ABSTRACT

Firstly, by asking forgiveness from Allah SWT, here I try to reveal the signs of the greatness of Allah SWT regarding for what reason, humans make incarnations, as beliefs, from the point of view of photons, quarks and the molecular structure of nucleic acids or deoxyribonucleic acid (DNA).

The signs of Allah's greatness regarding, for what reason, humans make incarnations, as beliefs, namely in the verses:

"And they ask you about the spirit. Say: "The spirit belongs to my Lord, and knowledge is not given to you but a little." (Al Israa ' : 17: 85)

"Then He perfected and breathed into it His spirit and He made for you hearing, sight and hearts; you are very little grateful. (As Sajdah: 32: 9)

"So when I have perfected the event, and have breathed into it my spirit, then submit to it prostrating yourself (Al Hijr: 15: 29)

"And they ask you about the spirit. Say: "The spirit belongs to the business of my Lord, and knowledge is not given to you but a little." (Al Israa ' : 17: 85)

"O People of the Book, do not transgress in your religion, and do not say against Allah except the truth. Verily, the Messiah, Jesus, the son of Mary, is the Messenger of Allah and His words which He conveyed to Mary, and a spirit from Him. So believe in Allah and His messengers and do not say: "three", stop. It is better for you. Verily Allah is the One God, Glory be to Allah from having children, everything in the heavens and the earth belongs to Him Sufficient is Allah as the Sustainer.(An Nisaa' : 4:171)

"And Mary, who has kept her honor, then We breathed into her a spirit from Us and We made her and her child a great sign for the worlds (Al Anbiyaa': 21: 91)

"So he put a veil from them; then We sent our spirit to him, and he appeared before him a perfect human being" (Maryam: 19:17)

"Allah holds the soul when it dies and the soul that has not died in its sleep; so He holds the soul which He has appointed death and He releases another soul until the appointed time. Verily in that are the signs of Allah's power for a people who think (Az Zumar: 39:42)

"It is Allah Who created the heavens and the earth and sent down rain from the sky, then He brought forth with it various fruits as sustenance for you; and He has subjected the ark to you so that the ark may sail on the sea by His will, and He has subjected to you rivers (Ibrahim: 14:32)

"On the day the earth will be replaced with another earth and sky, and they will all gather before the presence of Allah, the One, the Most Mighty (Abraham: 14:48)

"Who has created the seven heavens in layers. You never see in the creation of the Most Gracious God anything that is not balanced. So look over and over again, do you see anything that is not balanced? (Al Mulk: 67: 3)

In an effort to unveil the greatness of Allah SWT regarding, for what reason, humans make

incarnations, as a belief, I use the basis of photons, quarks and the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

HYPOTHESIS

Here I propose the hypothesis of human incarnation through carbon atoms, hydrogen atoms, nitrogen atoms and oxygen atoms, seen from photons, quarks and the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that form a double helix and which contains polynucleotide macromolecules arranged in repeatedly from nucleotide polymers. This nucleotide is composed of folate, a 5-carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine(A), Cytocine(C) and Thymine (T).

Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 atom oxygen and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interactions.

QUARK

If we want to know quarks, then we consider one of the hydrogen atoms that is the building block of the human body, animals, plants and fruits and inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Then if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with gluons.

MY SPIRIT THAT COMES OUT OF THE BODY OF THE DEATH FROM WITHIN THE TOMB

Now, we are still trying to focus our minds to reveal the secret behind the verse: *"It is Allah who has sent down rain water from the sky, then He brings out with that rain various fruits as sustenance for you... (Ibrahim : 14:32)*

Apparently, rainwater, which contains oxygen and hydrogen atoms, makes the soil fertile, because oxygen atoms and hydrogen atoms meet with nitrogen atoms and carbon atoms in the soil.

Or in other words, with the union of oxygen atoms, hydrogen atoms, nitrogen atoms and carbon atoms, it becomes fertile soil, so that various trees, plants, plants, vegetables, flowers grow.

Now, the oxygen atoms, hydrogen atoms, nitrogen atoms and carbon atoms are the building blocks of *"...my spirit...(Al Hijr: 15: 29)* that comes out of the bodies of the dead from the grave, *"...they are all gathered before the presence of Allah, the One, the Most Mighty (Ibrahim: 14:48)*

However, there are some carbon atoms and hydrogen atoms from *"...my spirit...(Al Hijr: 15: 29)* to

form carbon dioxide, which is carbon dioxide absorbed by trees, plants, plants, vegetables, flowers.

THE OXYGEN ATOM OUT OF MY SPIRIT INCARNATED INTO OTHER HUMANS AND ANIMALS

Now the carbon dioxide absorbed by trees, plants, plants, vegetables, flowers is only hydrogen atoms, while oxygen atoms are released, and inhaled by humans and animals.

So, the oxygen atoms from my spirit that came out of the dead in the grave incarnated into a living human on earth and became an animal.

Now, the incarnation of the oxygen atom into a living human and an animal is the law of Allah or the law of nature. So, it doesn't need to be used as a belief.

CONCLUSION

From what has been described above we can now conclude that the secret behind the verse: *"It is Allah who has sent down rain water from the sky, then He brings out with that rain various fruits as sustenance for you... (Ibrahim : 14:32)*

Apparently, rainwater, which contains oxygen and hydrogen atoms, makes the soil fertile, because oxygen atoms and hydrogen atoms meet with nitrogen atoms and carbon atoms in the soil.

Or in other words, with the union of oxygen atoms, hydrogen atoms, nitrogen atoms and carbon atoms, it becomes fertile soil, so that various trees, plants, plants, vegetables, flowers grow.

Now, the oxygen atoms, hydrogen atoms, nitrogen atoms and carbon atoms are the building blocks of *"...my spirit...(Al Hijr: 15: 29)* that comes out of the bodies of the dead from the grave, *"...they are all gathered before the presence of Allah, the One, the Most Mighty (Ibrahim: 14:48)*

However, there are some carbon atoms and hydrogen atoms from *"...my spirit...(Al Hijr: 15: 29)* to form carbon dioxide, which is carbon dioxide absorbed by trees, plants, plants, vegetables, flowers.

Now the carbon dioxide absorbed by trees, plants, plants, vegetables, flowers is only hydrogen atoms, while oxygen atoms are released, and inhaled by humans and animals.

So, the oxygen atoms from my spirit that came out of the dead in the grave incarnated into a living human on earth and became an animal.

Now, the incarnation of the oxygen atom into a living human and an animal is the law of Allah or the law of nature. So, it doesn't need to be used as a belief.
