## ABSTRACT

First of all, by asking forgiveness from Allah SWT, here I try to reveal the signs of Allah SWT's greatness regarding Allah's secret about what reason, humans who have not died can enter paradise, from the point of view of photons, quarks and the molecular structure of nucleic acids or deoxyribonucleic acid (DNA). )

The signs of Allah's greatness regarding Allah's secret regarding for what reason, humans who have not died can enter paradise, namely in the verses:

*"And indeed Muhammad saw Gabriel at another time, (An Najm: 53:13) in Sidratil Muntaha (An Najm: 53:14)*

*"... We made the apostle an angel, ... he was a man ... (Al An'aam: 6: 9)*

*"Nearby there is a paradise to live in, (An Najm: 53:15)*

*"when Sidratil Muntaha was overwhelmed by something that encompassed him. (An Najm: 53:16)*

*"His sight did not turn away from that which he saw and did not go beyond it. (An Najm: 53:17)*

*"So when I have perfected the event, and have breathed into it my spirit, then submit to it prostrating yourself (Al Hijr: 15: 29)*

*And We said: "O Adam, dwell in this paradise for you and your wife, and eat from its abundant good food wherever you like, and do not approach this tree, which causes you to be of the wrongdoers." Baqarah : 2:35)*

*"He is Allah, Who created all that is on earth for you and He willed the skys, then He made the seven skys. And He is All-Knowing of all things." (Al Baqarah: 2:29)*

*"Who has created the seven skys in layers. You never see in the creation of the Most Gracious God anything that is not balanced. So look over and over again, do you see anything that is not balanced? (Al Mulk: 67: 3)*

*"So He made it seven skys in two periods. He revealed in each sky its affairs. And We adorn the near sky with bright stars and We take care of it as well as possible. That is the provision of the Mighty, All-Knowing. : 41:12)*

In an effort to open the veil of Allah SWT's greatness regarding what reason, humans who have not died can enter paradise, I use the basis of photons, quarks and the molecular structure of nucleic acid or deoxyribonucleic acid (DNA).

## HYPOTHESIS

Here I propose the hypothesis that humans who have not died can enter paradise through a symmetrical universe, seen from photons, quarks and the molecular structure of nucleic acids or

deoxyribonucleic acid (DNA).

## **DEOXYRIBONUCLEIC ACID (DNA)**

DNA is a repository of genetic information that has a double structure that form a double helix and which contains polynucleotide macromolecules arranged in repeatedly from nucleotide polymers. This nucleotide is composed of folate, a 5-carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine(A), Cytocine(C) and Thymine (T).

Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 atom oxygen and 5 hydrogen atoms. Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms. 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

## **PHOTON**

Photons are elementary particles of the boson type and carriers of electromagnetic interactions.

## **QUARK**

If we want to know quarks, then we consider one of the hydrogen atoms that is the building block of the human body, animals, plants and fruits and inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Then if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with gluons.

## **PARADISE IS AN INVISIBLE UNIVERSE OF SYMMETRY**

Now, we are still trying to focus our minds to reveal the secrets contained in the verse: *"...He made the seven skys in two times...And We decorated the sky that is near with bright stars...(Fushshilat: 41:12)*

It turns out, *"...the seven skys...(Fushshilat: 41:12)* is a picture of the universe that is visible to the human eye, and the universe that is invisible to the human eye.

Now, there is only one universe that is visible to the human eye, but the other six are transparent universes, meaning that the human eye cannot see it.

This is what Allah declared *"...He made the seven skys in two times...And We adorned the near sky with bright stars...(Fushshilat: 41:12)*

Well *"... We adorn the near sky with bright stars... (Fushshilat: 41:12)*

Now *"...the sky that is near...(Fushshilat: 41:12)* is which sky?

The answer is

The sky is *"...decorated...with brilliant stars...(Fushshilat: 41:12)*

That is, the universe that is visible to the human eye, which contains billions of stars. Where these stars form billions of galaxies, then each galaxy forms a galaxy cluster, then galaxy clusters form a

galaxy supercluster.

