## **ABSTRACT**

First of all, by asking forgiveness from Allah SWT, here I try to reveal the signs of Allah SWT about why Allah in calculating the speed of light is based on photons, quarks and the molecular structure of nucleic acids or deoxyribonucleic acid (DNA).

In the Qur'an, several verses are found that are the key to unlocking the secret of why Allah calculates using the speed of light, namely:

*"Allah is the light of the heavens and the earth....Light upon light (in layers), Allah guides to His light whom He wills...(An Nuur: 24:35)*

*"And if We made the apostle an angel, We would certainly have made him a man and (if We had made him a man), We would have doubted about them what they doubted about themselves. (Al An'aam: 6: 9)*

*"The angels and Gabriel ascended (to face) Allah in a day whose level is fifty thousand years. (Al Ma'aarij: 70: 4)*

*"And verily We have created man and know what his heart whispers, and We are closer to him than his jugular vein." (Qaf: 50:16)*

In an attempt to unmask why Allah uses the speed of light to calculate, I based on photons, quarks and deoxyribonucleic acid or deoxyribonucleic acid or the molecular structure of nucleic acids.

## **HYPOTHESIS**

Here I propose a hypothesis because Allah is light, used to calculate the speed of light from the point of view of photons, quarks and Deoxyribonucleic acid (DNA).

## **DEOXYRIBONUCLEIC ACID (DNA)**

DNA is a repository of genetic information that has a double structure that forms a double helix and which contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide is composed of folate, a 5 carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytocine (C) and Thymine (T). Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms.

Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

## **PHOTON**

Photons are elementary particles of the boson type and carriers of electromagnetic interactions.

## QUARK

If we want to know quarks, then we consider one of the hydrogen atoms that is the building block of the human body, animals, plants and fruits and inanimate objects. Then we open the body of the hydrogen atom, we will find one electron and one proton nucleus. Then if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with gluons.

## TO KNOW WHERE ALLAH IS USED CALCULATION USING THE SPEED OF LIGHT

Let us together uncover the secret behind the verse: *"Allah is the light of the heavens and the earth... (An Nuur: 24: 35)*

Well, here it is revealed that Allah is the light that illuminates the heavens and the earth.

So, here it is clearly illustrated, if we want to know where Allah is, then we must use the speed of light.

As described in the verse: *"The angels and Gabriel ascended (facing) to Allah in a day whose level was fifty thousand years. (Al Ma'aarij: 70: 4)*

Well here it is described when the angels and Gabriel ascend to meet Allah by using the speed of light. With the image of one light day according to Allah's calculation is equal to 50 000 light years according to human calculations.

According to human calculations one second the speed of light is 299 792 km.

The distance between the earth and the place where Allah is located is 50 000 light years.

One light year is 9 460 730 472 580 800 meters.

## WHY ANGELS AND JIBRIL CAN RISE WITH THE SPEED OF LIGHT

Now we uncover the secret behind the verse: *"The angels and Gabriel ascended (facing) to Allah... (Al Ma'aarij: 70: 4)*

Well, here it is clearly illustrated, that the angels and Gabriel are included in the light group.

Why are the angels and Gabriel in this case included in the group of light when the angels are humans *"And if We made the apostle an angel, We would certainly have made him a man... (Al An'aam: 6: 9)?*

The answer is

Because in the bodies of angels and Gabriel contain oxygen atoms, nitrogen atoms, hydrogen atoms and carbon atoms. Each hydrogen atom consists of a proton and an electron. When the two hydrogen atoms in the body of the angel and jibril collide with each other due to the force of great energy, one of the protons is converted into a neutron.

When an atom containing one proton and one neutron collides with hydrogen which has one proton it gives birth to helium which contains two protons and one neutron and most intensely produces gamma-ray photons.

Well, it is these gamma photons that rise to face God at a place 50 000 light years away.

## **WHY GOD IS CLOSER THAN HUMAN NECK**

Now we continue to uncover the secret behind the verse: *"...and We are closer to him than his jugular vein, (Qaaf: 50:16)*

Well, it turns out that here it is becoming clearer to us that Allah *"...Light above light (in layers),...(An Nuur: 24:35)* which contains photons are everywhere.

With this multi-layered light containing photons that illuminate the skin of the human body, it enters the skin of the neck and enters the veins of the neck.

So now the secret behind the verse has been revealed: *"The angels and Gabriel ascend (to face) Allah in a day whose level is fifty thousand years. (Al Ma'aarij: 70: 4) "...and We are closer to him than his jugular vein, (Qaf: 50:16)* that is because Allah is *"...Light upon light (in layers),...(An Nuur: 24: 35)*

## **CONCLUSION**

Based on the description above, we can conclude that Let us together uncover the secret behind the verse: *"Allah is the light of the heavens and the earth....(An Nuur: 24: 35)*
