ABSTRACT

Before I write down the problem for what reason, most people in the world burn corpses, rather than being buried in the earth, I first ask forgiveness from Allah SWT. Here I try to unmask the secret about why, most people in the world burn corpses, rather than being buried in the earth, from the point of view of the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

There are several verses that become Allah's secret unlocking tool about why, most people in the world burn their corpses, rather than being buried on earth, namely the following verses:

"Allah... the light of the skys and the earth... the light upon the light... (An Nuur: 24: 35)

"So when I have perfected the event and have breathed into it my spirit; then you should fall down prostrating to him." (Shaad: 38: 72)

"So when I have perfected the event, and have breathed into it my spirit, then submit to it prostrating yourself (Al Hijr: 15: 29)

"Then He perfected and breathed into it His spirit and He made for you hearing, sight and heart; you are very little grateful. (As Sajdah: 32: 9)

"And if We made the apostle an angel, We would certainly have made him a man and, of course We would have doubted about them what they doubted about themselves (Al An'aam: 6:9)

"And it is not possible for any human being that Allah can speak with him except by means of revelation or behind a veil or by sending a messenger and then it is revealed to him with His permission what He wills. Verily, He is Most High, Most Wise. (Ash Shuura: 42: 51)

"And when My servants ask you about Me, then, that I am near. I grant the supplication of those who pray when they ask Me, then let them fulfill (all My commands) and let them believe in - Me, that they may always be in the truth (Al Baqarah: 2: 186)

"He is the First and the Last, the Outward and the Inward; and He is All-Knowing of all things. (Al Hadid: 57:3)

"Allah did not create and resurrect you except as one soul. Indeed, Allah is All-Hearing, All-Seeing. (Luqman: 31: 28)

"And We made a wall before them and behind them a wall, and We covered them so that they could not see." (Yaasiin: 36:9)

"And among His signs is that you see the earth dry and arid, so when We send down water on it, it will surely move and thrive. Indeed, God Who gives life to it, surely can bring back the dead... (Fushshilat: 41: 39)

"Allah holds the soul when it dies and the soul that has not died in its sleep; so He holds the soul which He has appointed death and He releases another soul until the appointed time. Verily in that are signs of Allah's power for a people who think (Az Zumar : 39: 42)

"It is He Who created the heavens and the earth in six days: Then He resides on the Throne. He knows what enters the earth and what comes out of it and what descends from the heavens and what ascends to Him. And He is with you in wherever you are. And Allah is All-Seeing of what you do. (Al Hadid: 57:4)

"O mankind, if you are in doubt about the resurrection, then indeed We have created you from soil, then from a drop of semen, then from a clot of blood, then from a lump of flesh which is perfect and imperfect, so that We may explain it to you and determine in the womb, what We will until a predetermined time, then We bring you out as babies, then you come to maturity, and some of you are passed away and some of you have extended their life to senility, so that he will no longer know anything that is wrong. he knew before. And you see the earth is dry, then when We send down water on it, the earth lives and is fertile and grows all kinds of beautiful plants (Al Hajj: 22: 5)

"And verily We have created man and know what his heart whispers, and We are nearer to him than his jugular vein." (Qaf: 50:16)

In an effort to unmask Allah's secret about why most people in the world burn their bodies, instead of being buried in the earth, I use a base of deoxyribonucleic acid or deoxyribonucleic acid or the molecular structure of nucleic acids.

HYPOTHESIS

Here I put forward the hypothesis that most people in the world burn corpses, rather than being buried in the earth, because *"...my spirit...(Shaad: 38:72)* quickly leaves the body of a corpse, compared to if a corpse is buried in the earth, seen from the Deoxyribonucleic acid (DNA) point of view

PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interactions.

QUARK

If we want to know quarks, then we consider one of the hydrogen atoms that are the building blocks of the human body, animals, plants and fruits as well as inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Then if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with gluons.

DEOXYRIBONUCLIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that forms a double helix and contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide consists of folate, a 5-carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytosine (C) and Thymine (T).