## SEVEN SKY, SEVEN SYMMETRY UNIVERSES

Now then, we will uncover the secret behind the verse: *"...Allah,...willed the skys, then He made seven skys..." (Al Baqarah: 2:29)*

It turns out, *"...the seven skys..." (Al Baqarah: 2:29)* is composed of seven universes, one of which, this universe, which consists of stars, which form billions of galaxies, galaxies form galaxy clusters, galaxy clusters form galaxy superclusters.

Well, this universe is a universe that is visible to the human eye.

Then, the other six universes are translucent to the human eye, meaning they cannot be seen by the human eye. Because, the human eye's vision is limited.

Because our eyes can only see light in the region of the electromagnetic spectrum between 430 and 740 nanometers. If there is light in the electromagnetic spectrum below 430 nanometers and light in the electromagnetic spectrum above 740 nanometers, our eyes cannot see the light.

## HOW THERE ARE SEVEN SYMMETRICAL UNIVERSES

Well, then we try to open the secret hidden behind the verse: *"Who has created the seven skys in layers ... (Al Mulk: 67: 3)*

Apparently, created *"... the seven skys in layers... (Al Mulk: 67: 3)*

That is, the sky or the universe with one another interacts with each other, and forms a unified universe that is *"...balanced...(Al Mulk: 67: 3)*

Or in other words, the universe that is visible to the human eye with the other six universes, which are transparent to the human eye, is symmetrical.

## BASED ON WHAT, ALLAH CREATED SEVEN UNIVERSES

Well, next, we reveal the secret behind the seven universes.

It turns out that the universe that is visible to our eyes, is only 5% of the mass consisting of atoms of the existing mass.

Where these 5% atoms can be further divided according to the division based on gases and chemicals consisting of 74% hydrogen gas, 23% helium gas, 1% oxygen gas, 0.5% carbon, 0.5% neon gas, 0.1% iron and 0.9% other elements.

While the other mass consists of mass in the form of dark matter which amounts to 23%.

Where this dark matter functions as a gravitational force that binds stars, planets, and moons around it.

The remaining 72% is in the form of dark energy, where this dark energy causes the universe to accelerate, meaning that the speed of the universe is increasing.

Now, how is it created: *"... the seven skys... (Fushshilat: 41:12) ?*

The answer is

It turns out that if we add up the 5% mass of the universe with the mass of 23% dark matter, the total becomes 28% of the mass.

Then we divide that 28% mass by 7 universes, then each universe has the same 4% mass.

So the secret behind the verse *"... You never see in the creation of the Most Gracious God something that is not balanced... So look over and over again, do you see something that is not balanced? (Al Mulk: 67: 3)*

That is, Allah created 7 universes that have the same mass, that is, each universe has 4% mass which makes the 7 universes symmetrical.

Or in other words, the 7 universes created by Allah are “balanced (Al Mulk: 67: 3) or the 7 universes are symmetrical.

Where of these 7 universes, six universes are translucent to the human eye.

## **PARADISE IS IN A SYMMETRY UNIVERSE, THAT IS THROUGH HUMAN EYES**

Now then, we will reveal the secret hidden behind the verse: *"...Sidratil Muntaha (An Najm: 53:14)* which *"...Nearby there is a paradise to live in, (An Najm: 53:15)*

It turns out that *"... Sidratil Muntaha (An Najm: 53: 14)* exists in a symmetrical universe that is translucent to the human eye.

## **THE PROPHET MUHAMMAD SAW HAS ENTERED INTO SIDRATIL MUMPUTA WHICH IS LOCATED IN A UNIVERSE THAT CAN'T BE SEEN BY EYES**

So, onward, we reveal the secret behind the verse: *"... in fact Muhammad saw Jibril at another time, (An Najm: 53:13) in Sidratil Muntaha (An Najm: 53:14) Nearby there is a paradise to live in. , (An Najm: 53:15)*

Apparently, the Prophet Muhammad saw had entered into *"...Sidratil Muntaha (An Najm: 53: 14)* which *"... Nearby there is a paradise to live in, (An Najm: 53: 15)* when the Prophet Muhammad saw, one night the 27th of Rajab in the 11th year of the prophethood coincided with the 8th of March 620 AD doing mi'raj.

