ABSTRACT

Before I write down the problem with the real reason, humans cannot see Allah, first I ask forgiveness from Allah SWT. Here I try to open the veil that covers the secret about why humans cannot see Allah, from the point of view of the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

There are several verses that become Allah's secret unlocking tool about the reason why humans cannot see Allah, namely the following verses:

"Allah... the light of the skys and the earth... the light upon the light... (An Nuur: 24: 35)

"So when I have perfected the event and have breathed into it my spirit; then you should fall down prostrating to him." (Shaad: 38: 72)

"So when I have perfected the event, and have breathed into it my spirit, then submit to it prostrating yourself (Al Hijr: 15: 29)

"Then He perfected and breathed into it His spirit and He made for you hearing, sight and heart; you are very little grateful. (As Sajdah: 32: 9)

"And if We made the apostle an angel, We would certainly have made him a man and, of course We would have doubted about them what they doubted about themselves (Al An'aam: 6:9)

"And it is not possible for any human being that Allah can speak with him except by means of revelation or behind a veil or by sending a messenger and then it is revealed to him with His permission what He wills. Verily, He is Most High, Most Wise. (Ash Shuura: 42: 51)

"And when My servants ask you about Me, then, that I am near. I grant the supplication of those who pray when they ask Me, then let them fulfill (all My commands) and let them believe in - Me, that they may always be in the truth (Al Baqarah: 2: 186)

"He is the First and the Last, the Outward and the Inward; and He is All-Knowing of all things. (Al Hadid: 57:3)

"Allah did not create and resurrect you except as one soul. Indeed, Allah is All-Hearing, All-Seeing. (Luqman: 31: 28)

"And We made a wall before them and behind them a wall, and We covered them so that they could not see." (Yaasiin: 36:9)

"Allah holds the soul when it dies and the soul that has not died in its sleep; so He holds the soul which He has appointed death and He releases another soul until the appointed time. Verily in that are signs of Allah's power for a people who think (Az Zumar : 39: 42)

"Angels and spirits ascend to God in a day the measure of which is fifty thousand years (Al Ma'aarij: 70: 4)

And to Allah belongs the east and the west, so wherever you turn there is the face of Allah. Verily

Allah is All-Wise and All-Knowing. (Al Baqarah: 2: 115)

"And verily We have created man and know what his heart whispers, and We are nearer to him than his jugular vein." (Qaf: 50:16)

In an effort to unmask Allah's secret about why humans cannot see Allah, I use a base of deoxyribonucleic acid or deoxyribonucleic acid or the molecular structure of nucleic acids.

HYPOTHESIS

Here I put forward the hypothesis that humans cannot see Allah because Allah's speed is 18 262 980 km per second, from the point of view of Deoxyribonucleic acid (DNA).

PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interactions.

QUARK

If we want to know quarks, then we consider one of the hydrogen atoms that are the building blocks of the human body, animals, plants and fruits as well as inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Then if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with gluons.

DEOXYRIBONUCLIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that forms a double helix and contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide consists of folate, a 5-carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytosine (C) and Thymine (T).

Guanine (G) consists of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytosine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. A 5-carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

WITH ALLAH'S SPEED OF 18 262 980 KM PER SECOND, HUMAN EYES WILL NOT BE ABLE TO FOLLOW AND SEE ALLAH

Now, we are still focusing our minds on uncovering the secrets contained behind the verse:
"...wherever you turn, there is the face of Allah... (Al Baqarah: 2: 115)

It turns out that here Allah has declared that wherever our eyes look, there is Allah, even though human eyes cannot see Allah.

Why can't the human eye see Allah?

The answer is hidden in the secret behind the verse: *"... a day whose levels are fifty thousand years (Al Ma'aarij: 70: 4)*

Well, it turns out that if Allah moves just a little within 1 second, then Allah has moved a distance of 18 262 980 km.

With the speed of Allah moving 18 262 980 km per second, it is impossible for our eyes to follow and see Allah's movements.

Well, because of this, Allah simply declares "*...wherever you turn, there is the face of Allah... (Al Baqarah: 2: 115)*

Before the human head had time to glance to see where Allah was, it turned out that Allah had moved places, with a speed of 18 262 980 km per second.

So, until the end of the world, humans with their eyes will not be able to follow and see Allah.

HUMANS CAN FOLLOW AND SEE ALLAH THROUGH MY SPIRIT IN THE HUMAN BODY

Now, to directly see Allah with human eyes is an impossibility, but through "*...My spirit...(Shaad : 38:72)* humans can follow and see Allah.

Well, humans by holding the veins in their hands and feeling the pulse of the heart that circulates blood throughout the body, then that's where they will find and feel Allah.

Because "*... my spirit...(Shaad : 38: 72)* which is made up of hydrogen atoms, oxygen atoms, carbon atoms and nitrogen atoms, enters the blood and becomes the building block of blood.

Also if humans see their own blood because of wounds, then humans can see Allah through "*... my spirit... (Shaad: 38: 72)* which is in the blood, because blood contains oxygen atoms, carbon atoms, hydrogen atoms, nitrogen atoms. .

Likewise, when humans inhale, they feel the oxygen atoms which are the building blocks of "*... My spirit... (Shaad: 38: 72)* enters the nose and continues into the lungs.

Well, that's all one proof that humans can follow, feel and see Allah through "*...my spirit...(Shaad: 38:72)* which is in the human body.

CONCLUSION

Based on the description above, we can conclude that the secrets contained behind the verse: "*...wherever you turn, there is the face of Allah... (Al Baqarah: 2: 115)*

It turns out that here Allah has declared that wherever our eyes look, there is Allah, even though human eyes cannot see Allah.
