidden behind the verse: "*...Musa said: "My Lord, show me (yourself) so that I can see you." Allah said: "You will never be able to see Me, but look at the hill, so if it stays where it is, you will surely see Me." When his Lord appeared to the mountain, he made the mountain crumble and Musa fell unconscious... (Al A'raaf: 7: 143)*"
