ABSTRACT

First of all, by asking forgiveness from Allah SWT, here I try to reveal the signs of the greatness of Allah SWT regarding the spirit of Allah, the beginning and the end, based on photons, quarks and the molecular structure of nucleic acids or deoxyribonucleic acid (DNA).

In the Qur'an there is a verse that is the key to unlocking the secret of the first and final spirit of Allah, namely the verse:

*"He is the First and the Last, the Outward and the Inward; and He is All-Knowing of all things.
(Al Hadid: 57:3)*

"So when I have perfected the event, and have breathed into it My spirit (creation), then submit to it prostrating yourself (Al Hijr: 15: 29)

In an effort to unmask the first and final spirit of Allah based on photons, quarks and deoxyribonucleic acid or deoxyribonucleic acid or the molecular structure of nucleic acids.

HYPOTHESIS

Here I put forward the hypothesis that the first and last Allah's spirit contains oxygen atoms, hydrogen atoms, nitrogen atoms, carbon atoms based on photons, quarks and Deoxyribonucleic acid (DNA).

DEOXYRIBONUCLEIC ACID (DNA)

DNA is a repository of genetic information that has a double structure that forms a double helix and which contains polynucleotide macromolecules that are arranged repeatedly from nucleotide polymers. This nucleotide is composed of folate, a 5 carbon sugar and one of the nitrogenous bases. The nitrogenous bases are Guanine (G), Adenine (A), Cytocine (C) and Thymine (T). Guanine (G) is composed of 5 carbon atoms, 5 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms.

Adenine(A) has 5 carbon atoms, 5 nitrogen atoms and 5 hydrogen atoms. Cytocine (C) contains 4 carbon atoms, 3 nitrogen atoms, 1 oxygen atom and 5 hydrogen atoms. Thymine (T) contains 5 carbon atoms, 2 nitrogen atoms, 2 oxygen atoms and 6 hydrogen atoms. Folate contains 1 phosphorus atom, 4 oxygen atoms and 2 hydrogen atoms. The 5 carbon sugar has 5 carbon atoms, 2 oxygen atoms and 8 hydrogen atoms.

PHOTON

Photons are elementary particles of the boson type and carriers of electromagnetic interactions.

QUARK

As for if we want to know quarks, then we look at one of the hydrogen atoms that are the building blocks of the human body, animals, plants and fruits as well as inanimate objects. Then we open the

body of the hydrogen atom, we will find one electron and one proton nucleus. Then if this proton is split, then we will find two up quarks and one down quark. Where these three quarks are combined with gluons.

THE SPIRIT OF ALLAH CONTAINS OXYGEN ATOM, HYDROGEN ATOM, NITROGEN ATOM, CARBON ATOM

Let's focus now on uncovering the secret behind the verse: *"...and have breathed into it my (creation) spirit,... (Al Hijr: 15: 29)*

Well, it turns out that *"...my (creation) spirit,...(Al Hijr: 15: 29)* is a spirit that contains oxygen atoms, hydrogen atoms, nitrogen atoms and carbon atoms which are blown into the embryo of a human named Adam.

Where because Adam is human, then all humans on this earth contain oxygen atoms, hydrogen atoms, nitrogen atoms and carbon atoms and Deoxyribonucleic acid (DNA)

QUARK IS IN OXYGEN ATOM, HYDROGEN ATOM, NITROGEN ATOM, CARBON ATOM

Then we unravel the secret behind the verse: *"He is the First... (Al Hadid: 57: 3)*

It turns out that these early ones are quarks, where quarks are in every atom. If we open the atomic body of hydrogen, we will find one electron and one proton nucleus. If this proton were to be split, then we would find two up quarks and one down quark. Where these three quarks are combined with gluons.

THE EARLY AND THE END QUARK

This is the secret revealed in the verse: *"He is the First ... (Al Hadiid: 57: 3)*, namely this quark is the first to appear in this universe and this quark is also the last to exist in this universe *"... He is ..The Last ... (Al Hadid: 57: 3)*

After 10 billion billion billion billion billion billion billion billion billion years from now the energy holding the atoms together is gone so that the atoms will be destroyed, leaving only quarks and photons.

Where is the secret behind the verse: *"He is ... Zahir and the Inner; ... (Al Hadiid: 57: 3)* is that because quarks are particles, it is called something that can be investigated, as well as a spirit which is something supernatural that cannot be seen by the human eye.

Now the secret behind the verse is revealed: *"He is the First and the Last, the Outer and the Inner;... (Al Hadid: 57: 3)*

That is because this quark was the first to appear in this universe and it is also the last quark to exist in this universe. Also a quark is a particle, because it is called something that can be studied *"...Zhahir ..."*, as well as the spirit *"...Batin..."* which is something supernatural that cannot be seen by the human eye.

CONCLUSION

Based on the description above, we can conclude that the secret behind the verse: *"...and have*

breathed into it my (creation) spirit,... (Al Hijr: 15: 29)

Well, it turns out that "*...my (creation) spirit,...(Al Hijr: 15: 29)* is a spirit that contains oxygen atoms, hydrogen atoms, nitrogen atoms and carbon atoms which are blown into the embryo of a human named Adam.
