ABSTRACT

Before I write about the problem of understanding for what reason, Allah created humans from the essence of soil, I first ask forgiveness from Allah SWT. Here I try to open the veil that covers the secret about for what reason, Allah created humans from the essence of soil, from the point of view of the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

There are several verses that become Allah's secret unlocking tool about for what reason, Allah created man from the essence of soil, namely the verses:

"And verily We have created man from an essence from the soil. (Al Mu'minuun: 23:12)

"Then We made the essence of semen in a solid place. (Al Mu'minuun: 23:13)

"So when I have perfected the scene and I breathed into him My spirit; then you should fall down prostrating to him." (Shaad : 38:72)

"So when I have perfected the event, and have breathed into it my spirit, then submit to it prostrating yourselves (Al Hijr: 15: 29)

"And verily We have created man and know what his heart whispers, and We are nearer to him than his jugular vein." (Qaf: 50:16)

"Then He perfected and breathed into it His spirit and He made for you hearing, sight and hearts you have little gratitude. (As Sajdah: 32: 9)

"...Indeed the Messiah, Jesus the son of Mary, is the messenger of Allah and His words which He conveyed to Mary, and a spirit from Him... (An Nisaa ': 4:171)

"And Maryam, the daughter of Imran, who kept her honor, so We breathed into her a portion of Our spirit, and she confirmed the words of her Lord and His Books, and she was one of the obedient. (At Tahrir: 66:12)

In an effort to open the veil of Allah's secret regarding for what reason, Allah created man from the essence of the soil, I use the basis of deoxyribonucleic acid or deoxyribonucleic acid or the molecular structure of nucleic acids.

HYPOTHESIS

Here I propose the hypothesis that Allah created humans from the essence of soil containing carbon atoms, hydrogen atoms, nitrogen atoms and oxygen atoms, viewed from the basic point of Deoxyribonucleic acid (DNA).

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that form a double helix and which contains polynucleotide macromolecules arranged in repeatedly from nucleotide polymers. This nucleotide is composed of folate, a 5-carbon sugar and one of the nitrogenous bases. The

nitrogenous bases are Guanine (G), Adenine(A), Cytocine(C) and Thymine (T).

Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 atom oxygen and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5-carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interactions.

QUARK

As for if we want to know quarks, then we pay attention to one of the hydrogen atoms that are the building blocks of the human body, animals, plants and fruits as well as inanimate objects.

Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Then if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with gluons.

MY SPIRIT CONTAINS THE ESSENTIAL OF SOIL

Now, we are still concentrating on trying to uncover the secret hidden behind the verse: *"... We have created man from an essence from the soil. (Al Mu'minuun: 23:12)*

Apparently, here Allah has declared that humans were created from the essence of soil.

Now the question arises,

What is the essence of the soil?

The answer is,

because soil contains carbon atoms, nitrogen atoms, hydrogen atoms and oxygen atoms.

So, why were humans created from carbon atoms, nitrogen atoms, hydrogen atoms and oxygen atoms?

Because, indeed the universe and its sides were created from carbon atoms, nitrogen atoms, hydrogen atoms, oxygen atoms, neon atoms, helium atoms.

So, actually, the creation of man is no different from the creation of the universe and its contents, namely from carbon atoms, nitrogen atoms, hydrogen atoms, oxygen atoms, neon atoms, helium atoms.

Now, because *"...my spirit...(Al Hijr: 15: 29)* contains carbon atoms, nitrogen atoms, hydrogen atoms and oxygen atoms, then actually, before *"...my spirit...(Al Hijr: 15:29)* is breathed into humans, so actually, before humans were created, there were already raw materials for creating humans.

ESSENTIAL OF THE SOIL BECOME SEMEN

Now, let's uncover the secret hidden behind the verse: *"... We made the essence of semen... (Al Mu'minuun: 23:13)*

Turns out, the essence of the soil is actually semen.

So, actually, before the baby is born, or before the fetus is formed in the womb, there are already sources or raw materials for the occurrence of the fetus in the womb.

Or in other words, the essence of the soil that becomes semen or sperm and meets the egg in the womb, is a *"... my spirit... (Al Hijr: 15: 29)*

So, *"... my spirit... (Al Hijr: 15: 29)* is already in the essence of the soil and in the semen, or *"... my spirit... (Al Hijr: 15: 29)* is already in the sperm from the father and eggs from the mother.

ALLAH CREATED HUMANS FROM CARBON ATOM, HYDROGEN ATOM, NITROGEN ATOM AND OXYGEN ATOM

Now, why did Allah create humans from carbon atoms, nitrogen atoms, hydrogen atoms and oxygen atoms?

The answer is,

because indeed there is no other source of raw materials for creating man and all the contents of the universe, apart from carbon atoms, nitrogen atoms, hydrogen atoms, oxygen atoms, neon atoms, helium atoms.

So, what is it called, the essence of soil, semen or sperm, eggs and *"...my spirit...(Al Hijr: 15: 29)* all of which are composed of carbon atoms, nitrogen atoms, hydrogen atoms and oxygen atoms. .

BEFORE HUMANS WERE CREATED THERE ARE THE RAW MATERIALS AND THE NOTES

Now, let's uncover the secret hidden behind the verse: *"...I have perfected the incident...(Al Hijr: 15: 29)*

It turns out, when the fetus is formed in the womb, actually *"... my spirit... (Al Hijr: 15: 29)* is already present in the essence of the soil which becomes semen or sperm and eggs.

So, when *"...I... have blown into it my spirit...(Al Hijr: 15: 29)* it turns out that *"... My spirit...(Al Hijr: 15: 29)* is already in the essence soil that becomes semen or sperm and eggs.

Now, the question arises

Why does Allah *"...blow my spirit into it...(Al Hijr: 15: 29) ?*

The answer is

Because, to give an illustration to humans, that in the body of the fetus that is formed in the womb there is a source that will become the building of the baby's body, *"...He perfected and breathed into it His spirit and He made for you hearing, sight and heart... (As Sajdah: 32: 9)*

Or in other words, Allah created humans from carbon atoms, nitrogen atoms, hydrogen atoms and oxygen atoms in the form of Deoxyribonucleic acid (DNA), where humans are composed of 32.20% carbon atoms, 25.43% nitrogen atoms, 6.78 % oxygen atoms and 35.59% hydrogen atoms

ALLAH IS THE SOURCE OF RAW MATERIALS FOR THE CREATING OF THE UNIVERSE AND ITS CONTENTS INCLUDING HUMANS

Well, now it has been revealed, that *"... my spirit... (Al Hijr: 15: 29)* comes from Allah, who is the source of human creation. Or in other words, humans were created from carbon atoms, nitrogen atoms, hydrogen atoms and oxygen atoms which came from Allah.

Man comes from Allah back to Allah.

CONCLUSION

Based on the description above, we can conclude that the secret hidden behind the verse: *"... We have created man from an essence from the soil. (Al Mu'minuun: 23:12)*

Apparently, here Allah has declared that humans were created from the essence of soil.
