ABSTRACT

First of all, by asking forgiveness from Allah SWT here I am trying to reveal the signs of Allah SWT's greatness regarding for what reason, Allah promised in paradise with gold and silk bracelets, based on photons, quarks and the molecular structure of nucleic acids or deoxyribonucleic acid (DNA)

In the Qur'an found several verses that are the key to unlocking the secret regarding for what reason, Allah promised in paradise with gold and silk bracelets, namely the following verses:

"Indeed Allah will admit those who believe and do righteous deeds into Paradises beneath which rivers flow. In Paradise they will be adorned with gold and pearl bracelets, and their clothes will be silk. (Al Hajj) :22:23)

"In Paradise there are many fruits for you, some of which you eat. (Az Zukhruf: 43: 73)

"Indeed We have adorned the heavens near the stars... (Al Muluk: 67: 5)

"By the sky which has clusters of stars, (Al Buruj: 85: 1)

"So when I have perfected the event, and have breathed into it my spirit, then submit to it prostrating yourself (Al Hijr: 15: 29)

"So when I have perfected the event and have breathed into it my spirit; then you should fall down prostrating to him." (Shaad: 38: 72)

"Then He perfected and breathed into it His spirit and He made for you hearing, sight and heart; you are very little grateful. (As Sajdah: 32: 9)

"And when the stars fall (At Takwiir: 81: 2)

In an effort to unmask for what reason, Allah promised in paradise gold and silk bracelets, based on photons, quarks and deoxyribonucleic acid or the molecular structure of nucleic acids.

HYPOTHESES

Here I propose the hypothesis that gold is formed when two neutron stars collide, then the fragments that become gold from the two colliding neutron stars are attracted by the Earth's gravity and enter the earth, seen from the point of view of photons, quarks and Deoxyribonucleic acid (DNA).

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that forms a double helix and which contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide is composed of folate, a 5 carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytocine (C) and Thymine (T).

Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5-carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interactions.

QUARK

To find out quarks, we consider one of the hydrogen atoms that are the building blocks of the human body, animals, plants and fruits and inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Then if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with gluons.

WHAT REALLY IS THE SECRET BEHIND THE GOLD AND SILK BRACELETS IN PARADISE

Now, we are still trying to focus our minds to reveal the secret that is hidden in the verse: *“...In paradise they will be adorned with rings of gold and pearls, and their clothes will be silk. (Al Hajj: 22:23)*

What is the secret behind the *“...golden bracelets...(Al Hajj: 22:23) ?*

The answer is,

As it turned out, gold or aurum atoms, could not be made on this earth. This gold is formed when two neutron stars collide with each other, the fragments resulting from this collision are partly gold.

Then the gold fragments are attracted by the earth's gravity, so that they enter the bowels of the earth.

Neutron stars are formed when a star with a mass at least five times the mass of the sun explode into a supernova and die, running out of hydrogen and helium atoms.

This neutron star is about 20 km in diameter, but in a teaspoon, its mass reaches 100 million tons.

Now *“...their clothes are silk (Al Hajj: 22:23)*

It turns out that silk is a protein fiber and its amino acid composition is very similar to that of human skin.

Where these amino acids contain hydrogen atoms, oxygen atoms, carbon atoms and nitrogen atoms. Hydrogen atoms, oxygen atoms, carbon atoms and nitrogen atoms are indispensable in heaven.

GOLD OR AURUM ATOMS DO NOT REACT WITH OXYGEN ATOMS AND HYDROGEN ATOMS, SILK IS A PROTEIN FIBER AND AMINO ACID CONTAINS HYDROGEN ATOMS, OXYGEN ATOMS, CARBON ATOM AND NITROGEN ATOM

Well, apparently, these gold or aurum atoms don't combine or react with oxygen atoms and hydrogen atoms, so oxygen atoms and hydrogen atoms won't be lacking in heaven.

Now the secret that is hidden behind the verse: "...*they are decorated with gold bracelets ... (Al Hajj: 22: 23)* because gold does not take oxygen atoms and hydrogen atoms from "... *My spirit..(Shaad : 38:72)* in paradise.

Then "...*their clothes are silk. (Al Hajj: 22:23)*

Where silk is a protein fiber and amino acids that are very similar to human skin.

The amino acids contain hydrogen atoms, oxygen atoms, carbon atoms and nitrogen atoms.

So, now the secret is revealed, why Allah promised "...*with bracelets of gold ... (Al Hajj: 22:23)* , because it is gold, it does not consume oxygen atoms and hydrogen atoms in heaven, where oxygen atoms and hydrogen atoms are used. indispensable in heaven.

Also Allah promised "...*their garment was silk. (Al Hajj: 22: 23)* because silk contains protein fiber and amino acids. Proteins and amino acids contain hydrogen atoms, oxygen atoms, carbon atoms and nitrogen atoms which are very much needed in heaven for the survival of "...*My spirit..(Shaad : 38: 72)*

HYDROGEN ATOM, OXYGEN ATOM, CARBON ATOM AND NITROGEN ATOM IS NEEDED IN PARADISE

So, onwards, we will unravel the secret behind the verse: "*In paradiser there are many fruits for you... (Az Zukhruf: 43: 73)*

Apparently, the fruit contains oxygen atoms, atoms, carbon and hydrogen atoms. These atoms are very much needed by "...*My spirit..(Shaad : 38: 72)* in paradise.