Guanine (G) consists of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytosine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms. 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. A 5-carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

SOME HUMANS THINK HUMANS ARE CREATED AND BUILT FROM THE STORM OF A DEATH STAR

Now, we are still concentrating on unraveling the secrets contained behind the verse: "*... We have made you from clay, then from a drop of semen, then from a clot of blood, then from a lump of flesh that is perfect and imperfect..*" (Al Hajj: 22:5)

It turns out that here God has explained to humans that humans were created "*... from soil...*" (Al Hajj: 22: 5)

Now, the question arises,

What's really in the ground?

The answer is,

It is hidden in the secret behind the verse: "*...see this earth is dry, then when We have sent down water on it, the earth lives and is fertile and grows all kinds of beautiful plants.*" (Al Hajj: 22:5)

Well, it turns out that the earth after getting water whose water is a combination of oxygen atoms and hydrogen atoms, then meets with nitrogen atoms and carbon atoms in the earth, then "*...live the earth and be fertile...*" (Al Hajj :22:5)

So, actually, humans were created from soil because soil contains hydrogen atoms, oxygen atoms, nitrogen atoms and carbon atoms.

Or in other words "*...I perfected the incident and I breathed into it my spirit...*" (Shaad: 38:72) where "*...My spirit...*" (Shaad: 38:72) is made up of hydrogen atoms, oxygen atoms, nitrogen atoms and carbon atoms in the soil or on our earth.

Furthermore, the stars and the sun shine because there are hydrogen atoms to fuel the stars and fuel the sun.

Now, without hydrogen atoms there would be no stars and sun. Stars and suns shine because there are hydrogen atoms to fuel the stars and sun.

If the star and sun have run out of hydrogen atoms, then the star and sun will die.

Well, when the star has run out of atomic hydrogen fuel, and the star is bigger than the sun, the star will die by exploding.

When a star explodes, energy is released in the form of various rays of light, appearing to be like a burst of fire and vomit.

Well, the overflowing and spitting fire that comes out of a dead star is considered by some people as a symbol that a dead human must release fire, that is how the corpse is burned.

BURNED BODIES QUICKLY REMOVE CARBON DIOXIDE FROM THE BODY OF BURNED CORPSE

Now, because the human body is made up of oxygen atoms, hydrogen atoms, nitrogen atoms and carbon atoms, when a dead human is burned, carbon dioxide or carbon dioxide is released from the

corpse quickly.

Or in other words, with the corpse burned, then "... *my spirit...*" (*Shaad: 38: 72*) which is built by hydrogen atoms, oxygen atoms, nitrogen atoms and carbon atoms quickly comes out of the burned corpse's body.

Well, if a human dies and is buried in the earth, then "...*my spirit...*" (*Shaad: 38: 72*) comes out of the corpse after 30 days.

WITHOUT TREES, GROWTH AND FLOWERS AROUND THE BURNING PLACE, THE CARBON DIOXIDE WILL POLLUTE THE ENVIRONMENT AND DAMAGE OZONE

Now, because "...*my spirit...*" (*Shaad: 38: 72*) which is built by oxygen atoms, hydrogen atoms, carbon atoms and nitrogen atoms is burned, then "...*We have made you from the soil, then from a drop of semen, then from a clot of blood, then from a lump of flesh which is perfect in appearance and which is not perfect...*" (*Al Hajj: 22:5*) quickly come out of the body of the burnt corpse and face Allah.

If there are no trees, plants and flowers around the burning corpse, then the carbon dioxide released from the burned corpse will not absorb it. So that carbon dioxide will pollute the environment and destroy ozone.

Now, if there are trees, plants and flowers around the burning corpse, then the carbon dioxide emitted from the burned corpse will be absorbed by the trees, plants and flowers. Where only oxygen atoms and carbon atoms that form coldioxide or carbonic acid substances are absorbed by trees, plants and flowers.

Then trees, plants and flowers only need carbon atoms to make glucose as food for plants and flowers. While the oxygen atom is released again.