## **WHY THE PROPHET MUHAMMAD SAW COULD ENTER INTO SIDRATIL MUNTAHA**

Now, one of the six universes that is transparent to the human eye, in which there are *"...Sidratil Muntaha (An Najm: 53:14)* and *"...Nearby there is a paradise to live in, (An Najm: 53 : 15)* interact with our universe that can be seen by the human eye,

Or in other words, Allah has brought this universe which is transparent to the human eye, in which there is *"... Sidratil Muntaha (An Najm: 53:14)* with our universe which can be seen by the human eye, in the surrounding area. Al Aqsa Mosque.

So, because Allah has brought this universe which is transparent to the human eye, in which there is *"... Sidratil Muntaha (An Najm: 53:14)* with our universe that can be seen by the human eye, around

the Al Aqsa mosque area. , then the Prophet Muhammad easily entered on foot into "... *Sidratil Muntaha* (*An Najm: 53: 14*) and "... *Nearby there is a paradise to live in,* (*An Najm: 53: 15*)

## HUMANS STILL ALIVE CAN ENTER PARADISE

Well, then we unravel the secret behind the verse: "...*Muhammad has seen Jibril...*(*An Najm: 53:13*) in *Sidratil Muntaha* (*An Najm: 53:14*)

It turns out that the Prophet Muhammad and Jibril are human, why is Gabriel a human?

The answer is

Hidden in the secret behind the verse: "... *We made the apostle an angel, ... he was a man ...* (*Al An'aam: 6: 9*)

So, humans who live on this earth, can enter paradise which is in a symmetrical universe that is transparent to the human eye.

Now revealed, the secret hidden in the verse: "*And indeed Muhammad saw Gabriel at another time,* (*An Najm: 53:13*) in *Sidratil Muntaha* (*An Najm: 53:14*)

Namely, the Prophet Muhammad saw, who is human, can enter into a symmetrical universe that is transparent to the human eye, in which there is "...*Sidratil Muntaha* (*An Najm: 53:14*) sees "...*Jibril...*(*An Najm: 53:13*) who is also human.

## CONCLUSION

From what has been described above we can now conclude that the secrets contained in the verse: "...*He made the seven skys in two times...And We decorated the sky that is near with bright stars...* (*Fushshilat: 41:12*)

It turns out, "...*the seven skys...*(*Fushshilat: 41:12*) is a picture of the universe that is visible to the human eye, and the universe that is invisible to the human eye.

Now, there is only one universe that is visible to the human eye, but the other six are transparent universes, meaning that the human eye cannot see it.

This is what Allah declared "...*He made the seven skys in two times...And We adorned the near sky with bright stars...*(*Fushshilat: 41:12*)

Well "... *We adorn the near sky with bright stars...* (*Fushshilat: 41:12*)

Now "...*the sky that is near...*(*Fushshilat: 41:12*) is which sky?

The answer is

The sky is "...*decorated...with brilliant stars...*(*Fushshilat: 41:12*)

That is, the universe that is visible to the human eye, which contains billions of stars. Where these stars form billions of galaxies, then each galaxy forms a galaxy cluster, then galaxy clusters form a galaxy supercluster.

Now then, we will uncover the secret behind the verse: "...*Allah,...willed the skys, then He made seven*

*skys... " (Al Baqarah: 2:29)*

It turns out, *"...the seven skys..." (Al Baqarah: 2:29)* is composed of seven universes, one of which, this universe, which consists of stars, which form billions of galaxies, galaxies form galaxy clusters, galaxy clusters form galaxy superclusters.

Well, this universe is a universe that is visible to the human eye.

Then, the other six universes are translucent to the human eye, meaning they cannot be seen by the human eye. Because, the human eye's vision is limited.

That is, Allah created 7 universes that have the same mass, that is, each universe has 4% mass which makes the 7 universes symmetrical.

Or in other words, the 7 universes created by Allah are “balanced (Al Mulk: 67: 3) or the 7 universes are symmetrical.