"...*My spirit..(Shaad : 38:72)* lives in paradise until the age of 10 000000000 000000000 000000000 000000000 000000000 000000000 000000000 000000000 years.

So, during that time "...*my spirit..(Shaad: 38:72)* in paradise must get hydrogen atoms, oxygen atoms, carbon atoms and nitrogen atoms to maintain its survival.

Now, the secret has been revealed, why Allah promised in paradise "...*with gold bracelets ... (Al Hajj: 22: 23)* because gold does not take oxygen atoms and hydrogen atoms from "... *My spirit.. (Shaad: 38:72)* in paradise.

Also Allah promised with "...*their clothes are silk. (Al Hajj: 22: 23)* because silk contains protein fiber and amino acids.

Proteins and amino acids contain hydrogen atoms, oxygen atoms, carbon atoms and nitrogen atoms which are very much needed in heaven for the survival of "...*My spirit..(Shaad : 38: 72)*

CONCLUSION

Based on the description above, we can conclude that the secret that is hidden in the verse: *"...In paradise they will be adorned with rings of gold and pearls, and their clothes will be silk. (Al Hajj: 22:23)*

What is the secret behind the *"...golden bracelets...(Al Hajj: 22:23) ?*

The answer is,

As it turned out, gold or aurum atoms, could not be made on this earth. This gold is formed when two neutron stars collide with each other, the fragments resulting from this collision are partly gold.

Then the gold fragments are attracted by the earth's gravity, so that they enter the bowels of the earth.

Neutron stars are formed when a star with a mass at least five times the mass of the sun explode into a supernova and die, running out of hydrogen and helium atoms.

This neutron star is about 20 km in diameter, but in a teaspoon, its mass reaches 100 million tons.

Now *"...their clothes are silk (Al Hajj: 22:23)*

It turns out that silk is a protein fiber and its amino acid composition is very similar to that of human skin.

Where these amino acids contain hydrogen atoms, oxygen atoms, carbon atoms and nitrogen atoms. Hydrogen atoms, oxygen atoms, carbon atoms and nitrogen atoms are indispensable in heaven.

Well, apparently, these gold or aurum atoms don't combine or react with oxygen atoms and hydrogen atoms, so oxygen atoms and hydrogen atoms won't be lacking in heaven.

Now the secret that is hidden behind the verse: *"...they are decorated with gold bracelets ... (Al Hajj: 22: 23)* because gold does not take oxygen atoms and hydrogen atoms from *"... My spirit..(Shaad : 38:72)* in paradise.

Then *"...their clothes are silk. (Al Hajj: 22:23)*

Where silk is a protein fiber and amino acids that are very similar to human skin.

The amino acids contain hydrogen atoms, oxygen atoms, carbon atoms and nitrogen atoms.

So, now the secret is revealed, why Allah promised *"...with bracelets of gold ... (Al Hajj: 22:23)* , because it is gold, it does not consume oxygen atoms and hydrogen atoms in heaven, where oxygen atoms and hydrogen atoms are used. indispensable in heaven.

Also Allah promised *"...their garment was silk. (Al Hajj: 22: 23)* because silk contains protein fiber and amino acids. Proteins and amino acids contain hydrogen atoms, oxygen atoms, carbon atoms and nitrogen atoms which are very much needed in heaven for the survival of *"...My spirit..(Shaad : 38: 72)*

So, onwards, we will unravel the secret behind the verse: *"In paradiser there are many fruits for you... (Az Zukhruf: 43: 73)*

Apparently, the fruit contains oxygen atoms, atoms, carbon and hydrogen atoms. These atoms are very much needed by "...*My spirit..(Shaad : 38: 72)* in paradise.

"...*My spirit..(Shaad : 38:72)* lives in paradise until the age of 10 000000000 000000000 000000000 000000000 000000000 000000000 000000000 000000000 000000000 000000000 000000000 years.

So, during that time "...*my spirit..(Shaad: 38:72)* in paradise must get hydrogen atoms, oxygen atoms, carbon atoms and nitrogen atoms to maintain its survival.

Now, the secret has been revealed, why Allah promised in paradise "...*with gold bracelets ... (Al Hajj: 22: 23)* because gold does not take oxygen atoms and hydrogen atoms from "... *My spirit.. (Shaad: 38:72)* in paradise.

Also Allah promised with "...*their clothes are silk. (Al Hajj: 22: 23)* because silk contains protein fiber and amino acids.

Proteins and amino acids contain hydrogen atoms, oxygen atoms, carbon atoms and nitrogen atoms which are very much needed in heaven for the survival of "...*My spirit..(Shaad : 38: 72)*
