## ABSTRACT

First of all, by asking forgiveness from Allah SWT, here I try to reveal the signs of Allah SWT's greatness regarding Allah's secret regarding what reason, the Prophet Muhammad saw mi'raj at night, from the point of view of photons, quarks and the molecular structure of nucleic acids or deoxyribonucleic acid (deoxyribonucleic acid). DNA)

The signs of Allah's greatness regarding Allah's secret regarding, for what reason, the Prophet Muhammad mi'raj at night, namely in the verses:

*"And We put before them a wall and behind them a wall, and We covered them so that they could not see. (Yaasiin: 36: 9)*

*"He is Allah, Who created all that is on earth for you and He willed (created) the heavens, then He made the seven heavens. And He is Knower of all things." (Al Baqarah: 2:29)*

*"So He made it seven heavens in two periods. He revealed in each sky its affairs. And We adorn the near sky with bright stars and We take care of it as well as possible. Such is the provision of the Mighty, All-Knowing. (Fushshilat : 41:12)*

*"And indeed Muhammad saw Gabriel at another time, (An Najm: 53:13) in Sidratil Muntaha (An Najm: 53:14)*

*"Nearby there is a paradise to live in, (An Najm: 53:15)*

*"when Sidratil Muntaha was overwhelmed by something that encompassed him. (An Najm: 53:16)*

*"So when I have perfected the event, and have breathed into it my spirit, then submit to it prostrating yourself (Al Hijr: 15: 29)*

*"His sight did not turn away from that which he saw and did not go beyond it. (An Najm: 53:17)*

In an effort to unveil the greatness of Allah SWT regarding the secret of Allah regarding why, the Prophet Muhammad saw mi'raj at night, I use the basis of photons, quarks and the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

## HYPOTHESIS

Here I propose the hypothesis that the Prophet Muhammad entered the Sidratil Muntaha through a symmetrical universe seen from photons, quarks and the molecular structure of nucleic acids or deoxyribonucleic acid (DNA).

## DEOXYRIBONUCLEIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that form a double helix and which contains polynucleotide macromolecules arranged in repeatedly from nucleotide polymers. This nucleotide is composed of folate, a 5-carbon sugar and one of the nitrogenous bases. The

nitrogenous bases are Guanine (G), Adenine(A), Cytocine(C) and Thymine (T).

Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 atom oxygen and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

## **HUMAN EYES CLOSE FROM THE FRONT AND FROM BACK**

Now, we are still trying to focus our minds to reveal the secret contained in the verse: *"... in fact Muhammad saw Gabriel at another time, (An Najm: 53:13) in Sidratil Muntaha (An Najm: 53: 14) Nearby there is a paradise to live in, (An Najm: 53:15)*

Well, the incident was one night on the 27th of Rajab in the 11th year of the prophetic year, which coincided with the 8th of March 620 AD.

Now the question arises,

Why did the Prophet Muhammad saw perform mi'raj on the night of the 27th of Rajab in the 11th year of the prophethood?

The answer is

It is hidden in the secret behind the verse: *"... We put before them a wall and behind them a wall, and We covered them so that they could not see. (Yaasiin: 36: 9)*

As it turns out, humans are unable to see, because the human eye can only see light in the region of the electromagnetic spectrum between 430 and 740 nanometers. If there is light in the electromagnetic spectrum below 430 nanometers and light in the electromagnetic spectrum above 740 nanometers, the human eye cannot see the light.

Or in other words, the human eye *"...We cover them so they can't see. (Yaasiin: 36:9) "...before them a wall and behind them a wall...(Yaasiin: 36:9)*

Well, because the human eye is limited in the power of his eyes, then to enter a symmetrical universe, which is transparent, in which there is *"Sidratil Muntaha (An Najm: 53:14)* and *"Nearby there is a paradise to live in, (An Najm : 53:15)* , must use the power of hearing.

Why do humans have to use the power of hearing?

Because Allah only closed *"... in front of them a wall and behind them a wall ... (Yaasiin: 36: 9)* so that the human eye *"...can not see. (Yaasiin: 36: 9)*

## **PROPHET MUHAMMAD SAW ENTERED SIDRATIL MUNTAHA NIGHT BY USING HEARING POWER**

Well, one night on the 27th of Rajab in the 11th year of the prophetic year, Allah Allah brought the symmetrical universe, which is transparent, in which there is *"Sidratil Muntaha (An Najm: 53:14)* with our universe which can be seen by our eyesight. .

Well, the meeting place of the symmetrical universe, which is transparent to our universe that can

be seen by our eyes, is the entrance, around the Al-Aqsa Mosque.

With the power of hearing the Prophet Muhammad saw, then the Prophet Muhammad saw where the entrance to the symmetrical universe, which is transparent, in which there is *"Sidratil Muntaha (An Najm: 53: 14)"*

### **THE PROPHET MUHAMMAD SAW IN A SYMMETRY UNIVERSE WHICH THERE'S SIDRATIL MUNTABA, CANNOT BE FOR LONG.**

Well, because the heavens are special for *".. my spirit ... (Al Hijr: 15: 29)"* then, humans who still have bodies, cannot stay long, as was the time when Adam and his wife were in heaven, only temporarily, before expelled from heaven. *"...We say: "Come down! some of you are enemies to others, and for you is a dwelling place on earth..." (Al Baqarah: 2:36)"*

Likewise with the Prophet Muhammad saw, could not stay long in *"Sidratil Muntaha (An Najm: 53:14)"*, because the Prophet Muhammad saw still has a body.

Now, it has been revealed, the secret hidden behind the verse: *"... in fact Muhammad saw Jibril at another time, (An Najm: 53:13) in Sidratil Muntaha (An Najm: 53:14) Nearby is heaven. residence, (An Najm: 53:15)"*

Namely the Prophet Muhammad saw entered into *"... Sidratil Muntaha (An Najm: 53: 14)"* at night, by using the power of hearing, because the power of the Prophet Muhammad's eyes was limited, he could only see light in the electromagnetic spectrum region between 430 and 740 nanometers.

Because the light inside *"... Sidratil Muntaha (An Najm: 53:14)"* is in the electromagnetic spectrum area below 430 nanometers and in the electromagnetic spectrum area above 740 nanometers, the Prophet Muhammad's eyesight cannot see it.

### **CONCLUSION**

From what has been described above we can now conclude that the secret contained in the verse: *"... in fact Muhammad saw Gabriel at another time, (An Najm: 53:13) in Sidratil Muntaha (An Najm: 53: 14) Nearby there is a paradise to live in, (An Najm: 53:15)"*

Because Allah only closed "... *in front of them a wall and behind them a wall ... (Yaasiin: 36: 9)* so that the human eye "...*can not see. (Yaasiin: 36: 9)*
