## ABSTRACT

Before I write down the problem for what reason in paradise, my spirit is made into pairs, through marriage, first I ask forgiveness from Allah SWT. Here I try to open the veil that covers the secret about why in paradise my spirit is made paired, through marriage, from the point of view of the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

There are several verses that serve as tools for revealing Allah's secrets about what reason in paradise my spirit is made into pairs, through marriage, namely the following verse:

*"So when I have perfected the show and breathed into it my skirt; then you must prostrate to him." (Shaad: 38:72)*

*"When I have perfected the event, and have breathed into it my spirit, then submit to it prostrating yourself (Al Hijr: 15:29)*

*"And We made before them a wall and behind them a wall, and We covered them so that they could not see." (Yaasiin: 36:9)*

*"And verily We have created man and know what his heart whispers, and We are nearer to him than his jugular vein." (Qaf: 50:16)*

*"Then He perfected and breathed into it His spirit and He made for you hearing, sight, and heart; you are very little grateful." (As Sajdah: 32: 9)*

*"They reclined on couches in a row and We married them to beautiful fair-eyed nymphs (Ath Thuur: 52:20)*

In an attempt to unmask for what reason in paradise my spirit is paired, through marriage, I base it on photons, quarks and deoxyribonucleic acid or the molecular structure of nucleic acids.

## HYPOTHESIS

Here I put forward the hypothesis that in paradise, my spirit is made into pairs, through marriage, because atoms consist of protons and neutrons, from the point of view of photons, quarks and Deoxyribonucleic acid (DNA).

## DEOXYRIBONUCLEIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that forms a double helix and which contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide is composed of folate, a 5 carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytocine (C) and Thymine (T).

Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T)

contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

## PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interactions.

## QUARK

If we want to know quarks, then we consider one of the hydrogen atoms that is the building block of the human body, animals, plants and fruits and inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Then if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with gluons.

## ALLAH'S LAW OR NATURAL LAW APPLY IN PARADISE, HELL AND IN THE UNIVERSE, MY SPIRIT CANNOT LIVE ALONE IN PARADISE

Now, we are still concentrating on unraveling the secrets that are hidden in the verse: *"they reclined on the couches in a row and We married them to beautiful nymphs with sharp eyes (Ath Thuur: 52:20)*

It turned out, *"... my spirit... (Al Hijr: 15: 29) "... We married them to beautiful nymphs with sharp eyes (Ath Thuur: 52: 20)*

Now, the question arises,

Why is *"...my spirit...(Al Hijr: 15: 29)"...married...with the nymph...(Ath Thuur: 52:20)?*

The answer is

Hidden in the secret behind the verse: *"... I... have blown into it my spirit... (Al Hijr: 15: 29)*

It turns out, *"...my spirit...(Al Hijr: 15: 29)* is made up of hydrogen atoms, carbon atoms, oxygen atoms and nitrogen atoms.

Well, in hydrogen atoms, carbon atoms, oxygen atoms and nitrogen atoms there are protons, which are positive particles.

Now, it turns out that protons, which are positive particles, cannot exist alone to form the nucleus of an atom. Protons therefore require neutrons, which are neutral particles, to form the nucleus of an atom.

So, it is revealed now why Allah *"...marry them with angels...(Ath Thuur: 52:20)*

It means, *"...my spirit... (Al Hijr: 15: 29)* which is made up of hydrogen atoms, carbon atoms, oxygen atoms and nitrogen atoms, each of which contains a proton, where this proton requires a neutron. Only the hydrogen atom, which contains only one proton, does not need a neutron.

Or in other words, the marriage between *"...my spirit... (Al Hijr: 15: 29)...with the nymph...(Ath Thuur: 52: 20)* is to build the existing atomic nucleus in *"... my spirit... (Al Hijr: 15: 29)*

So, it is now proven that Allah's law or natural law is valid in paradise, hell, and in the universe.

That is, the atoms in the body *"...my spirit... (Al Hijr: 15: 29)* form the atomic nucleus, which consists of positive protons and neutron neutral particles.

Life in paradise, hell and in the universe applies Allah's law or natural law, namely living in pairs, to form the core in the life of all Allah's creatures.

## CONCLUSION

Based on the description above, we can conclude that the secrets that are hidden in the verse: *"they reclined on the couches in a row and We married them to beautiful nymphs with sharp eyes (Ath Thuur: 52:20)*

It turned out, *"... my spirit... (Al Hijr: 15: 29) "... We married them to beautiful nymphs with sharp eyes (Ath Thuur: 52: 20)*