BECAUSE HUMANS ARE CREATED FROM THE SOIL, WHEN HUMANS DIE, YOU MUST RETURN TO THE SOIL, NOT BE BURNED

Well, now it has been revealed that the secret that is hidden in the secret behind the verse: "... *We have made you from the soil...*" (*Al Hajj: 22: 5*) that is, if a human dies, it must be returned to the soil, not burned. "... *my spirit...*" (*Shaad: 38: 72*) from the body of the buried corpse.

CONCLUSION

The conclusions that can be drawn from the explanation above are the secrets contained behind the verse: "... *We have made you from clay, then from a drop of semen, then from a clot of blood, then from a lump of flesh that is perfect and imperfect..*" (*Al Hajj: 22:5*)

It turns out that here God has explained to humans that humans were created "... *from soil...*" (*Al Hajj: 22: 5*)

Now, the question arises,

What's really in the ground?

The answer is,

It is hidden in the secret behind the verse: "...*see this earth is dry, then when We have sent down water on it, the earth lives and is fertile and grows all kinds of beautiful plants.*" (*Al Hajj: 22:5*)

Well, it turns out that the earth after getting water whose water is a combination of oxygen atoms and hydrogen atoms, then meets with nitrogen atoms and carbon atoms in the earth, then **"...live the earth and be fertile...(Al Hajj :22:5)**

So, actually, humans were created from soil because soil contains hydrogen atoms, oxygen atoms, nitrogen atoms and carbon atoms.

Or in other words **"...I perfected the incident and I breathed into it my spirit...(Shaad: 38:72)** where **"...My spirit..." (Shaad: 38:72)** is made up of hydrogen atoms, oxygen atoms, nitrogen atoms and carbon atoms in the soil or on our earth.

Furthermore, the stars and the sun shine because there are hydrogen atoms to fuel the stars and fuel the sun.

Now, without hydrogen atoms there would be no stars and sun. Stars and suns shine because there are hydrogen atoms to fuel the stars and sun.

If the star and sun have run out of hydrogen atoms, then the star and sun will die.

Well, when the star has run out of atomic hydrogen fuel, and the star is bigger than the sun, the star will die by exploding.

When a star explodes, energy is released in the form of various rays of light, appearing to be like a burst of fire and vomit.

Well, the overflowing and spitting fire that comes out of a dead star is considered by some people as a symbol that a dead human must release fire, that is how the corpse is burned.

Now, because the human body is made up of oxygen atoms, hydrogen atoms, nitrogen atoms and carbon atoms, when a dead human is burned, carbon dioxide or carbon dioxide is released from the corpse quickly.

Or in other words, with the corpse burned, then **"... my spirit..." (Shaad: 38: 72)** which is built by hydrogen atoms, oxygen atoms, nitrogen atoms and carbon atoms quickly comes out of the burned corpse's body.

Well, if a human dies and is buried in the earth, then **"...my spirit..." (Shaad: 38: 72)** comes out of the corpse after 30 days.

Now, because **"...my spirit..." (Shaad: 38: 72)** which is built by oxygen atoms, hydrogen atoms, carbon atoms and nitrogen atoms is burned, then **"...We have made you from the soil, then from a drop of semen, then from a clot of blood, then from a lump of flesh which is perfect in appearance and which is not perfect...(Al Hajj: 22:5)** quickly come out of the body of the burnt corpse and face Allah.

If there are no trees, plants and flowers around the burning corpse, then the carbon dioxide released from the burned corpse will not absorb it. So that carbon dioxide will pollute the environment and destroy ozone.

Now, if there are trees, plants and flowers around the burning corpse, then the carbon dioxide emitted from the burned corpse will be absorbed by the trees, plants and flowers. Where only oxygen atoms and carbon atoms that form coldioxide or carbonic acid substances are absorbed by

trees, plants and flowers.

Then trees, plants and flowers only need carbon atoms to make glucose as food for plants and flowers. While the oxygen atom is released again.

Well, now it has been revealed that the secret that is hidden in the secret behind the verse: "... *We have made you from the soil...* (*Al Hajj: 22: 5*) that is, if a human dies, it must be returned to the soil, not burned. "... *my spirit...*" (*Shaad: 38: 72*) from the body of the buried corpse.
